FAIRFIELD SEED FARM

RANDOLPH, WIS.

Instructions About Ordering.

Kindly use the order sheet enclosed with each catalog, this will greatly facilitate the filling of your order. Write plainly and you will be sure to have your order filled promptly and correctly. **Be sure to sign your name and full address on every order and keep a copy of same.** If your express office or freight depot has a different name from your postoffice, give that also. This is important, as we cannot forward goods if we do not know where to send them.

Remitting Money.

Cash should always accompany the order. Remittances may be sent by Money Order, Bank Draft, Express Order, or Registered Letter. When money is sent by any of the above methods the cost of remitting may be selected in extra seeds. Remittances sent in any other way are entirely at the senders risk. Clean Postage Stamps will be accepted the same as cash for small amounts. Parcels Post Stamps will not be accepted as payment for seeds.

Free Delivery.

We deliver free to any Express or Post Office in the United States, all seeds quoted in this catalog by the packet, ounce, quarter-pound, pound, half-pint, pint and quart. On seeds in larger quantities purchasers must pay the Freight or Express charges.

25

cents worth of seeds free is allowed for each \$1.00 sent for seeds in packets and ounces. This premium must be selected in packets and ounces and positively does not apply on orders for half-pints, pints, quarts, quarter-pounds, pounds, farm seeds, potatoes, special offers or collections.

Warranty.

While we use every effort possible in the selection of our seeds, and feel justified in saying that our seeds are as pure as the best, but at the same time, there are causes that are beyond the control of man that spoil the best seeds and cause poor crops, that it is impossible to guarantee seeds. Therefore, while we exercise great care to have all seeds pure and reliable, we sell no seeds with warranty, expressed or implied, further than the amount actually paid for such seeds as prove unsatisfactory, should there be just cause for complaint.

It must, however, be plain to everyone who gives the matter the slightest thought, that it is to our best interest to send out only such stock as will not only grow but also prove true to name and description.

Safe Arrival of Packages.

We endeavor to secure the safe arrival of packages of Seeds and Bulbs in good condition in every case. If a package is injured or lost, by Mail or Express, we will replace it as soon as notified of the fact. Frequently it happens that orders never reach us, or are without a signature or address. When customers fail to receive their packages within a reasonable time, they should inform us, and at the same time send a copy of their order and any other information necessary to trace the goods.

Order Early.

It will greatly facilitate shipments if orders are sent early. We aim to send off all orders the same or next day after they are received, but during the busy season this is impossible—hence the advisability of ordering early.

The attention of our customers is called to the above instructions, which will, if followed, be an aid to the purchaser as well as to ourselves.

J. W. JUNG SEED CO.,

Seed Growers,

RANDOLPH,

WIS.

Fairfield Specialties.

We take great pleasure in offering our customers the following Grand Vegetables: Jung's Fairfield Wonder Wax Bean.

" " Giant Cucumber.

" " First Tomato.

SPECIAL OFFER: One pkt. of each of the above for only 20c.

SEED DRYING HOUSE AT FAIRFIELD FARM

Randolph, Wis., Jan. 1, 1913.

To Our Friends, Our Customers:-

In issuing this, our catalog for 1913, we wish to thank our many customers for the kind orders with which they have favored us the past season. Those who have not dealt with us before will find our catalog different from many others as it is not filled with overdrawn illustrations or dishonest descriptions.

We Believe In Telling The Truth.

In no other business transaction does a person place as much confidence in the party with whom they are dealing as in the buying of seeds, and when you entrust us with your orders you may rest assured that you are getting the best seeds it is possible to produce. The best proof we can give that our seeds are giving satisfaction is the fact that **OUR BUSINESS IS MORE THAN DOUBLING EACH YEAR.**

We are satisfied with a reasonable profit, our aim is to supply the **Best Seeds at a Reasonable Price.**

At our Fairfield Seed Farm we grow a larger percentage of the seeds we retail than any other seedsmen in America, here we employ the very best methods in improving, testing and growing seeds.

Our greatest pleasure and best advertisement is a satisfied customer and we always do our very best to please.

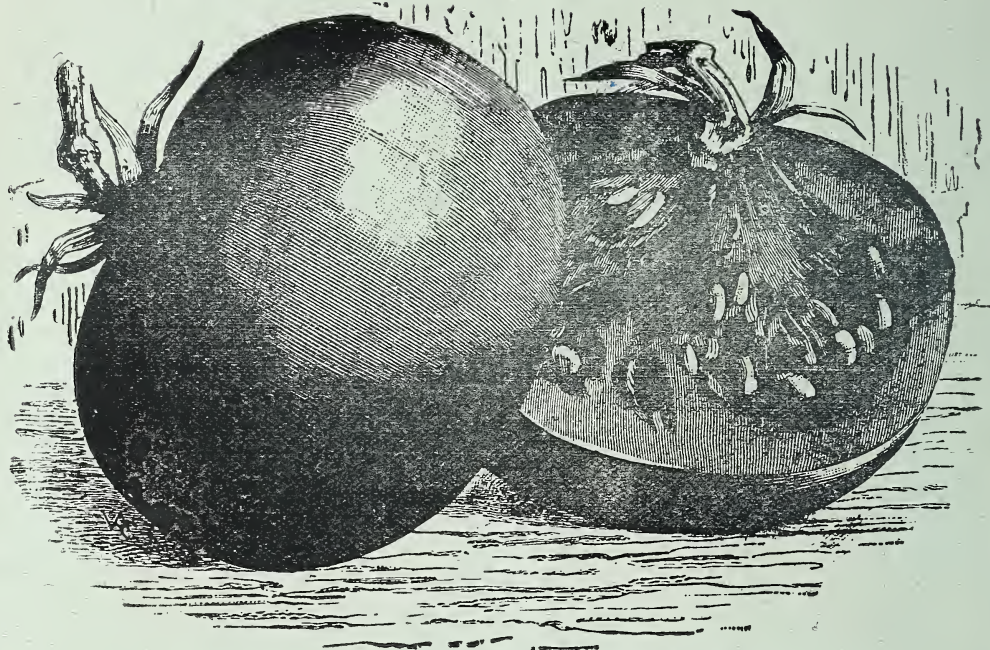

Trusting to be favored with your orders which shall have our prompt and careful attention,

Cordially yours,

J. W. Jung Seed Co.

Success with Vegetables and Flowers

is the title of a little booklet we have printed for your benefit. It contains full cultural instructions on growing vegetables and flowers and will be sent free with orders if asked for.

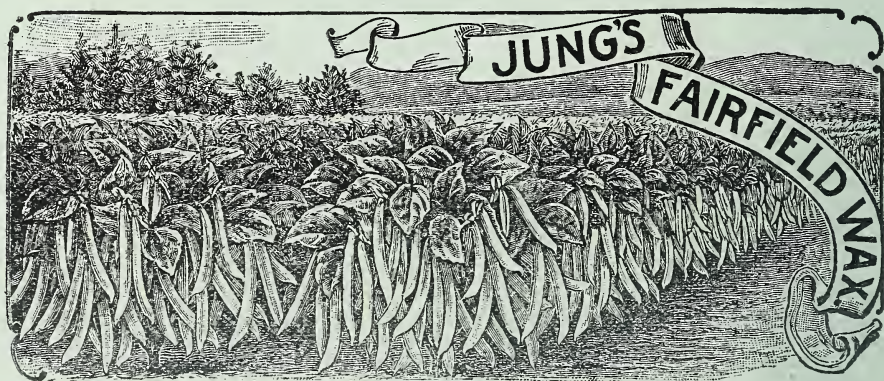

Jung's Fairfield First TOMATO.

THE SMOOTHEST AND FINEST FLAVORED EXTRA EARLY TOMATO.

The one great fault with other extra early tomatoes is that they do not have sufficient foliage, and as a result the fruits will sunburn which greatly detracts from their appearance and quality. Fairfield First is fully as early as any other variety and in addition is abundantly supplied with foliage which protects the fruits from the sun and preserves its fine appearance and quality. This variety has been carefully bred for extreme earliness, productiveness, and smoothness of fruit. Fruits are of good size, smooth, and borne in clusters. It is a very heavy cropper.

Although one of the first to ripen, the vines continue to bear until frost; the size and smoothness of the fruits is maintained until the end of the season. The color is an intense velvety scarlet, fruits are almost globe shaped making it a splendid variety for slicing.

The fruit is remarkably solid and firm: flesh is thick and heavy, of fine flavor, and contains but few seeds. Vines are strong and healthy growers. Pkt. 10 cts.: oz. 40 cts.; $\frac{1}{2}$ lb. \$1.30.

Jung's Fairfield Wonder Wax.

WITHOUT A DOUBT THE FINEST WAX OR BUTTER BEAN.

It is with much pleasure that we

offer our customers this grand new Butter Bean as we are sure it will please the most critical planters. This variety originated on our Fairfield Farm and is by far the finest wax bush bean we have ever seen. The bushes are unusually vigorous and free from disease. They grow from 15 to 20 inches high, have very large foliage and bear an immense load of pods which are from 6 to 9 inches long, $\frac{1}{2}$ inch broad, very fleshy and have absolutely no strings.

The color is a rich lemon yellow. If you want the very best Butter Beans of them all then try JUNG'S FAIRFIELD WONDER WAX. Pkt. 10 cts.; $\frac{1}{2}$ pt. 25 cts. Not more than $\frac{1}{2}$ pint to a customer.

Will H. Jung & Co.

Jung's

UNRIVALED GARDEN SEEDS.

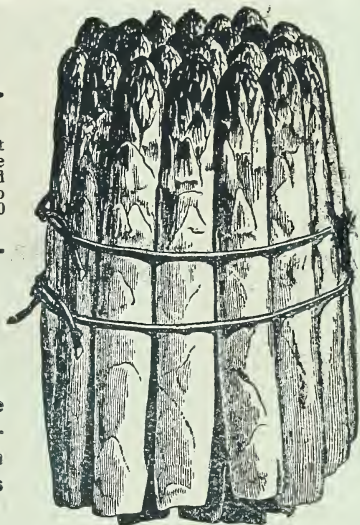

In the following list you will find only such varieties as have been thoroughly tested and found to be of special merit. All of our seeds were grown from the finest select stocks and for quality and productiveness are unexcelled by any others. WE HANDLE ONLY THE VERY BEST SEEDS and QUALITY rather than price is our first aim.

Asparagus.

Barr's Mammoth.

This is an excellent variety. The stalks are of a green color, almost an inch in diameter from the bottom completely to the tip. They are of quick growth and free from woody fibre. We offer both seed and roots. Price of seed: Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{2}$ lb. 25 cts. Price two year old roots, 25 cts., per dozen, postpaid. By freight or express: 80 cts. per 100.

Jung's Unrivalled Bush Beans.

Our Seed Beans are extre fine! They were grown on the Fairfield Seed Farm, were thoroughly rogued, hand picked and are worth much more than the less carefully selected strains as are usually sold.

Burpee's White Wax.

A large white seeded Butter Bean with handsome yellow pods which are absolutely stringless. The plants make strong robust bushes 15 inches high, with strong branches, which hold the pods well up from the ground and insure them from rusting. The pods are produced in great profusion, measuring from 5 to 6 inches in length, $\frac{1}{2}$ inch broad and are very meaty when ready for table use. They are always of fine flavor and attractive appearance served in any way. It is a general purpose variety of superior merit. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 30 cts.; qt. 45 cts.

Profusion Wax.

The leaves of this bean distinguish themselves from other varieties by their beautiful willowy shape. It is very hardy, having withstood frosts which seriously checked other varieties. The bushes are literally covered with the fine transparent yellow pods which are from four to five inches long, remarkably brittle, as it has no strings whatever. It is sure to make a reputation for itself either in the home or market garden. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts., postpaid.

BURFEE'S WHITE WAX

NEW
KIDNEY WAX.—
Natural Size
Pod.

NEW KIDNEY WAX

New Kidney Wax. **Without any exceptions the finest flat-podded Wax Bush Bean in cultivation.**

A great improvement on Wardwell's Kidney Wax, being more robust and prolific, and having longer pods which are much handsomer and of finer quality. The plants are of erect bush habit, reaching eighteen to twenty inches in height. Their thick foliage is free from blight, while the pods are free from rust. The fleshy pods are flattened in form, six to seven inches long, one half inch broad, and three-eighths of an inch thick; the color is a rich lemon yellow. The pods are remarkable for their meatiness, fine flavor and absolute freedom from strings. The pods hang in rich clusters from the vines, making picking quite easy. Plants of this variety have been grown on our Fairfield Farm bearing forty large pods each. It is without any doubt the best variety to plant for either the home or market garden. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 30 cts.; qt. 50 cts.

Pencil Pod Black Wax.

We consider this one of the best Wax Beans yet introduced. It is very productive, and of most excellent flavor. The pods are long, straight, and round like a pencil, fleshy and of a bright yellow color, tender, brittle and absolutely stringless. The plants are of true bush growth, fifteen inches high, with abundant foliage. The magnificent pods are from five to seven inches long. The ample foliage shelters the pods from the hot sun which renders them exceptionally tender and brittle. This is one of the best wax pod beans for the home garden. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 45 cts., postpaid.

PENCIL POD BLACK WAX

Currie's Rust Proof Golden Wax.

One of the earliest and most prolific wax bush beans. The bushes are strong vigorous growers and bear an immense load of long, flat, meaty pods which are of the most handsome appearance. Not only does this variety possess the merit of being rust-proof but it is also extra early.

The pods are exceedingly crisp and tender and of most delicious flavor. The handsome yellow pods are five to six inches long and of oval shape.

Vines are vigorous and productive, and is the hardiest of all Wax sorts. Pkt. 5 c.; $\frac{1}{2}$ pt. 15 c.; pt. 25 c.; qt. 40 cts.

CURRIE'S RUST-PROOF WAX

Brittle Wax BUSH BEAN.

The earliest of all Wax Beans. Of such excellent quality it might well be termed "best of all." The plants are very hardy and vigorous, of true bush growth, about fifteen inches high and heavily laden with the long straight round and very solid pods from five to seven inches long. The pods are of a rich golden color, very tender and entirely free from string at all stages of its growth. It will stand longer than any other bean without becoming hard. The pods are unexcelled for snap-shorts, while having white seeds showing only a small black dot at the eye, any pods allowed to ripen will be readily saleable as winter shell beans. Include this great bean in your order. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 30 cts.; qt. 50 cts., postpaid.

Stringless Green Pod.

This variety combines the following essential points; extreme earliness, being the first to produce pods, unusual hardness and great productiveness. The pods are from five to six inches long; very round, of a rich green color and entirely stringless even when matured. They are tender, brittle and of the finest flavor. It is without any exceptions the finest green podded bean in cultivation. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 50 cts.

BRITTLE WAX Brussel Sprouts.

LONG ISLAND IMPROVED.

The "sprouts" resemble small cabbages growing closely on the stalk of plant. They are palatable and nutritious. Long Island grown.

Pkt. 5 cts.; oz. 25 cts.

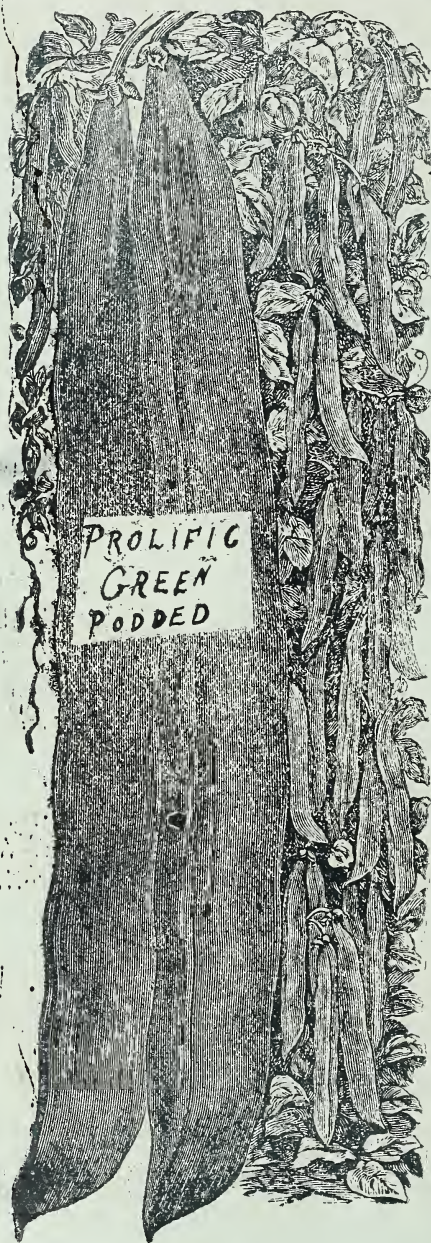

Prolific Green-Podded POLE BEAN.

The best green-podded pole bean in cultivation. It is earlier than most other varieties and covers a longer season of productiveness.

The vines are vigorous growers, being loaded with pods from summer until frost. It is a very sure cropper, even in unfavorable seasons producing large crops.

The pods, borne in clusters, average 6 to 8 inches in length, are uniformly straight, of a dark rich green color, and very meaty. Pods are entirely stringless, very tender and sweet, and of mild flavor. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 c.; qt. 43 c.

KENTUCKY WONDER WAX

Kentucky Wonder Wax POLE BEAN.

The merits of the old Kentucky Wonder Pole Bean are well known. This variety has all its superb qualities with the addition of beautiful transparent yellow pod.

It is a rampant grower, one plant filling a pole with vines densely loaded with almost a solid mass of pods from bottom to top.

The pods are very large, being from 8 to ten inches long, exceedingly tender and very fleshy. The pods are so plump and fleshy that frequently they are of greater thickness than width.

Deliciously rich and buttery in flavor. Pkt. 10 cts.; $\frac{1}{2}$ pt. 29 cts.; pt. 30 cts.; qt. 50 cts., postpaid.

FIELD BEAN.

Improved Prolific Tree.

It is a sure cropper, and not only more prolific than the common white bean, but also of better quality. Vines are large, spreading, with small thin leaves, and occasional runners.

The plants grow upright and bear the pods well up from the ground, thus keeping them away from the soil and making them more easily gathered. Beans are pure white and of small size. Pkt. 5 cts.; pt. 25 cts.; qt. 40 cts.

Wonder Bush Lima Bean.

We have grown this strain for five years and can truthfully say that it is the very best "Bush Lima Bean."

It is a great improvement on Burpee's Bush Lima. While the bushes are fully as productive, the pods are borne more at the center of the plant. This is a great advantage as the pods are held up from the ground. The bushes grow eighteen to twenty inches high, requiring no poles or stakes whatever.

The pods are of truly mammoth size and contain from three to four large beans each. They are very tender and delicious in flavor. There is nothing quite so delicious in the vegetable line as nice fresh Lima Beans. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; qt. 30 cts.; 50 cts., postpaid.

POLE LIMA BEAN.

Henderson's Early Leviathan.

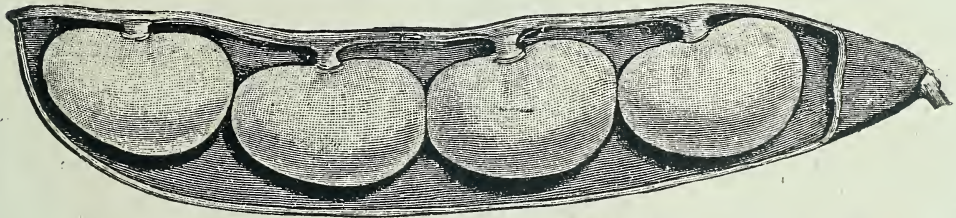

This is the earliest. Not only will it give large lima beans earlier than any other strain, but it is also much more productive, both early and throughout the season. It is a strong grower, clinging well to the poles, and is a sure cropper. The pods differ from those of other early pole limas in being straighter and longer.

The pods hang from the foliage in large clusters and contain three to four and sometimes five beans to a pod. It bears until frost, and a small patch will supply a family.

WONDER BUSH LIMA

three to four and sometimes five beans to a pod. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; qt. 30 cts.; 50 cts.

HENDERSON'S EARLY LEVIATHAN

BORECOLE, or KALE.

DWARF GERMAN. Useful for furnishing greens for boiling during the early fall, winter, and spring months.

The leaves are very curly, bright green, tender, and delicate in flavor. The plants are hardy and the quality is improved by freezing. Pkt. 5 cts.; oz. 10 cts.

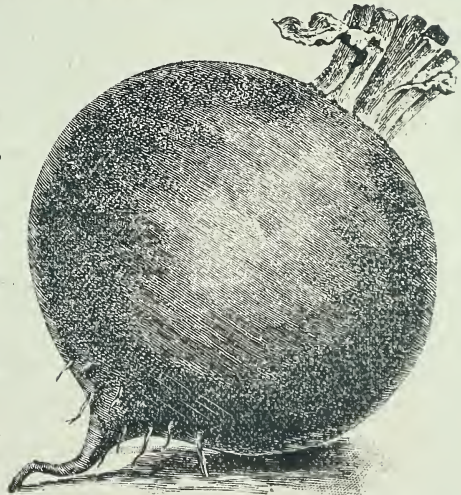

Garden Beets.

Our packets of Beets each contain 1-4 ounce of seed.

Early Model.

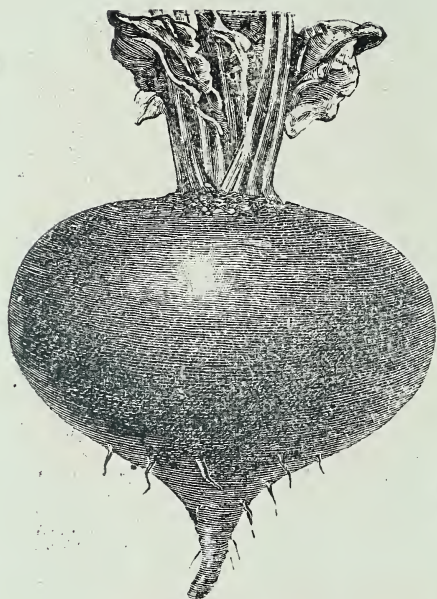

This splendid variety has attained perfection for table use. It is extremely early, of perfect globe shape and finest quality. It is a fine selection of blood red beet, extremely smooth and of symmetrical growth, fine rich color and desirable shape. The roots of Early Model are of good size and run uniformly perfect, almost round, with small dark crimson colored leaves and a slim tap root.

It makes a rapid growth and matures very early. In quality and color it is peerless; very fine grained, tender and sweet, never woody or stringy. The tops are small making it a good forcing variety. It retains its choice quality and freedom from woodiness until the beets have reached their full size. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{2}$ lb. 35 cts., postpaid.

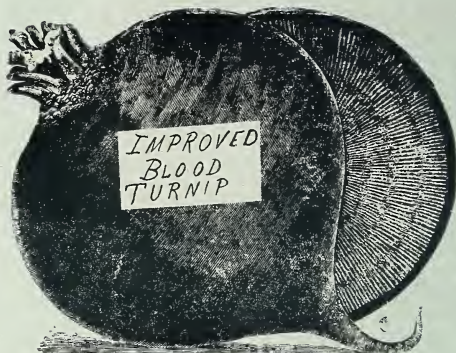

EARLY MODEL

Plant JUNG QUALITY Seed And Be Prosperous.

COLUMBIA

neat turnip shape. The flesh is a deep red color and of fine quality, remaining tender until the roots have reached their full size. The foliage is small and of a rich bronze color. The roots can be used early in the season, when only partially grown, being ready for use soon after the Extra Early sorts and is of finer quality. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts., postpaid.

Improved Blood Turnip Beet.

This is an improved strain of the popular Blood Turnip. It is very early, of perfect globe shape and free from side roots. The flesh is a deep red color, fine grained, sweet, and of a dark color when cooked. Tops are small and of uniform growth, the leaves, stems, and veins being a dark red. It grows quickly and is of fine quality. Excellent for summer, fall or winter use. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.

Columbia.

An excellent early variety for all purposes. The roots are always smooth, from four to five inches in diameter, and of a neat turnip shape. The flesh is a deep red color and of fine quality, remaining tender until the roots have reached their full size. The foliage is small and of a rich bronze color. The roots can be used early in the season, when only partially grown, being ready for use soon after the Extra Early sorts and is of finer quality. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts., postpaid.

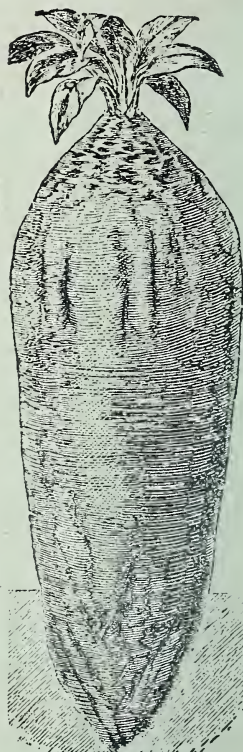

Mangels.

Mammoth Long Red.

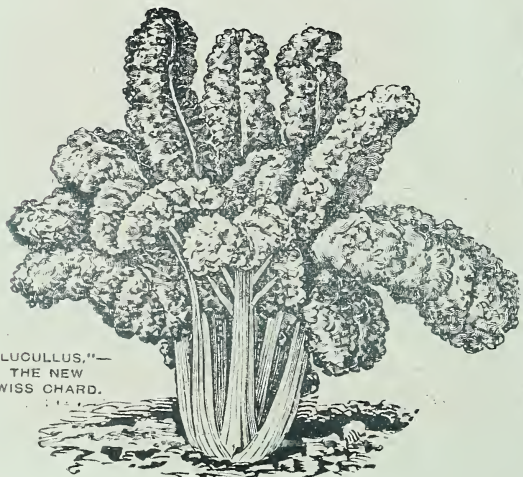

The best mangel for deep soil; large size; wonderfully productive and of superior quality. Specimens of this variety have been produced weighing 50 pounds. Oz. 5 cts.; ¼ lb. 20 cts.; lb. 50 cts., postpaid.

Golden Tankard.

A smooth yellow fleshed mangel; the roots are of large diameter, tapering quickly at the bottom, which is quite broad with only a small tap-root. It grows largely above the soil and is easily harvested. It yields an enormous bulk on good soil, and can be closely grown in rows. No root crop is a better paying investment for farmers to grow than Mangels. Oz. 5 cts.; ¼ lb. 20 cts.; lb. 50 cts.

MAMMOTH LONG-RED

"LUCULLUS,"—
THE NEW
SWISS CHARD.

Swiss Chard.

LUCULLUS.

Plants grow two feet high and consist, when fully developed, of about a dozen creamy white, attractively curled leaves. These leaves are carried on broad, thick stalks about 12 inches long. The leaves may be cooked in the same manner as Spinach. Pkt. 5 cts.; oz. 10 cts.

Cabbage.

The Cabbage seed we are offering was grown with exceptional care. The plants were grown from selected stock and the heads were all carefully inspected before being set out. Our packets of Cabbage each contain seed enough to produce 500 plants.

Extra Early Express.

**POSITIVELY THE EARLIEST
CABBAGE ON EARTH.**

It produces heads of good size a week to ten days earlier than Jersey Wakefield. There are few loose leaves, and almost every plant forms a head of good size and fine quality. It can be planted close, and yields a large crop. A fine variety for shipping as the heads remain solid for a long time. It is a beautiful cabbage in appearance, being handsome in color and general uniformity. Also called "Lightning" and other fancy names by some seedsmen. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 60 cts., postpaid.

EXTRA EARLY EXPRESS

Early Jersey Wakefield.

JUNG'S SPECIAL STOCK.

The standard pointed-headed early cabbage throughout the U. S. The heads are uniformly hard and solid. They are pyramidal in form generally pointed at the end, with but few outside leaves. The outside leaves are unusually thick and heavy, and it is thereby enabled to stand more cold weather without injury when carried through the winter. Having but few outside leaves it may be planted close, so that more heads can be grown to the acre than with other sorts. It is exceedingly tender, fine grained and as a cropper no early cabbage can approach it. Size is ideal for marketing.

Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 60 cts.

EARLY JERSEY WAKEFIELD

All Head Early.

This variety has proved itself to be adaptable to a wide range of both soil and climate, and is well worthy of recognition as a standard American sort. It is the earliest of all large Cabbage and considerably larger than any other early summer cabbage. The deep flat heads are remarkably solid and the most uniform in color, shape and size of any variety. Good quality and tenderness are marked features.

It is suitable for growth in spring and early summer, or for use as a winter sort. The hard heads grow so free from spreading leaves that fully one thousand more heads than usual with large cabbage can be grown to the acre. Seed sown in July, and plants set in August, will produce good heads for wintering. It is a money maker for gardeners. Pkt. 5 cts. oz. 20 cts.; $\frac{1}{4}$ lb. 60 cts., postpaid.

ALL HEAD EARLY

NOTICE.

PARCELS POST STAMPS will not be accepted as payment for seeds as seeds do not come within the provisions of the **Parcels Post Bill**.

Copenhagen Market.

An extreme-early Cabbage of unusual merit. It matures as early as Wakefield and will give a much heavier yield per acre than that popular variety. The plant is short-stemmed, the heads being produced almost on the ground level.

The leaves are light green, rather small, saucer-shaped, and always tightly folded. The splendid solid heads weigh as much as eight pounds each, are of exceptional fine flavor, and show no signs of cracking. The type is thoroughly fixed, the heads maturing all at the same time, this is a great consideration to Market Gardeners, entailing less labor in harvesting the crop and allows the ground to be cleared at the first cutting. This cabbage has come to stay and will surely please everyone who tries it.

Pkt. 10 cts.; oz. 50 cts.; $\frac{1}{4}$ lb. \$1.75.

Short Stem Drumhead.

This variety is uniform in heading, and dwarf in growth.

The heads appear to rest on the surface of the soil. It grows with little outer foliage, the leaves all folding in closely about the head which is very solid. It is a standard sort for winter keeping and sells readily in the winter and spring markets. With good cultivation heads attain a weight of 20 to 30 pounds and are of the finest quality. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 60 cts., postpaid.

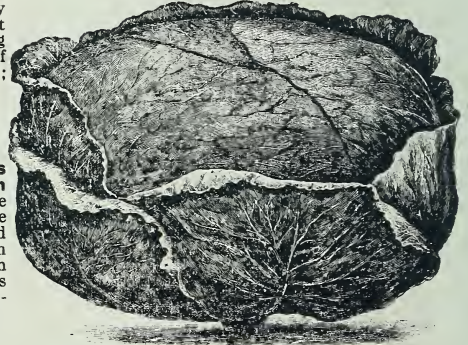

Danish Roundhead.

An earlier shorter stemmed type of the famous Danish Ballhead. It is slightly larger than Danish Ballhead and produces more weight per acre. The foliage is lighter in color; the handsome hard heads are beautifully white when trimmed. The heads are produced about two weeks earlier and while perfectly round in form are not so deep through. It is shorter stemmed than even the Short-Stemmed Ballhead which is sometimes sold as Danish Roundhead. The magnificent hard heads are splendid keepers and always bring the highest prices on market.

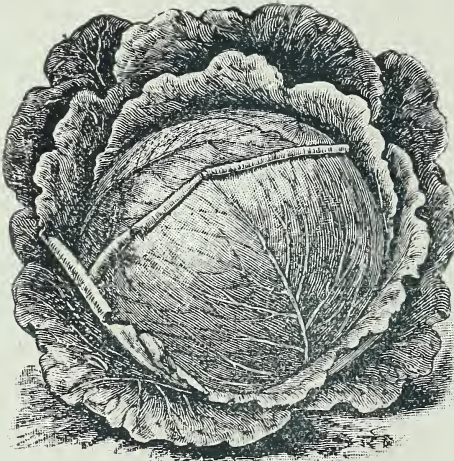

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts., postpaid.

COPENHAGEN MARKET

SHORT STEM DRUMHEAD

DANISH BALLHEAD,—from a Photograph.

Danish Ballhead.

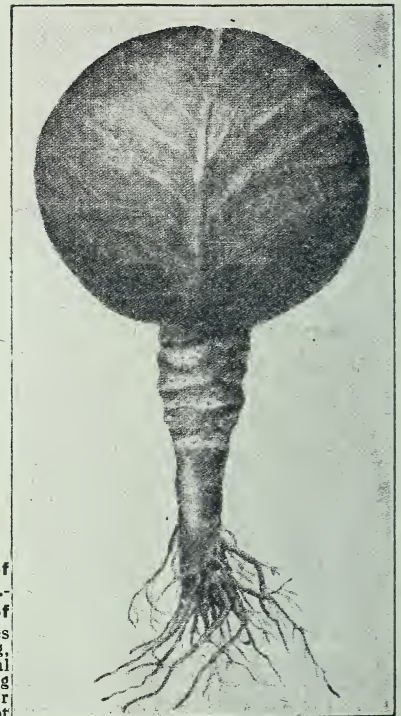

A GRAND HARD HEADED CABBAGE.

This type of winter Cabbage has become very popular of late years on account of its **UNEQUALLED KEEPING QUALITIES** as well as for the **great SOLIDITY and WEIGHT of the heads.**

It is strong and vigorous in growth, and produces large, round, compact heads, exceedingly hard and solid weighing, when trimmed, fully one-fourth more than any other cabbage of equal size.

For boiling, slaw, sauerkraut, etc., it is unequalled, being crisp, tender and sweet. It seems to grow well on all soils and under most conditions, withstanding hot, dry weather, and does not rot from the effects of wet seasons, neither do the heads burst.

Danish Grown Seed. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 80 cts.

DANISH ROUNDHEAD

1 Surehead CABBAGE.

SUREHEAD

A leading late variety. It produces large round flattened heads of the Flat Dutch type, and is remarkable for its certainty to head. The heads are very uniform in size, extremely solid, fine in texture and flavor, and ordinarily weigh from ten to fifteen pounds each. It has but few loose leaves and is an excellent keeper. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 60 cts., postpaid.

Red Drumhead.

The well known standard cabbage. Heads are of large size, slightly rounded, and from seven to eight inches in diameter. A valuable variety for pickling; very sweet, tender and of excellent quality. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 50 cts., postpaid.

Perfection Savoy.

This is the hardest heading and best all-round Savoy. Plants are of strong growth, having only a moderate amount of outer foliage growing closely about the large solid round heads. It is very sweet and crisp, and always tender. The heads are beautifully blancheted and of the finest flavor. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 50 cts.

Cauliflower

Our Cauliflower seed is imported from Denmark. Danish grown seed is the finest and best in the world. Our packets each contain seed enough to produce 200 plants.

Dry Weather.

Especially Adapted to Resist Drought. Reaches Perfection Where Ordinary Sorts Fail.

Pre-eminently the best early variety for the family garden and also for market gardeners in sections which are not especially adapted for Cauliflower.

Plants are of vigorous growth, producing large solid heads of snowy whiteness and fine quality. It has heavy foliage and is not liable to rot in hot weather. It is in all respects a first-class cauliflower, but is especially and peculiarly adapted to dry situations and to resisting the effects of drought. It will also do well in wet or moist seasons, making heads equal to the best. Pkt. 15 cts.; $\frac{1}{4}$ oz. 70 cts.; $\frac{1}{2}$ oz. \$1.25; oz. \$2.40.

Early Snowball.

FOR EARLINESS AND RELIABILITY TO PRODUCE A HEAD OF GOOD SIZE, AND RICH, WHITE, CURDY APPEARANCE IT IS UNEQUALLED.

It forms snow white heads, six to ten inches in diameter, of good quality.

While originally recommended and used as an early variety, it has not only supplanted all other sorts for spring planting, but it has largely driven out the large late sorts for fall use, being much finer in quality, and the one Cauliflower that is absolutely certain to head when conditions are ordinarily favorable. The heads are so solid, compact and deep that they will outweigh those of any other strain. There is a great difference in the strains of this variety offered, but our stock is the very best.

Pkt. 10 cts.; $\frac{1}{4}$ oz. 60 cts.; $\frac{1}{2}$ oz. \$1.10; oz. \$2.00.

Autumn Giant.

This is a large variety, with fine, well proportioned heads. The heads are so well protected by the foliage as to remain fit for use a long time. Suitable for late planting. Quality excellent. Pkt. 10 cts.; oz. 50 cts.; $\frac{1}{4}$ lb. \$1.60, postpaid.

DRY WEATHER

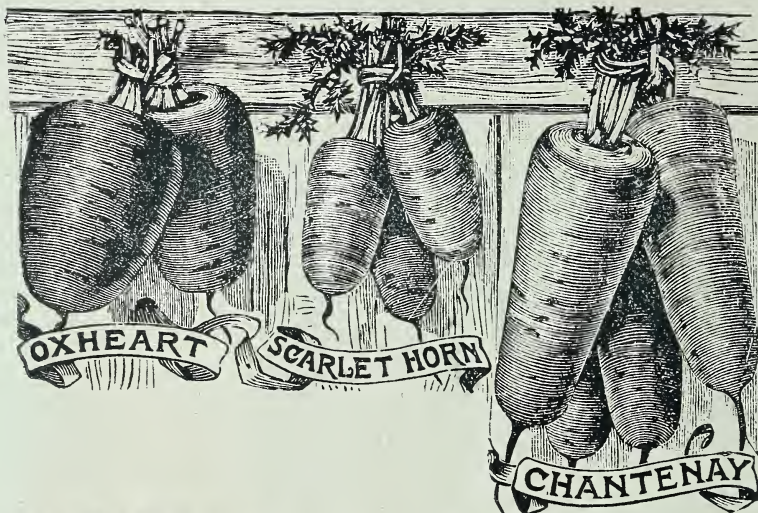

EARLY SNOWBALL

JUNG'S SEEDS ARE RELIABLE.

Choice Carrots.

Our stocks of Carrot seed are true of type, being far superior to the stock generally offered by the average dealer. Our packets each contain 1-4 ounce of seed.

Early Scarlet Horn.

This is a popular early variety, three to four inches long and stump rooted; it is a favorite for bunching for market and is sometimes forced. The flesh is fine grained and the color a deep orange.

It has small tops and grows well in shallow soil. A fine table Carrot when pulled young is excellent for soups.

This variety is considered by many to be the best early table sort. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 35 cts.

Oxheart.

The most popular and best cropper among the short carrots. It runs fully three to four inches in diameter, and specimens have been raised measuring seven inches in diameter. The quality is extra fine and satisfactory for home or market use. Oxheart can be easily pulled, which makes harvesting easy and inexpensive. It yields a heavy crop. Always of a good shape and rich orange color. Flesh fine grained with little or no core. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 35 cts., postpaid.

Chantenay.

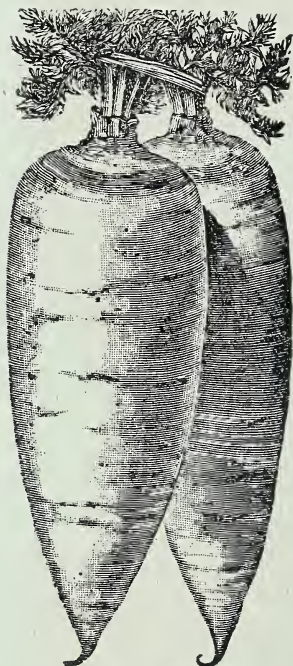

This variety is desirable in all respects, it is stump-rooted and therefore very easily dug. Roots are very smooth, fine in texture, and of a beautiful orange color.

For table use it is considered to be the best of all, both on account of shape and quality. The flesh is very tender when cooked. Although this is a medium early sort, it furnishes roots of usable size as early as any variety, is a heavy cropper and undoubtedly one of the best for, both the market and private garden, while its great productiveness makes it very desirable as a field sort. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 35 cts., postpaid.

FIELD CARROT.

Large White Belgian.

This is the heaviest cropping carrot grown, yielding more tons to the acre than any other sort. The flesh is white, crisp and solid and very sweet in flavor. The roots grow about one foot long and are heavy at the shoulder, rendering them easily harvested. The roots frequently measure 14 to 18 inches in circumference, and 18 to 35 tons to the acre is not an extravagant statement as to yield. Every stock farmer should try this carrot. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. \$1.10, postpaid.

LARGE WHITE BELGIAN

CABBAGE, Danish Ballhead

CUCUMBER, Davis Perfect

LETTUCE, Wayhead

MUSK MELON, New Fordhook

TOMATO, Fairfield First

Sent postpaid to any address for 25 cts. This unusual bargain should not be overlooked.

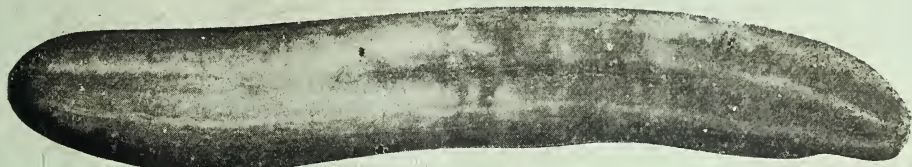

Our Great 25 Cent SPECIALTY COLLECTION.

This is the greatest Vegetable Seed Bargain ever offered. Six of the leading specialties for only 25 cts. as given below.

Select Cucumbers.

Our Cucumbers were grown from the finest selected stock, carefully rogued and true of type.

The most of our seed was grown on our Fairfield Farm which for quality and productiveness is unexcelled. Our packets each contain 1-4 ounce of seed.

FAIRFIELD GIANT

Fairfield Giant.

Without any exceptions the darkest green and most nearly seedless cucumber in cultivation. The vines are unusually vigorous in growth and produce an enormous crop of the handsomest of all Cucumbers. The fruits are smooth, of a very deep green color, and grow from fifteen to twenty six inches in length, being one of the largest cucumbers grown. When the fruits are from eight to ten inches in length, or just the right size for slicing, they are practically solid, there being hardly a trace of seed to be found. The pure white flesh is very firm, sweet, crisp, and of the finest flavor. As shown in the illustration the fruits are very long and slim which together with their deep green color will make them bring the top prices on all markets. Pkt. 10 cts.; oz. 20 c.; 1-4 lb. 60 c.

Davis Perfect.

A Cucumber which for shape, quality, color, and forcing indoors, or growing outside is unexcelled. The type is perfectly fixed, it has an ideal shape, being slim and symmetrical. The eating qualities surpass all other varieties. The vines are strong, rampant growers and enormously productive, outyielding most other varieties.

It does not change its dark green color when grown outdoors, in fact it resembles the hothouse product so closely that dealers cannot detect the difference. The seeds that are contained in it when it is in slicing condition are so small and tender that they are unnoticed. Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 35 cts., postpaid.

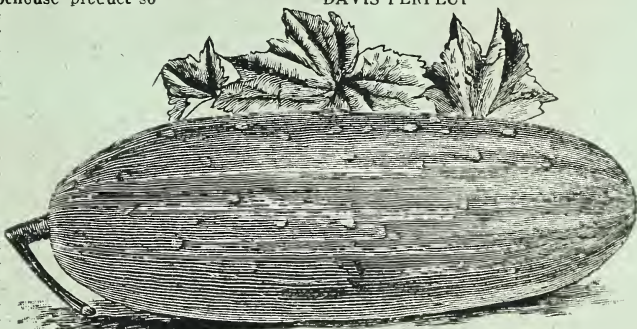

DAVIS PERFECT

Extra Early

White Spine.

A dark green handsome cucumber, often attaining a length of 12 inches; straight and attractive in shape. It makes a hard brittle pickle when small, and a grand table variety when large. Excels in earliness, often ready for slicing when other sorts are only pickles. Vines are vigorous growers and bear large crops. It makes a valuable variety to plant for early market. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 30 cts.

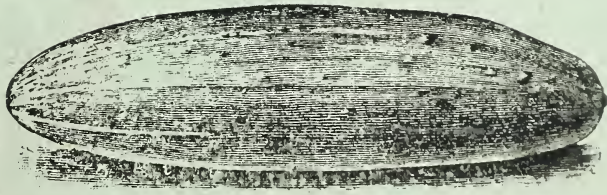

EXTRA EARLY WHITE SPINE

Fordhook Famous.

This is the handsomest of all long green cucumbers; always straight and well formed, they never turn yellow. Critical buyers are willing to pay an extra price on market for these unequalled fruits.

The vines are of strong vigorous growth, with heavy foliage, and set the extra large fruits freely throughout the season.

The cucumbers are smooth and regular in form, averaging twelve to fourteen inches in length, and have a very thin and tender skin. The flesh is very thick, crisp and exceptionally mild in flavor. The cucumbers are about all flesh as the seed spaces are very small. Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 30 cts., postpaid.

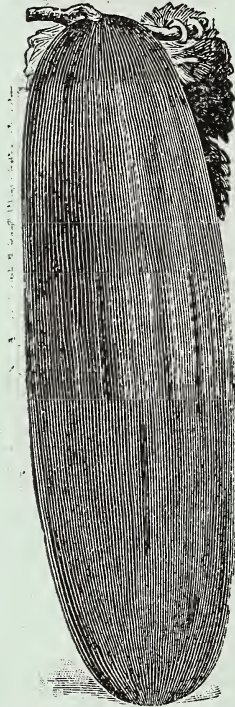

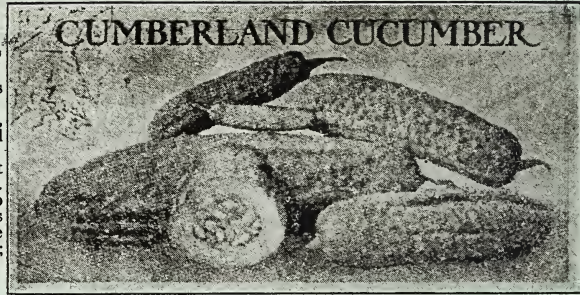

FORDHOOK FAMOUS

Cumberland

CUCUMBER.

The vines are hardy, of strong vigorous growth, and very productive. The young cucumbers are thickly set with small spines, and are equally attractive for making small gherkins, medium-sized or large pickles. The straight young fruits possess the distinct roughened surface so much desired in pickles.

When matured the fruits average nine to ten inches in length, two and one-half inches in diameter, have well rounded ends, and are of excellent quality for slicing. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts., postpaid.

EMERALD CUCUMBER. retaining its color until quite ripe, making it an attractive variety. The fruits set early, and its vigorous vines abound in long, straight, handsome fruits of the most desirable qualities. As a slicer, the flesh is perfectly crisp and tender, and the flavoring most pleasant. The young fruits being dark green, straight slender and almost spineless, makes an excellent pickle, and when ripe none excel it for making sweet pickles. Good for forcing under glass or long distance shipping. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.

EVERBEARING

Everbearing.

This is a very early variety and extremely prolific. If the fruits are kept gathered, vines will continue in bearing throughout the season.

The fruits, of a rich dark-green color, average from four to five inches in length by an inch and a half in diameter. Owing to its great productiveness it is a fine variety to plant for producing small pickles. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts., postpaid.

Emerald.

A symmetrical dark green cucumber which holds its color a long time after being picked. It is strictly an evergreen, making it an attractive variety. The fruits set early, and its vigorous vines abound in long, straight, handsome fruits of the most desirable qualities. As a slicer, the flesh is perfectly crisp and tender, and the flavoring most pleasant. The young fruits being dark green, straight slender and almost spineless, makes an excellent pickle, and when ripe none excel it for making sweet pickles. Good for forcing under glass or long distance shipping. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.

Celery.

Our packets of Celery each contain seed enough to produce 500 plants.

WhitePlume.

This is the earliest and most easily blanched Celery. The plants grow rapidly and blanch easily during the summer months. Later in the fall the central stalks and leaves are of pure snowy whiteness even without earthing up, but stalks should be gathered together and earthen up as in other varieties, so as to produce close attractive bunches. As for succulence, crispness and quality, the White Plume is unequalled. Pkt. 5 cts.; oz. 30 cts.

WHITE PLUME

Golden

Self-Blanching.

GOLDEN-SELF BLANCHING

The best of all self-blanching varieties. It is without doubt the most popular celery grown. The ribs are perfectly solid, crisp, brittle, and of a delicious flavor surpassed by no other variety, while it has the decided merit of being self-blanching to a remarkable degree. It is extensively grown both for market and private use, not only on account of its easy culture, but for its superior quality. The hearts are large and solid, and blanched to a beautiful golden yellow. When grown in moist soil the stalks are numerous and large in size. **Strictly French Grown Seed. Pkt. 10 cts.; oz. 65 cts.**

Winter Queen.

The most popular of all Celeries for winter. It grows very stout, thick and heavy, with a much larger heart than any other variety. It is a close, compact grower, branches to a beautiful creamy white and is showy and attractive in appearance when ready for table use. The stalks are solid, crisp and of a rich nutty flavor. It bunches up handsomely and presents an attractive appearance on the market. **Pkt. 5 cts.; oz. 20 cts.**

Giant Pascal.

One of the most popular sorts for winter use. It grows about two feet high; the stalks are thick, solid and stringless, and almost as brittle as glass. It is of strong growth, producing large perfectly blanched stalks when hilled up properly.

Blanched very easily. A fine keeper and an excellent shipper, retaining color and fresh appearance as long as any other. **Pkt. 5 cts.; oz. 20 cts.**

WINTER QUEEN

Unequaled for rich nutty flavor. For mid-winter and early spring use

CELERIAC, or Turnip Rooted Celery.

This is an excellent vegetable. It produces large turnip-shaped roots which keep well for winter use. It is highly esteemed either cooked in the same manner as other vegetables, for flavoring soups, or sliced and used as a salad. See cut at bottom of page. **Pkt. 5 cts.; oz. 15 cts.**

CRESS. Fine Curled.

An annual making a good salad. Leaves are finely cut and feathery, like a good parsley. It is dwarf and compact in growth. Very ornamental; of quick growth, crisp and refreshing. **Pkt. 5 cts.; oz. 10 cts.**

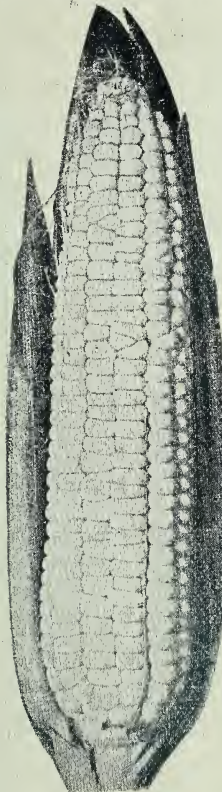

Sweet Corn.

We offer Fairfield Grown Stock which for **QUALITY** is unsurpassed. Our packets each contain one and one-half ounces of seed.

Early Fordhook.

One of the earliest varieties of Sweet Corn in cultivation. The ears are large, averaging from 6 to 8 inches in length. Ears are eight-rowed, with quite small cobs and deep grains. The seed is of exceptional hardness, admitting of early planting. The stalks are of sturdy vigorous growth, three to four feet high, with abundant foliage, and generally produce two fine ears to a stalk.

Both grains and cob are of a pure white color. **Pkt. 5 cts.; 1 pt. 15 cts.; pt. 25 cts.; qt. 40 cts.**

EARLY FORDHOOK

Golden Bantam Sweet Corn.

This is without any exceptions the **SWEETEST AND MOST TENDER SWEET CORN ON THE MARKET.** It is not only extra early, but also very hardy. Although the grain in its young and tender state is sweet beyond comparison, the dry seed is quite solid permitting of the earliest planting. The stalks grow from three to four feet high and produce one to two good ears on each stalk. The ears are from five to seven inches long. The color of the grains is a bright golden yellow. In flavor it is exceptionally rich and sugary. In quality and productiveness it leads all varieties.

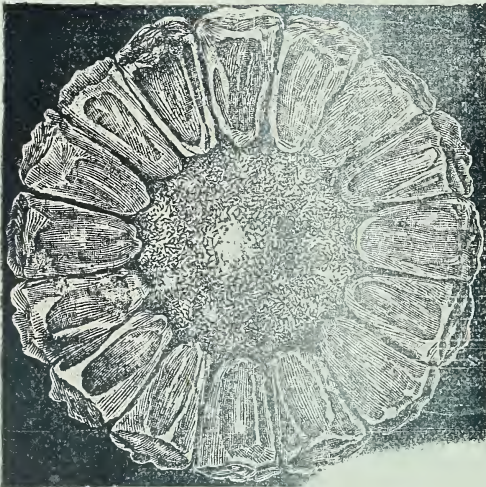

Pkt. 5 cts.; 1-2 pt. 15 cts.; pt. 25 cts.; qt. 40 cts.; postpaid.

Premo Sweet Corn.

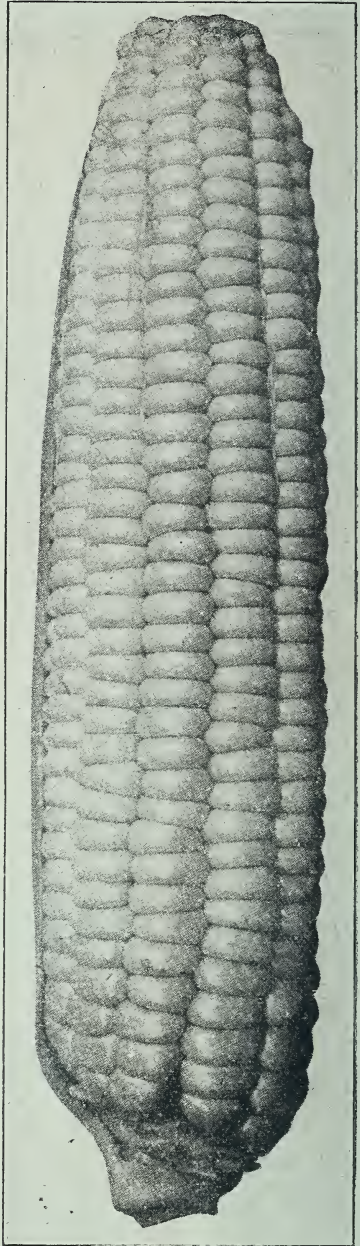

A LEADING EARLY VARIETY. It combines all the merits of the best early varieties, but is superior to them all in size, yield and quality. Premo is very hardy and may be planted sooner than other varieties.

The stalks grow about five feet high and are very vigorous, generally bearing two well developed ears to each stalk. Its earliness and table quality is sure to bring it into favor with all gardeners. Pkt. 5 cts.; 1 pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

P-R-M-O

WHITE EVERGREEN

GOLDEN BANTAM

White Evergreen.

THE LEADING LATE VARIETY. THE MOST VALUABLE SWEET CORN EVER INTRODUCED.

White Evergreen is much superior to Stowell's. It retains all the most desirable features, with the added merits of pure whiteness in color, a more tender grain, and distinctly sweeter flavor. The stalks are strong growers, from six to seven feet high, and sometimes bear three fine ears to a stalk. The ears average very large and are well filled to the tips with the long sweet grains, of pure whiteness and most delicious flavor. The ears contain sixteen or more rows of deep grains, which are protected by a thick heavy husk. Pkt. 5 cts.; 1 pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

Howling Mob Sweet Corn.

The largest-eared, sweetest-flavored, early variety in cultivation. It is of exceptional hardness and productiveness. The stalks are strong and vigorous, four to five feet high, and generally produce two fine ears to each stalk. The ears are seven to nine inches in length, with fourteen or more rows of medium-sized pearly white grains. The grains are sweet and rich in flavor. The ears are protected by a thick heavy husk which extends beyond the tip of the ear and forms a safeguard against the destructive green worms. Pkt. 5 cts.; 1/2 qt. 15 cts.; pt. 25 cts.; qt. 40 cts., postpaid.

POP CORN.

White Rice.

This variety is the best for popping: pops full and white; ears large sized, very handsome; productive; quality excellent; very crisp and delicious. Pkt. 5 cts.; qt. 20 cts.; pt. 35 cts.

Kohl Rabi.

White Vienna.

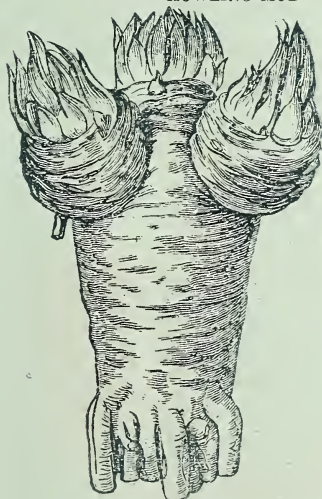

This vegetable is grown for its turnip-shaped bulb, which is formed above ground.

Excellent for soups or cooked in the same manner as turnips. The bulbs should be used while young and tender. The best for table use. Pkt. 5 cts.; oz. 15 cts.

Purple Vienna.

Grows to large size and of juicy quality. Very early, of fine shape and delicate flavor. Pkt. 5 cts.; oz. 15 cts.

HOWLING MOB

HORSE RADISH

HORSE RADISH. Maliner Kren.

A new, very quick-growing, large-rooted variety. Cuttings set out in April will yield large bottoms in October.

Its flavor is the best, this is very noticeable in the fall when the old variety would be too old and juicy to use. Roots are as white as chalk. It is as easily grown as potatoes and should be grown in every garden. Per dozen, 25 cts., postpaid. Ready for shipping about April.

THE EARLIEST

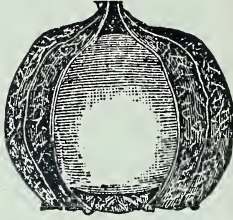

**JUNG'S SEEDS ARE TESTED
AND ARE SURE TO GROW.**

Egg Plant. Black Beauty.

The earliest and best of all large-fruited Egg Plants. It is an extra early variety with fruits of a beautiful jet black color. The fruits set freely and develop quickly so that the crop can be gathered before there is any danger from frost. It is of dwarf growth and bears its fruit, which weighs from one to three pounds each, close to the stem. The calyx is entirely free from spines and thorns. The intensely brilliant coloring is uniform over the whole fruit. The plants usually bear eight to ten immense fruits before being killed by frost.

Pkt. 10 cts.; oz. 40 cts.

GROUND CHERRY

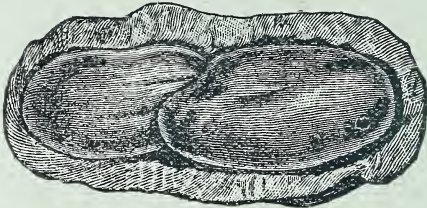

The introducer says: "It is very good for canning, preserving and pies. Dried in sugar as raisins or figs, they are excellent; handsome yellow color and will keep until January. Produces fruit of strawberry flavor in great abundance, from 1 to 2 inches in diameter; highly prized." Per pkt. 5c.; 3 pkts 10c.

A splendid novelty, very striking in color and a most wonderful yield; of bright orange colored fruits about the size of an orange. Vines grow some what smaller than muskmelon. For

sweet pickles and preserving they are splendid. Per pkt. 5c.; 3 pkts. 10c., postpaid.

Extra Early Spanish Peanut.

This splendid variety is very desirable because so early and prolific. It grows perfectly erect. Planted in April they ripen in August, and if planted as late as July will mature a crop before frost. It is in every particular a very satisfactory variety to grow. Produces very few imperfect nuts. Can be grown in the North. Pkt. 5 cents; pint 20 cents; quart 35 cents. By express, quart 25 cents.

Rhubarb, or Pie Plant. Victoria.

A splendid variety, stalks very large and tender.

For best results roots should be planted three feet apart each way.

Ready about April 1.

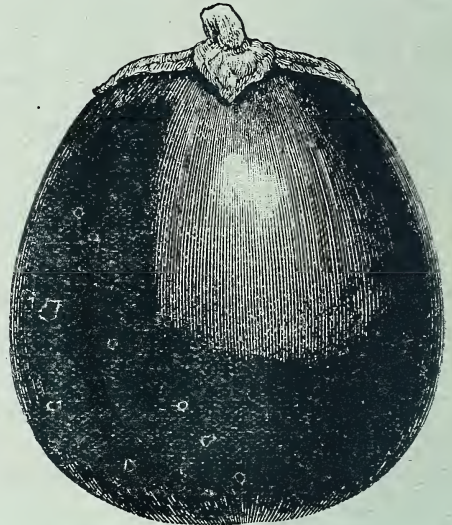

Price, 20 cts., each; 3 for 50 cts., by mail postpaid.

LEEK.

LONG MEZIERES.

Most highly esteemed for flavoring soups, stews, etc.

The plants are of strong, vigorous growth, and have extra long stems which blanch to a snowy whiteness and are of delicious flavor. Cultivate the same as for Onions. Pkt. 5 cts.; oz. 15 cts.

BLACK BEAUTY EGG PLANT.

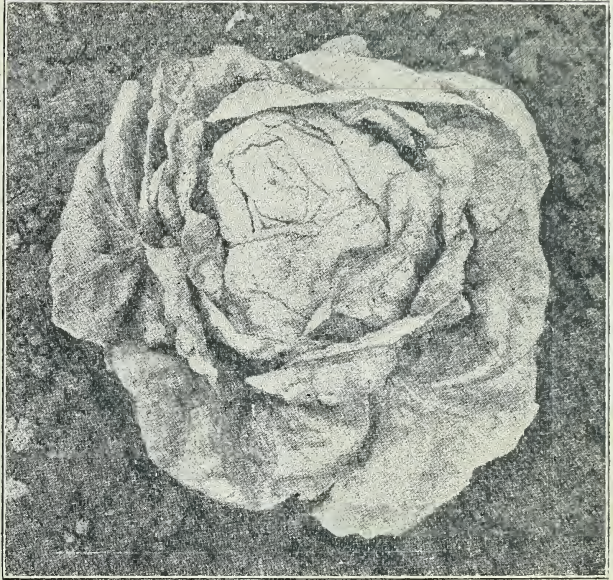

VICTORIA RHUBARB

Lettuce.

You should grow Lettuce largely for your table! Nothing is more wholesome, and if you once acquire the habit you will wonder how you ever enjoyed a dinner without this delightful salad. Our stock is extra fine. Our packets each contain 1-4 ounce of seed.

Naumberger.

This new variety is sure to become famous for its remarkable certainty to produce a fine solid head of good size. It is also extra early, being one of the first to head; the heads will stand longer without rotting or bolting to seed than any other variety. The quality is all that can be desired, being tender, buttery and of very mild flavor. Most highly recommended. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

WAYAHEAD

Earliest Wayahead.

This is the quickest growing and most attractive extreme-early Lettuce, producing handsome, solid heads fully one week earlier than Black Seeded Tennis Ball. Its earliness makes it the ideal variety for market gardeners, as the early heads always bring the best price. Its quality is unsurpassed; the heads are very solid; specimen heads have weighed six ounces when trimmed. The interior of the heads is blanched to a beautiful creamy color; while the leaves are tender, juicy and sweet-flavored. The quality of this variety is unequalled among the early sorts. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

NAUMBERGER

Jung's All Cream.

This remarkable Lettuce does not head, but makes a loose bunch of leaves of superlative fine quality.

The leaves grow upright, the upper part of the outer leaves turning upward very gracefully, and are handsomely wrinkled.

The inside leaves are almost white and wonderfully crisp and tender. It grows very quickly, is ready to use early, and remains for weeks. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

Grand Rapids.

A well known forcing variety. It does not form heads, but makes large bunches of light green leaves with fringed edges.

Its upright habit of growth permits close planting. It will make a quick growth under adverse conditions and is not subject to rot. Quality excellent. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

JUNG'S ALL CREAM

California Cream Butter.

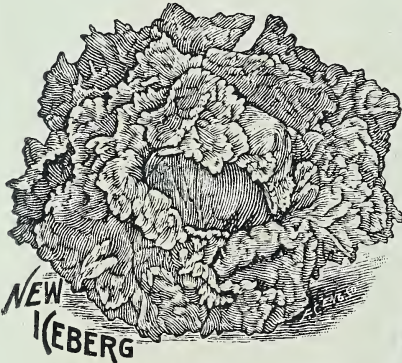

A Grand, Good Butter Lettuce for summer use. The heads are of good size, round and solid. The outside leaves are medium green, while those within are of a rich cream yellow. Rich and buttery in taste. It produces large solid heads even in hot weather. Easy to grow and a good shipping variety. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

All Heart.

An exceptionally hardy variety producing medium sized heads quite early. The heads are from five to six inches in diameter, very solid, and the inner leaves blanched to a rich creamy white. The large heads are exceedingly crisp and tender and of fine quality. A very desirable variety for hot-bed culture in winter and for withstanding heat in summer. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

Deacon. This magnificent lettuce stands hot weather better than any other of the rich butter varieties. Plants make firm heads, nearly as large and almost as solid as a cabbage. The heads are light green outside, while the inner blanched portion is cream-yellow and of delicious rich buttery flavor. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts., postpaid.

May King. This variety is not in the least affected by cold or wet weather, but produces large solid heads, 10 to 14 days ahead of most other varieties. The plants grow from 6 to 7 inches in diameter, with the outer leaves folded closely, forming the plant into a solid head. The outer leaves are light green, slightly tinged with brown; the inner leaves are light yellow and of a fine, rich, buttery flavor. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

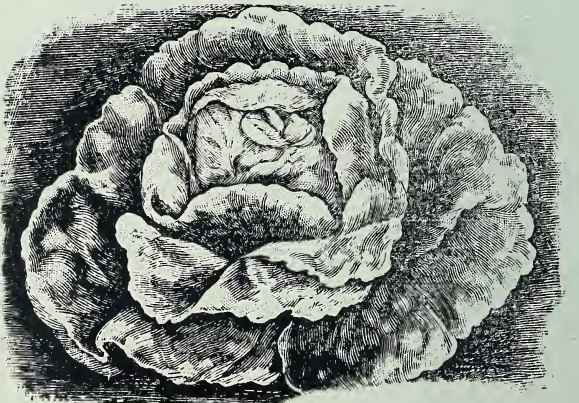

New Iceberg.

The unusual solidity of the heads is assured by the large white main ribs of the leaves, each of which, curving strongly into the center, acts like a truss, making it impossible for the leaves to open outward and expose the center, which is always thoroughly blanched. It is quick growing and always crisp and tender whether propagated in early spring or in the hot days of summer. The heads are of good size. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

MAY KING

Musk Melons.

Our packets each contain
1-4 ounce of seed.

New Model.

**SPICY GREEN FLESH.
SMALL SEED CAVITY.
A PRODIGIOUS BEARER.**

The Model is an early cantaloupe, about twice the size of Rocky Ford, and more productive. It is almost round, the flesh is thick and firm, green-colored, while in delicacy and flavor it is unexcelled. The flesh extends from the rind almost to the center of the melon. The Model bears transportation well, and can be carried to distant cities without injury. The average weight per melon is over two pounds.

No one who wants good melons for either home or market use should fail to plant this variety.

Pkt. 5 cts.; oz. 15 cts.; 1/4 lb. 40 cts., postpaid.

Extra Early Hackensack.

This is a selection of the popular Hackensack, but ripens fully ten days earlier. A beautiful yielder and one of the most extensively grown of all musk melons. It is a large, round variety, flattened at the ends, well ribbed and deeply netted. The flesh is green, inclining towards yellow at the center, and of the most delicious flavor. Fruits attain a good size. The vines make good strong growth and bear abundantly. It is also considered as a splendid shipping melon.

Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 30 cts., postpaid.

NEW FORDHOOK.

The finest flavored and sweetest Musk Melon in cultivation. Fully equal to Emerald Gem in delicious flavor.

So firm is the rough-netted skin, and so solid the thick salmon flesh that the melons carry to market even better than Emerald Gem.

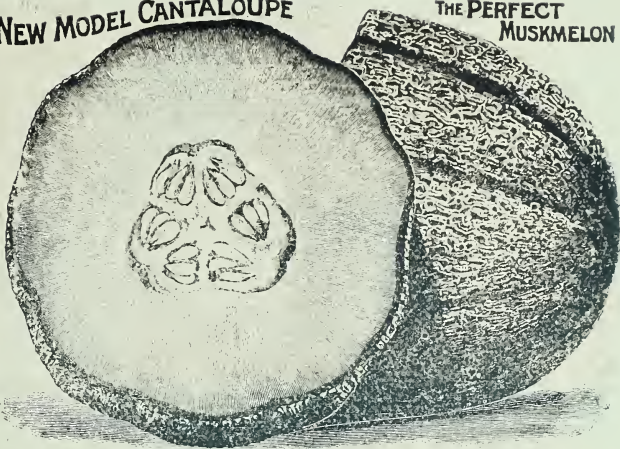

The flesh is very thick, of an attractive salmon color and surpassingly sweet to the very rind. The rind, although thin, is unusually firm, so that the fruits carry well to market.

It is most vigorous in growth, very early and extremely prolific. Each vine sets from 7 to 9 melons immediately around the stem; frequently the fruits touch one another.

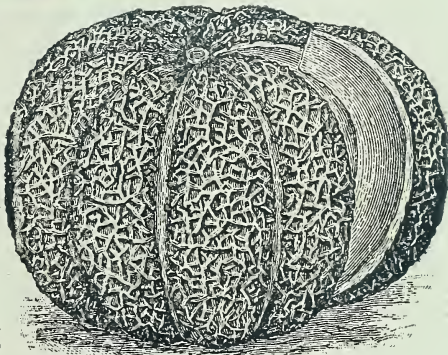

The melons are remarkably even in size, weighing from 1 to 2 pounds each. Be sure to give New Fordhook a trial.

Pkt. 10 cts.; oz. 15 cts.; 1-4 lb. 35 cts.

21
NEW MODEL CANTALOUPE

THE PERFECT
MUSKMELON

EXTRA EARLY HACKENSACK

NEW FORDHOOK

Netted Gem, or "Rocky Ford" Musk Melon.

ONE OF THE MOST POPULAR GREEN FLESHED MUSK MELONS. In the hands of Rocky Ford growers it has made Colorado famous in Eastern markets for melons of **UNEQUALLED QUALITY.** The vines are exceedingly healthy and vigorous, bearing an enormous quantity of fruits during the entire season.

The color of the skin is a rich greenish gold; the netting is prominent and light in color; appearance very attractive. The flesh is deep, ripening clear to the rind, very solid, yet thoroughly melting, and it has an exceedingly small seed cavity. It is very sweet and luscious in flavor. No melon comes to market that sells as readily and at such high prices as the Rocky Ford, often to the exclusion of other varieties. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

ROCKY FORD

Burrell's Gem.

A popular salmon fleshed melon. The melons are 6 to 7 inches long by 4 to 5 inches in diameter, rather sharply sloping at the ends. They are quite well ribbed and covered with a fine grayish netting.

The flesh is thick and firm, ripening close to the skin, leaving only a thin rind.

The skin is a rich dark green, contrasting finely with the deep orange-salmon colored flesh, which is very sweet and tender. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

Paul Rose.

This variety combines all the good qualities of Netted Gem and Osage, the varieties from which it originated; possessing the sweetness of the latter and the finely netted appearance of the Gem. The fruits are nearly round or slightly oval and of a light green color when fully ripe. The flesh is thick, of a rich orange color, and ripens close to the rind. Its firm flesh makes it an ideal shipper. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

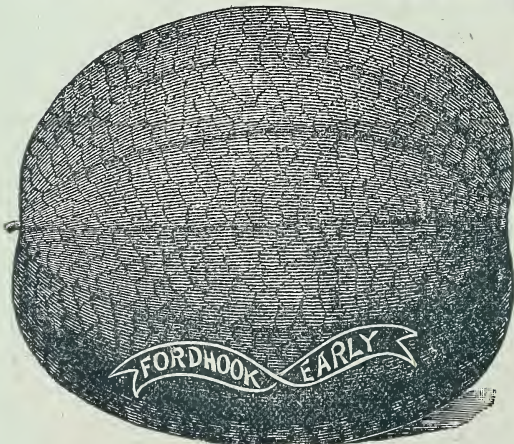

Water Melons.

Our packets each contain 1-4 ounce of seed.

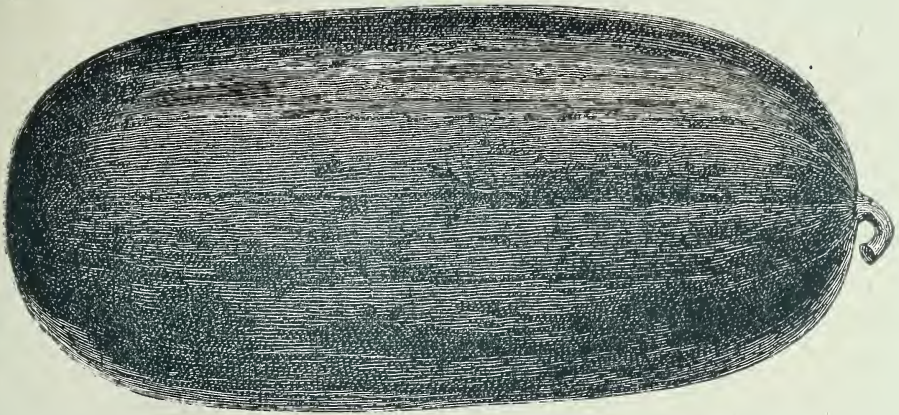

Fordhook Early.

This is the only extra early water melon we have that is of good size and quality. From seed planted May 10 LARGE RIPE MELONS WERE PICKED THE LAST DAYS OF JULY.

The fruits are of large size, rather short and blocky in form, with large diameters. Flesh bright red, crisp, sweet and of splendid quality. The quality continues to improve after ripening. The heart is large, there is little or no seed cavity, and very few seeds—all solid flesh, the quality of which is sustained clear to the rind. The vines are of strong vigorous growth setting large melons in good numbers. Skin dark green, occasionally with faint stripes of a light green. A good shipper. Pkt 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts., postpaid.

**Poor Seed Invariably Causes Loss And Disappointment.
Plant Jung Quality Seeds And You Will Have RESULTS.**

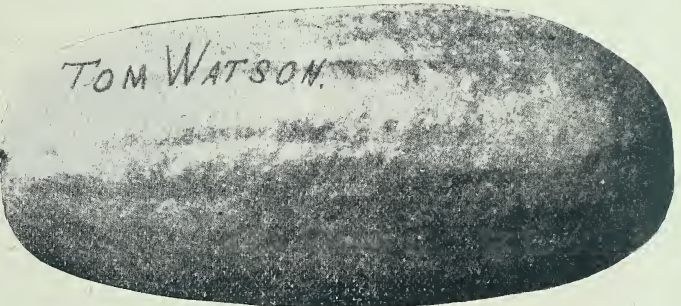

HALBERT HONEY

Halbert Honey Water Melon.

The very finest melon in cultivation for home use or nearby market. A melon that has no equal in beauty, quality, and productiveness.

The fruits are smooth and regular in outline, 14 to 18 inches long, and 6 to 8 inches in diameter. Color of the rind is a clear, glossy, deep green. The flesh is a beautiful crimson, extending to within less than half an inch of the rind, which like the rind is so tender that it will not stand shipping a long distance unless carefully handled. The first melons ripen early and the vines continue to develop fine fruits throughout the season. The sweet flesh melts away in the mouth like honey. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.

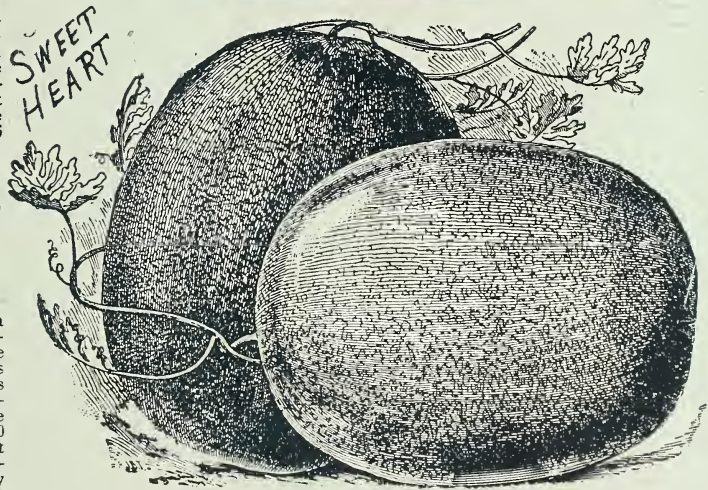

Tom Watson.

**BEST QUALITY.
BEST APPEARANCE.
BEST SHAPE.
BEST SHIPPER.
BEST SIZE.**

The Tom Watson is an extra large melon of attractive appearance, uniform in shape and quality.

The luscious crimson flesh is "sweet as honey," melting, and of superb flavor. The average melon weighs from 35 to 40 pounds and measures about 20 inches in length and 12 inches in diameter. It is very prolific, producing in greatest abundance the delicious fruits. The dark green rind is large with no sign of core.

The heart is tough but thin and easily withstands shipment to far distant markets. The heart seeds are brown tipped with white. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.

Sweet Heart.

slightly richer shade.

The solid flesh is a deep rich red, crisp and melting; its excellent quality has made it a leading favorite on the market. The vines are vigorous and productive, ripening the fruits quite early. A good keeper, a good shipper and a good selling melon, being attractive and of good quality.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 60 cts., postpaid.

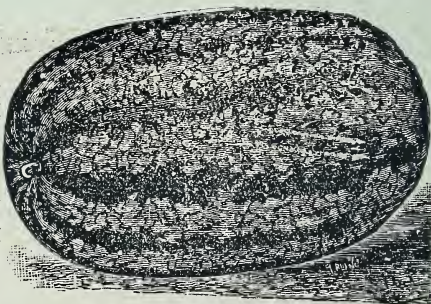

Dixie Water Melon.

A water melon of highest quality and value. The size is large, specimens of 50 pounds being not infrequent. Flesh is s a'let, very fine and extra firm. This variety is the most prolific known, often producing six to eight melons on a single vine. The vines root at the joints, and thus become more drought resisting and vigorous. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 c.

Dark Icing.

A nearly round white seeded water melon with very thin rind. The flesh is deep pink and of delicious sweetness.

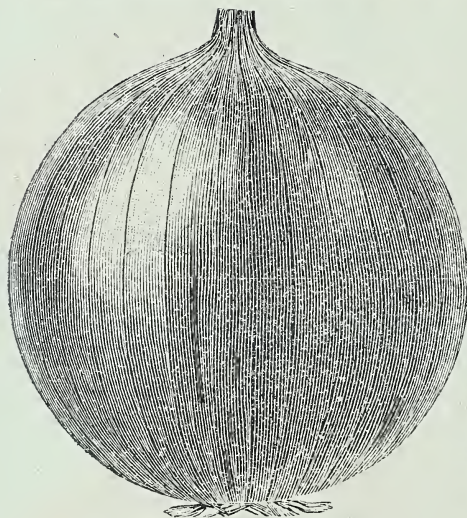

Fruits large, very dark skinned and of attractive appearance. The vine is a remarkably strong grower and a heavy bearer. It is an excellent shipper notwithstanding its thin rind. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.

DIXIE

Onions.

We make a specialty of "HIGH GRADE" Onion seed. It is better to plant no Onions at all than to sow seed of poor quality. Our seed is grown from the finest selected bulbs and is of strong vitality.

YELLOW GLOBE DANVERS

Our packets of Onions contain sufficient seed to sow about 50 feet of drill.

Yellow Globe Danvers.

This is a standard yellow onion and is more largely grown than almost any other variety. The bulbs grow to about two and one-half inches in diameter, are nearly globe shaped, and of a light golden brown color. The flesh is pure white. The bulb is extremely hard and solid, and its earliness, sure cropping character, handsome appearance and excellent quality, have placed **YELLOW GLOBE DANVERS** among the leading varieties for the home or market garden. It forms a bulb very early in the season, so that it may be used almost all summer, and ripens up crisp and solid in the fall. It is a very heavy cropper. Our strain of this variety is **UNSURPASSED**. Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 45 cts.; lb. \$1.40.

Large Red

Wethertfield.

The most popular red variety. It is very productive having yielded over one thousand bushels per acre. It is not an early ripening sort, but continues in growth throughout the season and consequently makes a very large onion. The bulbs are large though somewhat flattened as shown in the illustration.

The outer skin is a deep purplish red; flesh white slightly tinged with rose. It is a fine keeper; suitable for late winter markets.

The flavor is good and mild, admirable for boiling. The best variety for poor or dry soils.

You will make no mistake by giving this variety a trial. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50., postpaid.

LARGE RED WETHERSFIELD

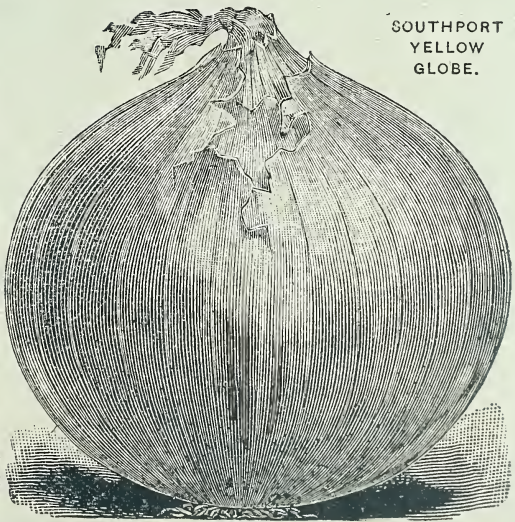

Do not fail to try **JUNG'S FAIRFIELD GIANT CUCUMBER**. It is described and illustrated on page 13.

SOUTHPORT RED GLOBE

Southport Yellow Globe.

This is one of the most satisfactory and popular varieties raised for family use or for market. It is an enormous yielder, hardy and reliable making, under normal conditions, often up to 1,000 bushels per acre. The onions are models of perfection, growing uniformly deep and globular in shape, veritable globes of gold, and are extra large, averaging nine to ten inches in circumference. The color of the skin is an attractive golden-yellow; the flesh snow-white, firm, mild and juicy. The small necks enable the onions to ripen down evenly; insuring good keeping qualities. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.60., postpaid.

SOUTHPORT
YELLOW
GLOBE.

Southport White Globe.

THE MOST BEAUTIFUL ONION GROWN, BEING OF SYMMETRICAL GLOBE SHAPE WITH A SMOOTH SATIN-LIKE SKIN, FORMING A PERFECT SILVER BALL.

It grows to a large size, averaging seven to nine inches in circumference and is solid and heavy; the flesh is purest white, close grained, mild and of delicate flavor. Owing to its large size it is later in ripening than the White Portugal or Silverskin. As soon as ripe the bulbs should be stored in a cool dark shed or dry cellar. It is a heavy cropper. For the family garden as well as for market it is a valuable onion. Pkt. 10 cts.; oz. 20 cts.; 1-4 lb. 60 c.

Three True

Globe Onions.

THE SOUTHPORT GLOBE ONIONS HAVE INCREASED WONDERFULLY IN PUBLIC FAVOR DURING THE LAST FEW YEARS, AND THEY WELL DESERVE THEIR POPULARITY. In almost all markets they invariably bring top prices. They are not only of handsome appearance, remarkable solidity, and good keepers, but also fully equal in yield to the **BEST STRAINS OF ANY VARIETIES.**

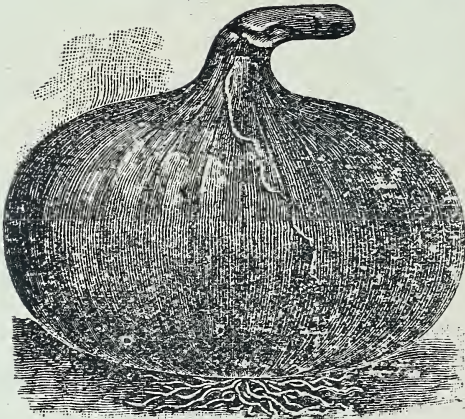

Southport

Red Globe.

A handsome onion of immense size, averaging from nine to ten inches in circumference, solid, heavy, and of perfect globe shape. The skin is a glossy deep purplish-red color. The flesh is close-grained, sparkling white, cooking tender and mild. It is hardy, a splendid keeper, and a big yielder, averaging, under good culture, from 800 to 1,000 bushels per acre.

Our strain of this seed is unsurpassed, the bulbs being selected for largest size, solidity, brilliant rich color, and typical globe shape, with small necks, thus insuring thorough and regular ripening and curing. You will make no mistake in giving this onion a trial. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.60., postpaid.

We Deliver Free all seed quoted in this catalog by the packet, ounce, quarter-pound, pound, half-pint, pint and quart. On seeds in larger quantities purchasers must pay the Freight or Express charges.

AUSTRALIAN BROWN Australian Brown.

This remarkable onion is of medium size, wonderfully hard and solid and most attractive for market, both in form and appearance. They are extremely early in ripening and make no stiffnecks or scallions. Every seed seems to produce a good sized onion, and the bulb begins to form very quickly, when the plant is not over three inches high. It has the reputation of keeping indefinitely, and we think from its firmness and hardness that it will keep in good condition longer than any other onion known. The color of the skin is a clear amber brown. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.40. postpaid.

Prizetaker.

THE KING OF ALL YELLOW GLOBE ONIONS.

This is one of the largest onions in cultivation. It is the large beautiful Spanish variety so often seen in the fruit stores and markets of all large cities.

Bulbs are nearly globe shaped, with bright straw colored skin, growing to an immense size the first season from seed. The flesh is pure white, fine grained, delicious and mild in flavor; fine for fall and early winter use.

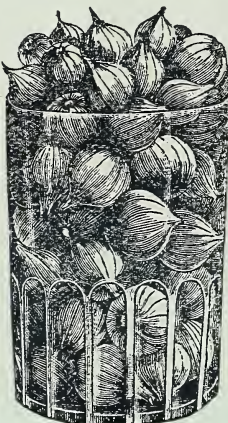

Bulbs measure from twelve to fourteen inches in circumference and under special cultivation specimens have been raised weighing five pounds each. In the markets they attract special attention and sell readily at good prices. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.40.

Silverskin.

A leading white Flat Onion. The bulbs attain a good size, ripen evenly; the color is a beautiful silvery-white when cured. Its shape is flat but symmetrical. For a white variety it is not only early but also a good keeper. For slicing and boiling it is one of the best, the flesh being mild and tender. It is largely grown for pickling, being sown three or four times as thick as usual, and is also extensively sown for sets.

For the family garden it is one of the best.

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 50 cts.; lb. \$1.80.

ONION SETS.

ONION SETS.

The planting of Onion Sets is increasing rapidly year after year. By planting sets you can have onions ready for use several weeks earlier than can be had from seed.

WHITE BOTTOM SETS. These are small, solid, and of a beautiful silvery-white color. A favorite variety in private and market gardens.

Pint, 15 cts.; qt. 25 cts., postpaid.

YELLOW BOTTOM SETS. Produced from seed which makes the finest yellow sets. Fine and dry, medium in size and unsprouted. Pint, 10 cts.; quart, 20 cts., postpaid.

RED BOTTOM SETS. These are planted to produce both early green and late eating onions.

Pint, 10 cts.; quart, 20 cts., postpaid.

Write for special prices if wanted in larger quantities

OKRA.

WHITE VELVET. The long, tender pods of okra are very delicious when sliced and cooked in soups.

While this is its chief use it is also boiled and served like other vegetables. The pods should be gathered while young, as they are then very tender. Pkt 5 cts.; oz. 10 cts.

MUSTARD MUSTARD.

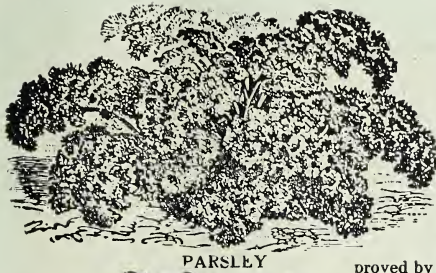

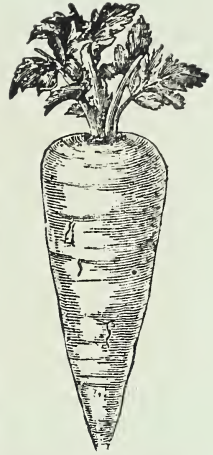

GIGANTIC THICK LEAVED. Each plant produces a great number of large thick leaves which are of the finest flavor. Grown in rich soil the leaves attain a length of two feet. It is excellent for boiling.

Pkt. 5 cts.; oz. 10 cts.

See top of next column for colors and prices of Onion Sets.

Improved Half-Long.

This variety is an improvement on the old Hollow Crown, forming roots shorter and thicker than that variety and is also more easily gathered. The flesh is white, of fine texture, free from core and stringiness, and of the finest flavor when cooked. This parsnip is one of the heaviest croppers and we recommend it both for garden and field culture. Its quality is improved by freezing. Pkt. 5 cts.; oz. 10 cts.; 1 lb. 20 cts.; 1b. 65 cts.

PARSLEY

proved by freezing. Pkt. 5 cts.; oz. 10 cts.; 1 lb. 20 cts.; 1b. 65 cts.

PARSLEY.

MOSS CURLED. The leaves are of an extra dark green color. It is very productive, and on account of the densely curled character of its leaves a large quantity can be gathered in a short time. It is much used for flavoring and garnishing. Pkt. 5 cts.; oz. 10 c.

IMPROVED HALF-LONG

Choice Garden Peas.

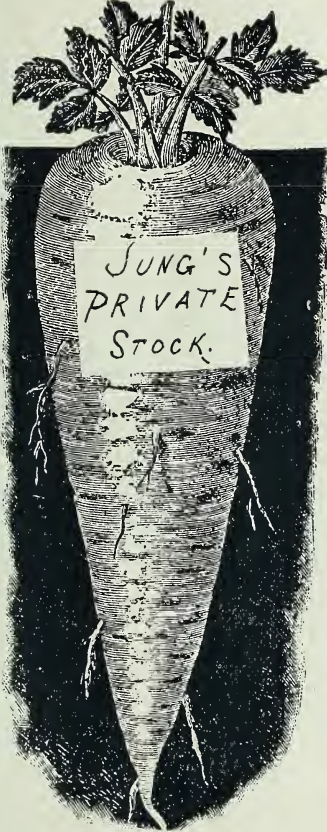

OUR PEAS ARE NORTHERN GROWN AND ARE FREE FROM BUGS. They are the earliest, hardiest and most productive. They were grown from the finest selected stock, are bright, handsome, of perfect growth, were critically rogued and carefully hand-picked. Pkt. contains 2 ounces.

A NEW EXTRA EARLY DWARF PEA.

Little Marvel. The vines are of dwarf even growth, average fifteen inches in height and are heavily set with fine pods, frequently borne in pairs. The pods average about three inches in length, are square at the bottom and well filled with six to seven quite large, deep green peas. The peas are ready for the table fully as early as American Wonder or Nott's Excelsior, while the pods are larger and the vines produce a much heavier crop. The peas retain their attractive dark green color and superb flavor when served at the table. All who desire a fine early crop of the choicest quality of wrinkled peas will be delighted with Little Marvel. Pkt. 10 cts.; 1-2 pt. 20 cts.; pt. 30 cts.; qt. 50 cts.

LITTLE MARVEL

Parsnip.

One packet will sow about 50 feet of drill.

Jung's Private Stock.

This is a highly improved type of the Half-Long, producing uniformly large and handsome roots of stocky form, heavy at the shoulder, well rounded, gradually tapering to the base, so that they are easily dug, and if grown in properly pulverized soil the roots will be smooth and free from side roots and wrinkles. The flesh is white, of fine texture, free from core and stringiness, and especially fine flavored, cooking tender, sweet and rich. The roots may remain in the ground all winter, being hardy, or some may be dug in the fall and stored in sand or soil for winter use. Frost improves their quality. It is a heavy cropper. The shape is well shown in the illustration. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts.; 1b. 80 cts.

Early Excelsior.

The leader of the early dwarf wrinkled Peas. It grows to a height of about twelve inches; of compact growth being similar to Nott's Excelsior in this respect but superior to it in the following particulars; first, the vines are more dense and sturdy; second, the peas and pods are decidedly larger, measuring from three and one-half to four inches in length and contain from six to eight large peas of delicious quality; it is a much surer cropper. It is also very early, the past three seasons it was ready for use in forty-five days after sowing. **ONE OF THE MOST VALUABLE EARLY PEAS SURPASSING IN EARLINESS, YIELD AND QUALITY.**

Pkt. 5 cts.; 1-2 pt. 15 cts.; pt. 25 cts.; qt. 45 cts.

EARLY EXCELSIOR

HARBINGER

Harbinger.

An extra early dwarf pea of English origin which rarely grows over eight inches high and is immensely productive. It is quite distinct from all other varieties in habit of growth and appearance; the vines being unusually robust and stocky. The vines are literally covered with pods which are well filled with peas of delicious quality.

The even regular habit of the plants is a great advantage particularly to market growers. Pkt. 5 cts.; ½ pt. 15 cts.; pt. 25 cts.; qt. 45 cts.

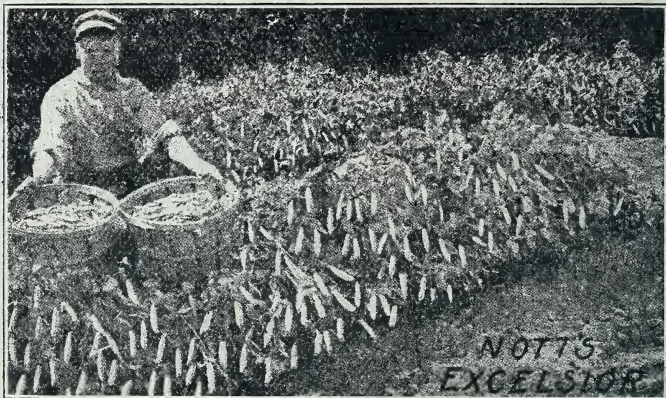

Nott's Excelsior.

The sweetest and most prolific of all Early Dwarf Peas. A very fine variety of dwarf compact growth, with pods three inches in length, which are well filled to the squared ends with large peas of unusually sweet flavor.

It is of vigorous growth and wonderfully productive. It grows from twelve to fourteen inches high.

In favorable weather and soil it will mature in the remarkable short period of forty five days.

The best sort for the home or market garden. Pkt. 5 cts.; ½ pt. 15 cts.; pt. 25 cts.; qt. 45 cts.

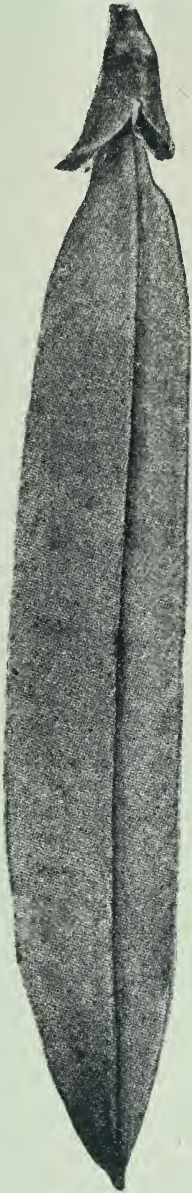

Our Great 25c. BARGAIN COLLECTION.

Here is a **REAL BARGAIN**, one that can't be beat at such a low price. 9 Regular Full-Sized packets for 25 cts., postpaid, as follows:

CARROT, Oxheart
CUCUMBER, Fordhook Famous
LETTUCE, Naumberger
MUSK MELON, Extra Early Hackensack.

ONION, Prizetaker
RADISH, Non Plus Ultra
TOMATO, Earliana
TURNIP, White Flat Dutch.

ARISTOCRAT

Improved Senator.

A SPLENDID MAIN-CROP PEA.

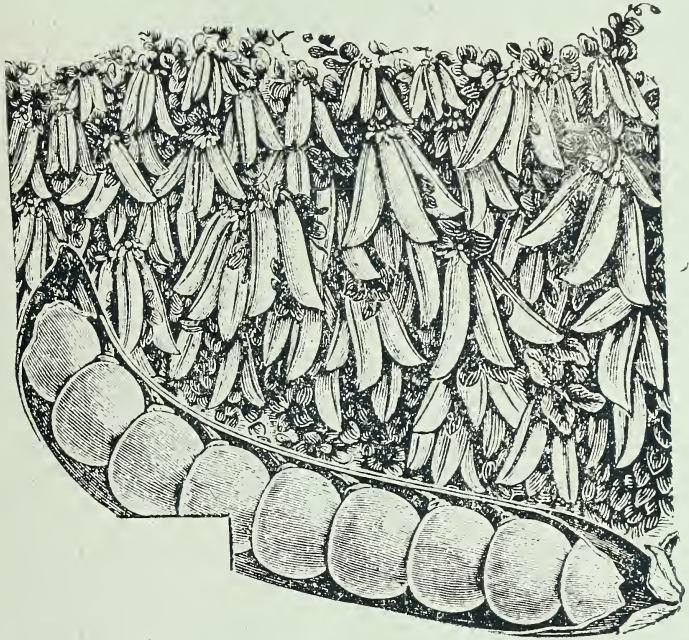

A splendid second-early variety; very productive of large well filled pods.

It is of the same season as McLeans Advancer, but the pods are much larger and the vines much more prolific.

Vines grow about two feet high, are very hardy and carry a large crop.

The pods contain from seven to ten peas which are sweet and tender, even when large. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 45 cts., postpaid.

For description of Aristocrat see page 30.

IMPROVED SENATOR

British Wonder.

THE SWEETEST FLAVORED PEA IN CULTIVATION.

Even sweeter in flavor than either Gradus or Thomas Laxton. The growth is similar to Carter's Daisy, except that the foliage is darker green and pods are not so sharply pointed.

It is, however, much more reliable, and is a **SURER CROPPER.** The vines are very stocky, twelve to eighteen inches high and are well supplied with light green foliage, which indicates great vigor.

The pods are produced in the greatest profusion, measuring about four inches in length, and contain from eight to ten large dark green peas each, which are of a most luscious flavor. It matures a little earlier than Dwarf Telephone, Most highly recommended. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 45 cts., postpaid.

BRITISH WONDER

Jung's Aristocrat.

A MAMMOTH PODDED PEAS.

This grand new Pea is of the large podded type as the Telephone, but the pods are even larger and the peas sweeter in flavor.

The vines are of a rich green color, very stocky in growth, from sixteen to eighteen inches tall, and do not require brushing. The pods are borne in great profusion and mostly in pairs. In size of pods it is an undisputed leader, single pods often measure six inches and over in length. The immense pods are straight and of fine appearance, and contain from eight to twelve large wrinkled peas, closely packed, tender, sweet and of exquisite flavor. Quality is always to be preferred to quantity but in this pea you have both. They keep their tenderness and superb flavor long after they are young, and also retain their attractive dark green color when served. On our Fairfield Farm it was the largest podded variety grown. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 30 cts.; qt. 50 cts.

See cut on page 29.

Dwarf Telephone.

A GIANT PODDED PEAS. This is one of the finest dwarf green wrinkled Marrow Peas in cultivation, and one that ought to be grown in every garden. A strong luxuriant growing variety, attaining a height of about eighteen inches. The pods, which grow five inches long, are packed with immense wrinkled marrow peas, eight to ten being the average, while twelve to fifteen to a pod are frequently found. The quality is superb, rich sugary and meltingly tender.

As high as eighteen large handsome pods have been grown on a single plant. Pkt. 5 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 30 cts.; qt. 50 cts.

DWARF TELEPHONE

Mammoth

Melting Sugar.

An edible podded pea. The vines grow four to five feet high. It is very productive and produces enormous pods which average five to six inches in length and one and a half inches broad; thick and fleshy. When broken and boiled like string-beans and served with butter sauce they have a luscious flavor. It is a delicious vegetable and should be better known and more generally used.

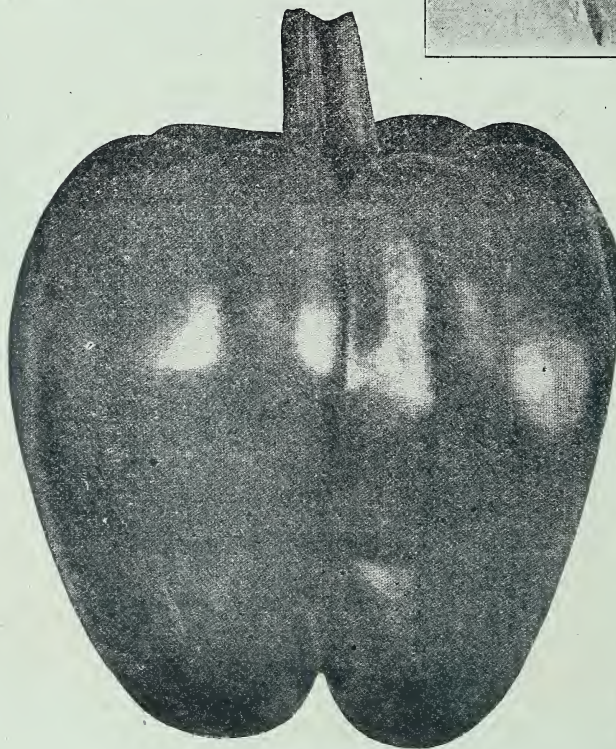

Pkt. 5 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 30 cts.; qt. 50 cts., postpaid.

Pepper.

Our packets of pepper each contain seed enough to produce 350 plants.

Sweet Upright.

The best pepper for the family garden and almost unequaled for market. It produces fine large fruits of nearly square or blocky form, with exceptionally thick flesh of the mildest and sweetest flavor. Plants are of sturdy erect growth. The flesh is as crisp, mild, and sweet as an apple. It ripens early, the fruits are large, weighing from six to seven ounces each. Color is a rich scarlet. Pkt. 10 cts.; $\frac{1}{2}$ oz. 20 cts.; oz. 30 cts.

SWEET UPRIGHT

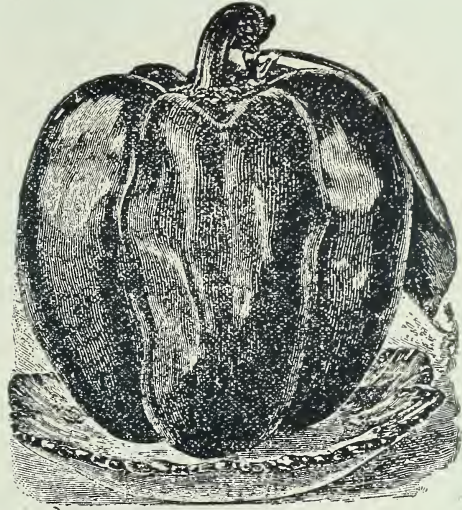

EARLY NEAPOLITAN

fruiting until cut down by frost, at which time they are still heavily loaded with fruits. Fruits average four and a half inches in length by two to two and a half inches in breadth at the stem end, retaining the thickness to a good portion of the length. After reaching full size the green fruits change to a rich scarlet, and have quite thick flesh of a very mild sweet flavor.

Single plants will show from 35 to 50 peppers of marketable size at one time.

Pkt. 5 cts.; $\frac{1}{2}$ oz. 15 cts.; oz. 25 cts.

CHINESE GIANT

Early Neapolitan PEPPER.

THE EARLIEST SWEET LARGE RED PEPPER.

Immensely productive and so extreme early, this grand new pepper is of exceptional value to market gardeners.

The plants are of open-branched spreading growth, two and one-half feet in height when full grown, but begin to form fruits when only a few inches in height. The plants continue in growth and

fruits average four and a half inches in length by two to two and a half inches in breadth at the stem end, retaining the thickness to a good portion of the length. After reaching full size the green fruits change to a rich scarlet, and have quite thick flesh of a very mild sweet flavor.

Single plants will show from 35 to 50 peppers of marketable size at one time.

Pkt. 5 cts.; $\frac{1}{2}$ oz. 15 cts.; oz. 25 cts.

Chinese Giant.

THE FINEST, LARGEST AND HANDSOMEST PEPPER OF THEM ALL. CHINESE GIANT IS CERTAINLY A WONDER.

Not only is it immensely productive for so large a pepper, but its enormous size and magnificent appearance make itself most readily. The plants are vigorous in growth but of stocky habit, seldom more than two feet in height. It produces monstrous peppers of thick blocky form which are of the most brilliant scarlet. They grow four to five inches broad at the top and are of equal length, divided into four or more ridges; when ripe they are indented at the blossom end. Frequently half a dozen peppers touch each other as if on a single bunch. The flesh is thick and very mild, being entirely free from any fiery flavor. They can be sliced and eaten like tomatoes.

Pkt. 10 cts.; $\frac{1}{2}$ oz. 35 cts.; oz. 60 cts.

Golden Queen.

GOLDEN QUEEN IS THE BEST OF ALL YELLOW PEPPERS.

It is always large and sometimes remarkably so, specimens reaching six to ten inches in length and four to five inches in diameter are not uncommon. A single plant sometimes carries TWENTY LARGE PEPPERS AT THE SAME TIME. The flavor is mild and pleasant

and it may be eaten raw. It always commands the highest price on account of its large size and fine appearance. It is unexcelled for stuffing. Pkt. 5 cts.; oz. 30 cts.

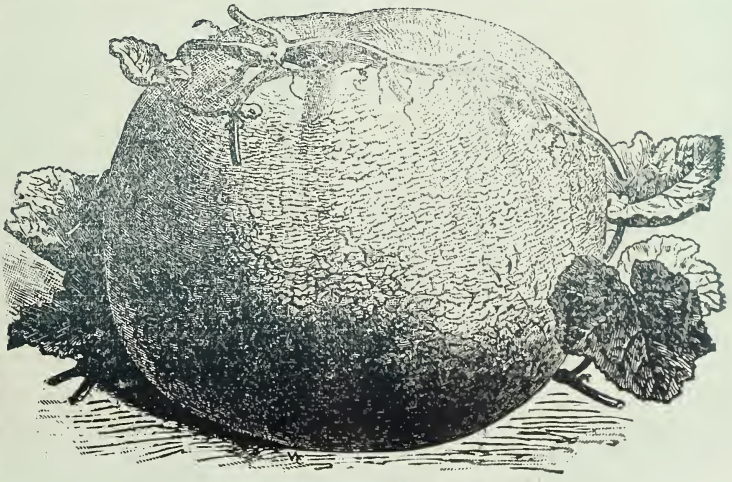

PUMPKINS.

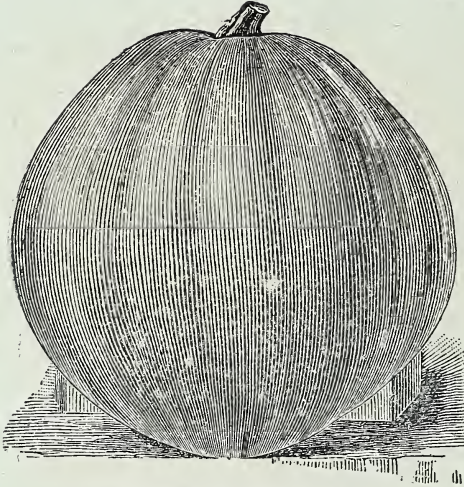

Quaker Pie.

A most prolific variety. The fruits are broad pear shaped or slightly oval in form. The flesh is very thick and fine grained, of a beautiful golden yellow color, and in texture and flavor peculiarly adapted for pie making purposes. It is very prolific and keeps well for winter use. It is sweet and delicate in flavor. Skin is a rich creamy-buff, which gives it a handsome appearance.

Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 20 c.; lb. 70 c.

See cut on page 32.

QUAKER PIE See page 31

True Mammoth PUMPKIN.

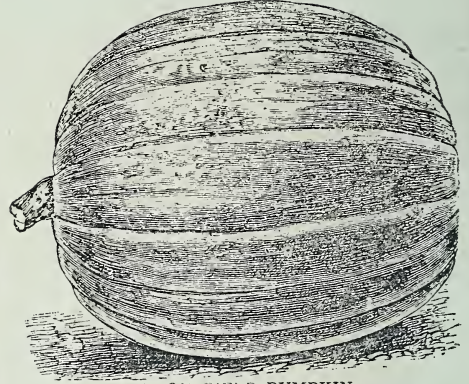

THE LARGEST PUMPKIN IN CULTIVATION.
This is the very best strain of the True Mammoth Pumpkin. Fruits grow to enormous size, specimens have been grown weighing one-hundred pounds and over. The skin is a light yellow russet color, flesh very thick, bright-yellow, fine grained, sweet and tender and of excellent quality for pies. If you wish to see just how large a pumpkin you can raise try this variety.

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. \$1.00.

Big Tom.

Also known as Connecticut Field. Vines are of strong vigorous growth and wonderfully productive. Fruits will average 15 to 20 inches in diameter; round or oval in form. The skin is smooth and hard, of a reddish-orange color, slightly ribbed, with thick, rich orange-yellow flesh. It is the hardest of all pumpkins and is good for pies.

This variety is extensively grown for stock feeding and is generally planted in with the corn. Oz. 5 cts.; $\frac{1}{4}$ lb. 15 cts.; lb. 40 cts., postpaid.

BIG TOM FIELD PUMPKIN

RADISHES.

Our packets each contain enough seed to sow 50 feet of row.

Earliest Scarlet.

A fine bright red radish of quick growth.

It is especially fine for bunching for early market from plantings in the open ground, being ready for market in from 18 to 25 days. It is solid in character, and very uniform in size and shape.

The tops are very small thereby making it the best of all for forcing under glass. The flesh is purest white, firm and crisp in texture and of mild flavor. The roots are entirely free from the hollow centre or pithy fibre so often found in radish. The shape is well shown in the illustration. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 60 cts., postpaid.

French Breakfast.

An early medium sized Radish, olive shaped, very crisp and tender, of a beautiful scarlet color, tipped with white. It grows about two inches long and is decidedly stump-rooted.

A splendid variety for the table, for its excellent quality and beautiful color are unexcelled. It is a quick growing and exceedingly popular variety. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 70 cts.

Rosy Gem.

One of the most popular and attractive short varieties ever grown. Ready for the table in from 17 to 25 days after sowing. It is a rich deep scarlet at the top, beautifully blended into pure white at the bottom. Exceedingly tender and crisp. Flavor very mild and delicious.

A gem in earliness, beauty and quality. Its smooth skin and fine color give it an appetizing appearance when served. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 70 cts.

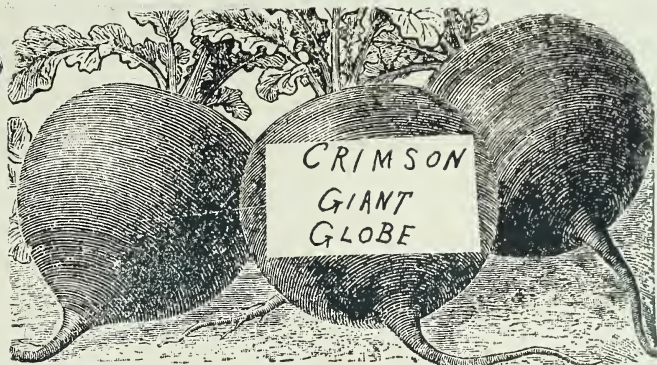

EARLIEST SCARLET

FRENCH BREAKFAST

**HAILSTONE**

and of mild flavor. The foliage is unusually small. Its extreme earliness, handsome appearance, solidity, and superb quality, cannot fail to make it the most popular first early white turnip radish. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 90 cts.

Crimson Giant Globe.

This new variety is suitable for both forcing and growing outdoors.

It is a fine shaped bright-red radish, growing quickly to large size,—see illustration. This radish is a deep globe in shape. It measures two inches in depth and one and one half inches in diameter. Skin is thin and tender and of a deep crimson color. The flesh is pure white, crisp and of mild flavor. The roots are entirely free from hollow centers and pithy fibre. It is sure to become a leading variety. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 90 cts.

Hailstone.

The earliest and quickest growing !White Radish in cultivation—ready for use in from

15 to 18 days after sowing. The radishes are regular turnip-shaped, meas-

uring one inch in diameter and about half an inch in depth. Flesh is solid, crisp and of mild flavor. The foliage is unusually small. Its extreme earliness, handsome appearance, solidity, and superb quality, cannot fail to make it the most popular first early white turnip radish. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 90 cts.

Early Long Scarlet Short Top.

This variety is a standard and excellent sort either for private gardens or for market. The roots grow half above ground, are very uniform in shape, smooth, very bright red in color, and continue crisp and tender until fully matured when they are about six inches long. It matures beautiful radishes, which are always brittle and sweet, 25 to 30 days from the sowing of the seed. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 65 cts.

Non Plus Ultra.

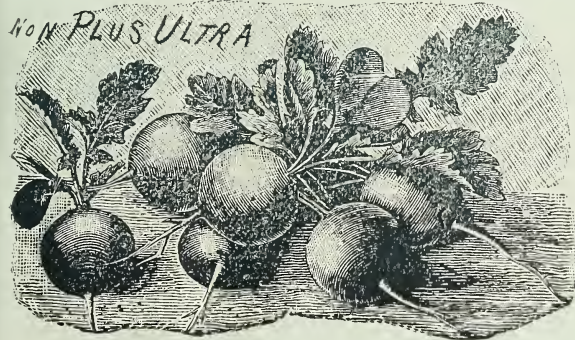

One of the earliest forcing Radishes in cultivation. The roots are round and deep rich scarlet in color. They make a very quick growth, and are ready for use in from 20 to 25 days after sowing. Flesh is white, crisp and tender, and of remarkable fine quality. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 50 cts.

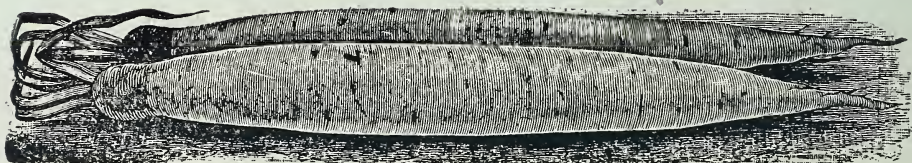

New White Icicle.

A Long, Slender, Mild, Crisp, Tender, Pure White Radish. It is of the best flavor, very brittle and crisp. The root grows about four inches long and are ready for use in about 25 days after sowing. The leaves are short and few, making it an excellent variety for forcing. It produces long, slender, pure white radishes very early in the season much earlier and finer in quality than any other long white variety. See illustration. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts.

WINTER RADISH. Chinese Rose.

This is a large and fine shaped radish, growing partly above the ground. It is of a half long shape with a blunt point; rose-colored skin; flesh white, solid as an apple. It has not the strong flavor of the Black Spanish and keeps equally as well. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 70 cts.

**WHITE ICICLE**

SALSIFY

SALSIFY.

Mammoth Sandwich Island.

One of the most delicious winter vegetables, and also one of the most nutritious; the flavor is sweet and highly esteemed whether served boiled with butter or other suitable sauces, or sliced and fried, or used in soup. This new variety, where known, is entirely superseding the old type, as it produces roots nearly double the size and weight and of equally good quality. Seed sown in spring produces large fine roots that may remain in the ground all winter or may be dug and stored in sand or earth in November, thus keeping them plump and sweet, to be used as desired during the winter. Mild and delicious in flavor. One pkt. will sow fifty feet of row.

Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 35 cts.; lb. \$1.20, postpaid.

SPINACH

Spinach.

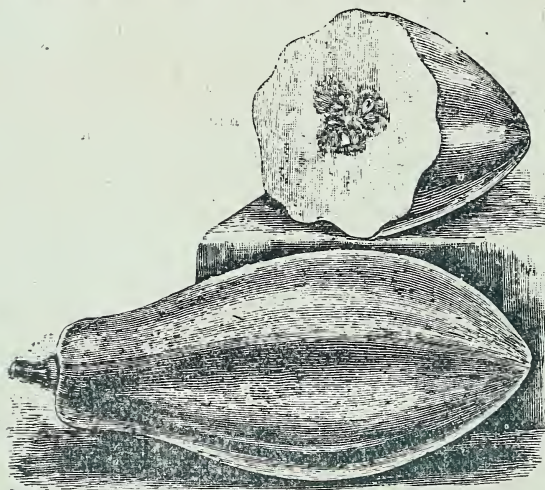

One package of Spinach will sow about 50 feet of row.

Victoria.

This is a handsome variety with exceedingly dark green color and has very long standing qualities. The foliage is heavy, the wide dark green leaves being of the true Savoy appearance and of the finest quality.

It remains in prime condition two to three weeks after most other varieties have run to seed. Highly praised by market gardeners.

Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 15 cts.; lb. 40 cts., postpaid.

BUSH FORDHOOK

Squash.

One package of Squash contains enough seed to plant 10 hills.

Bush Fordhook.

The most desirable squash for either summer or winter use. It is of true bush type and can be grown much closer together than the running sort. The vines are of strong vigorous growth and wonderfully productive. The fruits are pear-shaped, seven to nine inches long, slightly ridged, smooth thin yellow skin. Flesh is very thick and of a light straw-yellow color.

For frying, baking, or making pies they are unsurpassed. Stored in a dry place they will keep until the following spring. It is early and has proven to be one of the hardest and most dependable squash for all localities. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 30 cts.; lb. \$1.00., postpaid.

Golden Hubbard.

AN ELEGANT WINTER SQUASH. Flesh deep golden yellow, much richer in color than Hubbard, fine-grained, cooks very dry and is of excellent flavor. In keeping quality it has no superior. Its productiveness combined with its sweet rich flavor, attractive color and shape, are bound to make it a popular Fall and Winter variety. Golden Hubbard is a sport from the well known old Hubbard, which it closely resembles in every respect except in color, which is a bright golden orange. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts.

GOLDEN
HUBBARD

Giant Summer

Crookneck.

This magnificent strain is equally as early as the common small fruited varieties. It is of a bright yellow color and from eighteen inches to two feet long. Fruits are solid, heavy, and freely produced on healthy vigorous plants of compact bush habit. The flesh has a greenish-yellow color, is dry, and of most agreeable flavor. A most profitable variety to grow for market as it grows very rapidly and is of extra large size. It is very productive and of superior quality. Pkt. 5 cts.: oz. 10 cts.; 1-4 lb. 25 cts.

New Delicious.

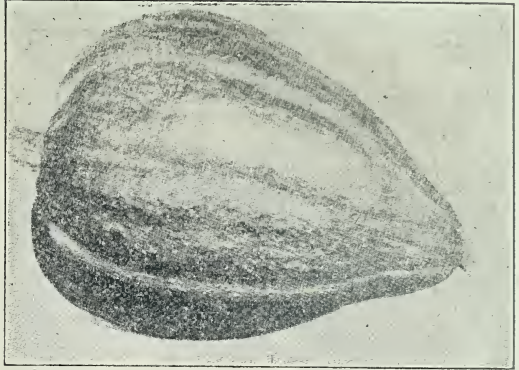

This is one of the best flavored squashes in existence. In thickness of flesh it surpasses nearly every variety. The color is a dark orange. For table use no other variety compares with it in compactness of flesh, dryness, sweetness, and exceeding richness of flavor.

It is a fall and winter squash. The fruits vary in form and color but are uniformly delicious in flavor. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts., postpaid.

Golden Bronze.

Another good winter squash. The fruits are oval in form, thickest at the blossom end; skin dark grayish green; deepening to bronze green when ripened. Flesh thick,

deepest orange-yellow in color, fine grained and exceptionally sweet in flavor. It is early in maturing, a good keeper, and yields a large supply of fruits of uniform size and appearance. Fruits average from eight to ten pounds each. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts.; lb. 75 cts.

NEW DELICIOUS

IMPROVED HUBBARD

Improved Hubbard.

This is the old standard squash, now grown throughout the country. Flesh is deep golden-yellow and fine grained, and whether boiled, steamed or baked, it is always richly flavored, sweet and dry. The vines are strong, of luxuriant growth and very productive, yielding large heavy squashes weighing from 10 to 25 pounds each. The color of the rind varies somewhat, but the color and quality of the flesh is fixed and unchangeable—always a deep golden yellow or orange. If properly stored it will keep until spring. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts.; lb. 80 cts.

EARLIANA

Tomatoes.

Our packets of Tomatoes each contain seed enough to produce 600 plants.

Earliana.

A perfect early Tomato, large in size, and beautiful in color, nearly seedless and very solid, a vigorous grower and prodigious bearer, yielding its splendid fruit until frost. Its solidity and fine quality are equal to the best late sorts. The plants are compact in growth and set fruits freely.

Pkt. 5 cts.; oz. 30 cts.; 1-4 lb. 90 cts.

Jack Rose.

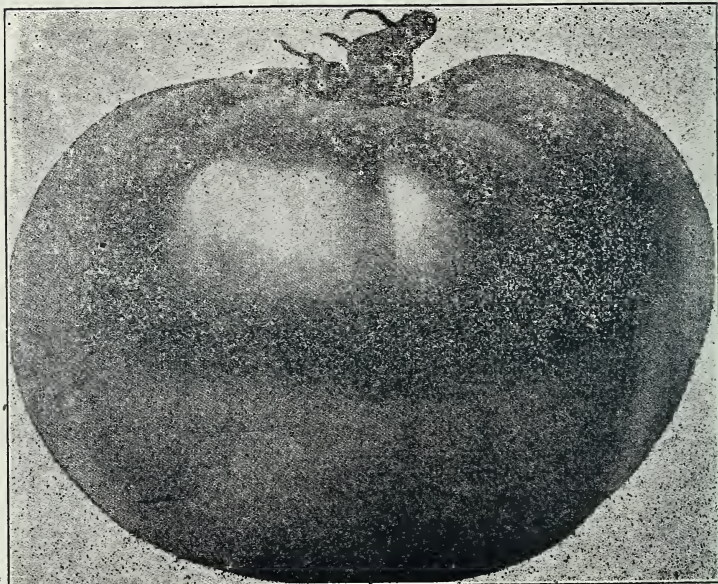

Next to Fairfield First it is the **EARLIEST RED TOMATO IN THE WORLD.**

It is from three to five days earlier than Earliana which means much additional profit when planted for market as every truck grower strives to have the earliest tomatoes.

The vines are vigorous growers and are well supplied with the heavy foliage which protects the fruits from the sun. The fruits are smooth, solid, and of good size sometimes measuring four inches in diameter. It is almost all solid meat, producing but a very small quantity of seed. The later fruit on the vines is just as large and solid as the first.

If you want an abundant supply of large, solid, fine flavored, rich-colored, meaty tomatoes do not fail to order **JACK ROSE.**

Pkt. 10 cts.; oz. 40 cts.
1-4 lb. \$1.00.

JACK ROSE

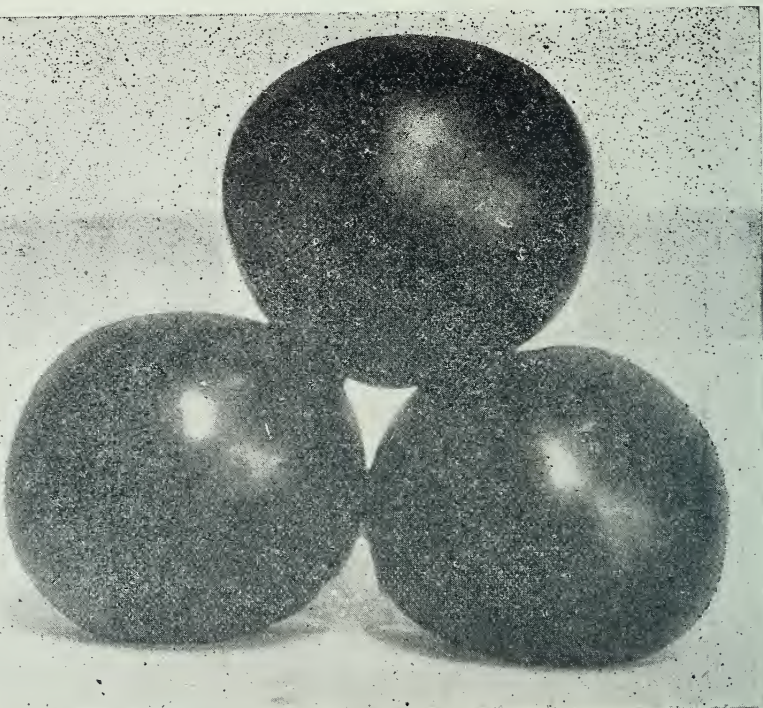

New Coreless.

A LARGE MAIN-CROP, GLOBE-SHAPED, BRIGHT RED VARIETY. Its shape is almost round, being about the same diameter each way.

The depression at the stem end has been almost eliminated, making it the most profitable variety for canning.

It is immensely productive, clusters of four to seven fruit are produced at six to eight inches apart on the stem. All the fruits are of marketable size, and many of them are very large—12 to 15 ounces each. It is a good slicing variety, the seed cells being surrounded by bright red, heavy, meaty and delicious flesh. Its color is bright red and the fruits ripen all over and all at the same time. Always free from green core.

The strong outside and inner walls of flesh render it a firm fruit and one of the best for long distance hauling or shipping. Every gardener should give this new tomato a trial. Pkt. 10 cts.; oz. 35 cts.; 1 lb. \$0.90.

SPECIAL OFFER.

One pkt. of each of the above grand new Tomatoes for 15 cts.

NEW CORELESS

**Do not risk your garden by planting untested seed.
Plant JUNG'S TESTED SEED for Best Results.**

MAGNIFICENT

Magnificent. A TRULY MAGNIFICENT RED MAIN-CROP TOMATO. IT HAS BEEN TRIED IN VARIOUS CLIMATES AND DIFFERENT SOILS AND ALWAYS CAME OUT SUCCESSFULLY. It is different from all other tomatoes in the following particulars--First, the plants root well from the very beginning of their growth. Second, as the result of this strong growth of root there is a large and vigorous growth of stalk to support the weight of the fruit. Third, as the result of this strong stalk the spreading branches produce a great abundance

of fruit from each plant. Fourth, the fruits are large, solid and smooth, easily prepared for market on account of its perfection. Fifth, the plants are hardy, can be set out early and not be injured by cold if protected from frost. Sixth, the fruits ripen early and the later fruit on the vines is just as large and perfect as the first. Color is bright red; skin always smooth, free from cracks and blemishes. Flesh is of exceptional fine flavor.

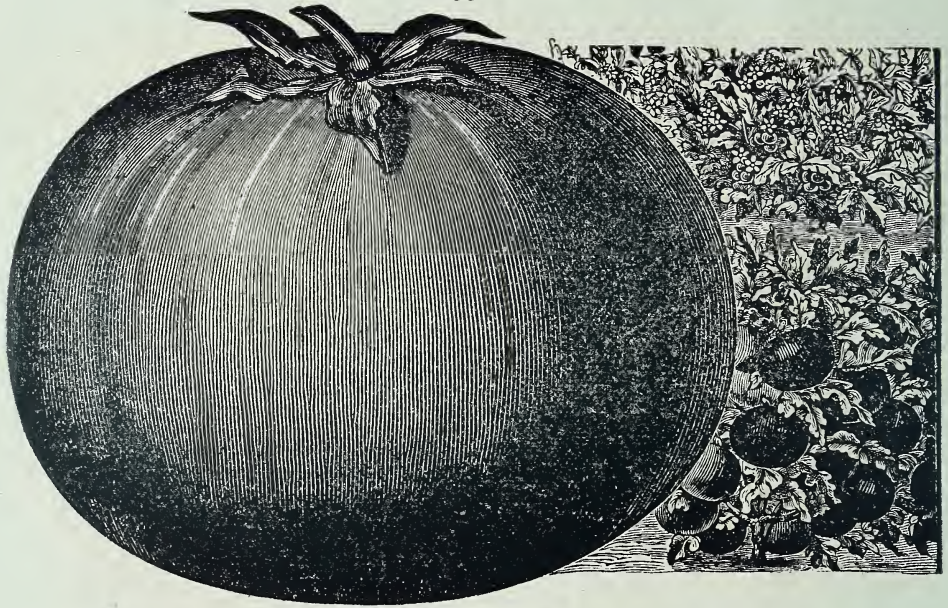

Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. \$1.00.

Golden Dwarf Champion.

The famous Golden Dwarf Champion owes its wide popularity to its stiff, vigorous, upright growth, with fruit well above the soil, its large fruit and beautiful color, and to the earliness with which it reaches maturity. Plants are bushy and compact, with heavy dark-green, potato-leaf foliage. The tomatoes are always smooth, round and solid, and of a beautiful lemon color.

Each plant produces a large number of fruits. Nothing makes a more tempting dish than red and yellow tomatoes sliced together. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 80 cts.

JUNG'S PRIZETAKER

A Grand New Tree Tomato. JUNG'S PRIZETAKER.

EARLY. EXTRA LARGE FRUITS. ENORMOUS YIELDER. BRIGHT RED.

The best variety for the home garden. It is the largest fruited dwarf or tree tomato. The plants grow to a height of about two feet and are stiffly erect until they become OVERLOADED WITH FRUIT. The fruit is produced in clusters of three to five, and as the growth is close-jointed each plant produces a large number. The tomatoes are of large size, and are very smooth and solid. Fruits have a solid meaty center and no hard core and produce but very little seed. We consider PRIZETAKER invaluable for the home garden, market garden, or for shipping purposes. Pkt. 10 cts.; oz. 40 cts.; 1-4 lb. \$1.00.

Truckers Favorite.

THE FINEST LARGE-FRUITED PURPLE TOMATO.
Very uniform in size and shape, thick-meated and solid;

one of the largest tomatoes grown. The fruits are of a beautiful purplish-red or pink color, always smooth and fleshy. They hold their size to the very last picking and ripen well to the stem. Vines are of strong vigorous growth, ripening the first fruits early. The vines are not subject to blight or rust, and produce enormous crops until killed by frost. Delightful in quality and flavor and unexcelled for slicing or cooking. As a dependable main-crop pink tomato Truckers Favorite can't be beat.

Pkt. 5 cts.; oz. 30 cts.
1-4 lb. 80 cts.

Matchless.

A FINE LARGE FRUITED RED TOMATO. The vines are strong growers, and produce immense crops of large smooth juicy fruits. The fruits are truly immense in size, specimens having been grown measuring five inches in diameter, and the large size of the fruit is maintained during the whole season; they are free from core, of a rich cardinal-red color and free from cracks and blemishes. The flesh is very solid, the ripe fruits will keep for a long time. Pkt. 5 cts.; oz. 25 cts.; 1-4 lb. 80 cts.

TRUCKERS FAVORITE

Turnips.

Our packets each contain one-fourth ounce of seed.

Purple Top

Strap Leaf.

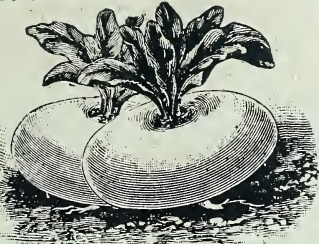

STRAP LEAF

cast or in drills, and will form good sized bulbs in seven or eight weeks.

Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 20 cts.; lb. 50 cts.

White Flat Dutch.

market. The roots are of medium size, very handsome, smooth and of clear ivory white both inside and out.

WHITE FLAT DUTCH

feeding. It is of fine quality and keeps perfectly all winter, and even into the following summer. Bulbs are large, smooth, round and solid, with a small tap-root. Flesh richly colored, fine-grained and very sweet. It is justly held in high esteem for both table and stock feeding purposes.

Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 20 cts.; lb. 50 cts., postpaid.

The most popular sort. A general favorite with all, and more largely grown than any other turnip. Rather flat and of medium size. The color is purple above ground, white below; flesh white, fine grained and tender. Leaves short, narrow and erect.

A heavy cropper and an excellent keeper. Do s well sown either broad-

A very popular sort for either table use or for market. The roots are of medium size, very handsome, smooth and of clear ivory white both inside and out. The flesh is fine-grained, tender, and of mild sweet flavor. It is one of the best varieties for the family garden, as, in addition to the heavy crop assured by its adaptability to close plant-

ing, it will be found to be the best sort for spring use.

Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 20 cts.; lb. 50 cts., postpaid.

IMPROVED
PURPLE-TOP
YELLOW.

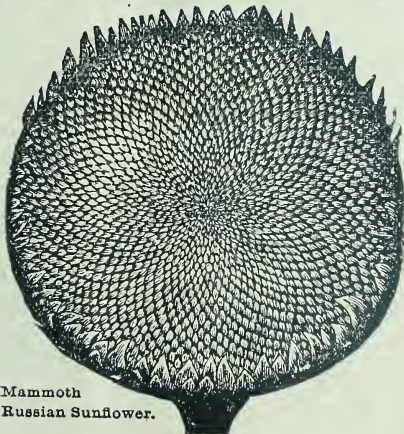

RUTA BAGA. Improved Purple Top Yellow.

Lawn Grass.

Fairfield Special Mixed.

Our mixture combines the very best varieties of grasses suited for the purpose of making a lawn beautiful in appearance, durable and lasting, and which will stand the frosts of winter, and the hot sun of summer, showing a deep rich green at all seasons.

The seed used is PURE and HEAVY and is especially cleaned. This mixture weighs 25 to 27 pounds per bushel, is of strong vitality and makes a quick healthy growth. One pound of our mixture weighs as much as two quarts of most other seedsmen's brands. Pound, 35 cts., postpaid. Not prepaid, lb. 25 cts.; 5 lbs. \$1.20.

Mammoth
Russian Sunflower.

SUNFLOWER.

Mammoth Russian.

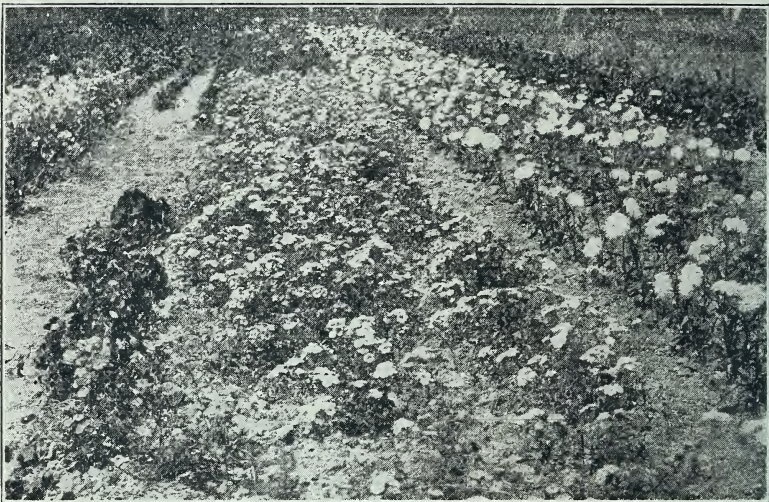

Single heads measure twelve to twenty-two inches in diameter and contain an immense quantity of seed, which is highly valued by all farmers and poultry breeders who have tried it as an excellent and cheap food for fowls. They eat it greedily, fatten well on it, and attain a bright lustrous plumage and strong healthy condition better than on almost any other food. It is the best egg-producing food known. Every farmer should plant some of the seed in the middle of July. Four quarts of seed will plant an acre. The seed is also recommended as an excellent food for horses. Oz. 5 cts.; ¼ lb. 20 cts.; lb. 30 cts., postpaid. By freight or express: lb. 15 cts.; 10 lbs. \$1.00; 100 lbs. \$6.00.

Jung's Unrivaled Flower Seeds.

The same great care and selection governing the growing of our Garden and Farm Seeds is exercised in the growing of our Flower Seeds. If our customers could only see the glorious beds of Asters, Salvias, Phlox, Sweet Peas and other flowers growing on the Fairfield Farm they would grow more flowers. There are no more satisfactory flowers in the garden than those grown from

seed, especially the easily grown and brilliant flowering annuals.

The beautiful shrubs and lilacs, of course, have their place, but are far more expensive than a package of seed which will furnish a large number of plants with usually enough for one's garden and some to spare. While the old-fashioned flowers are still popular, new and improved varieties have been developed, with larger and finer blossoms.

FLOWERS GROWING FOR SEED AT FAIRFIELD SEED FARM

Jung's Superb Asters.

Asters are our great Specialty in the flower seed line and the degree of perfection to which we have brought the strains we are offering is unsurpassed. We are the largest growers of **ASTER SEED** in the **NORTHWEST**. No other flower can approach the Aster in beauty, color, form, or profusion of bloom. They are very hardy, easily grown, and may be had in bloom from early summer until hard frosts. We are **ASTER SPECIALISTS** and our seed of these grand flowers is absolutely unexcelled.

Jung's New Aster "FAIRFIELD."

We take pleasure in offering our customers this new Aster, which is in a class by itself. The flowers of this grand variety are immense, single flowers measure six inches across; and being borne on long stiff stems they rival Chrysanthemums for bouquets.

A bed of these Asters looks like a snowdrift. The petals are very long and are curled and twisted to a remarkable degree. Bushes are strong and healthy. **White and Shell-Pink.** Each 10 cts. Per pkt.

JUNG'S FAIRFIELD ASTER

CREGO ASTER

Jung's American Beauty.

The petals of this grand new Aster are almost a half inch wide.

It is almost identical in color to the popular American Beauty Rose, hence its name. The plants are strong growers, from 35 to 40 inches tall, well supplied with heavy foliage, and is a prolific bloomer. The immense fluffy flowers are borne on stems from twelve to eighteen inches long. Specimen plants carried from eight to twelve blossoms, each measuring over four inches across. Pkt. 10 cts.

JUNG'S AMERICAN BEAUTY

Crego Aster.

A new variety. The plants are vigorous and productive of from ten to fifteen strong flower stems, frequently two feet or more in length. The flowers are large and full with the crowns well covered. The petals are of medium width but very long, and curl across each other so fluffily as to enhance the beauty and attractiveness of the flower, and increase its value as a long keeping and good shipping variety. **White and Shell-Pink.** Each 10 cts per pkt. Two pkts. for 15 cts.

Violet King.

This is a popular variety, vigorous in growth with long stiff stems, and luxuriant foliage of richest green. In form the flower is entirely distinct; petals resemble the quilled varieties, but are much larger and broader, those in the center being twisted, curled, and incurved completely covering the crown. The bloom is round, full, and very large, many of the flowers measuring from four to five inches across. Color is a soft violet-lilac. Pkt. 10 c.

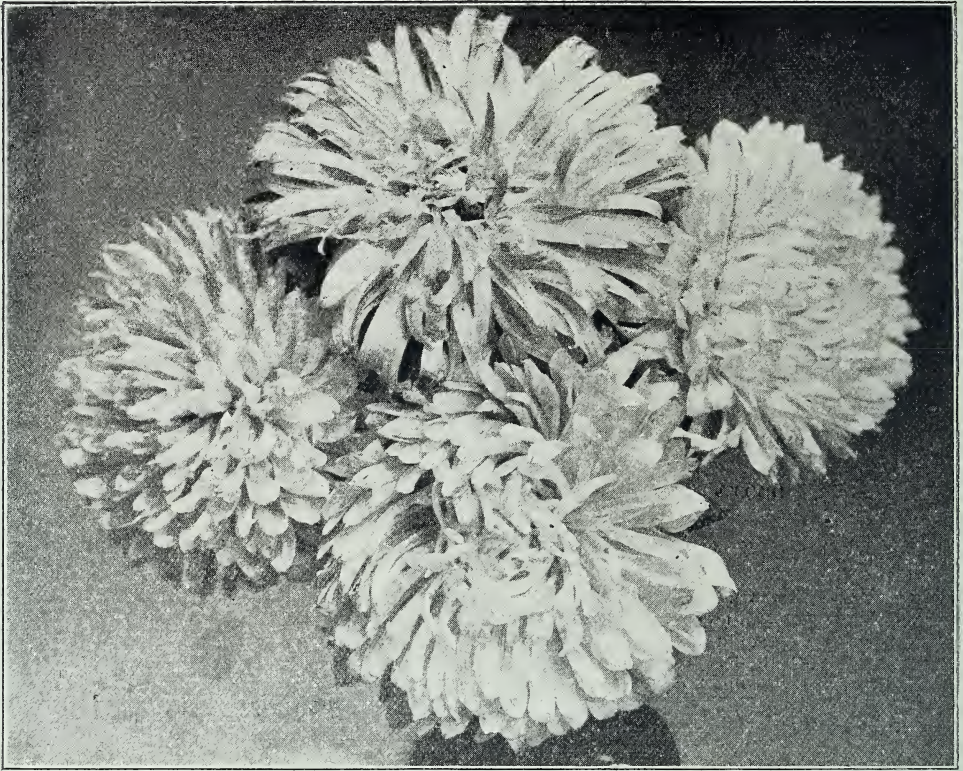

Rose King.

The same as Violet King except in color. It is vigorous in growth, with stems frequently two feet in length, flowers as large as saucers, crowns completely covered, a good keeping variety and unsurpassed for cutting.

Petals are strong and stiff. Blooms from mid-summer until frost. Pkt. 10 cts.

VIOLET KING

INVINCIBLE

MIKADO SHELL-PINK
CHRYSANTHEMUM FLOWERED

SUPERB LATE BRANCHING

Superb Late Branching Asters.

perfection where it is unexcelled. The plants form strong stocky bushes about two feet in height, bearing on long stiff stems their handsome flowers, which measure from four to five inches across. The petals are gracefully curved towards the center and do not have an exposed yellow center. Plants are of strong vigorous growth and yield a profusion of flowers from the middle of August until heavy frosts. This variety is unexcelled for bedding or bouquets. **White, Shell-Pink, Rose-Pink, Purple.** Each 10 cts. per pkt. One pkt. each color 20 cts. Mixed colors 5 cts.

Invincible.

The plants are of very healthy, robust, branching growth, about two feet high, producing, on long stems, massive, Peony-formed flowers of perfect form and faultless outline, and exceedingly double to the very center. The flowers are the most beautifully formed of all large Asters. The petals are of thick durable substance, and in consequence the flowers last long in perfection. These Asters are wonderfully prolific and continuous bloomers from summer until checked by frost. When well grown the flowers measure from three and one-half to four inches across. **White, Pink, Shell-Pink and Purple.** Each 10 cts. per pkt. One pkt. each color 20 cts. Mixed colors 5 cts.

Mikado Shell-Pink.

Petals are narrow, very long and gracefully reflexed. The outer petals show to their full extent, while gradually towards the center they bend and curl across each other in such magnificent disorder as to make the fullest Aster we have ever seen. In color it is the most exquisite shade of pink. In growth it is unusually vigorous. The average plant carries a dozen long, strong, graceful stems, each crowned with flowers from four to six inches in diameter. Blooms from the end of July until frost. Pkt. 10 cts.

Chrysanthemum Flowered Aster.

This grand new Aster is in a class by itself, being formed altogether differently, and being formed altogether differently, hence their name. The flowers are truly gigantic in size, and closely resemble Chrysanthemums, hence their name. Well grown flowers measure five inches across and are borne on long stems making them invaluable for cut flowers and bouquets. Petals are long and twisted. The color is a very delicate sea-shell pink. The plants are of strong growth and carry many blossoms. Pkt. 10 cts.

Giant Comet Asters.

This is undoubtedly the finest strain of Chrysanthemum Flowered Asters. The plants attain a height of about twenty inches and bear their large graceful flowers on stems from fifteen to eighteen inches long. The flowers are from four to five inches across, while the long petals are curled and twisted, forming perfect half-globes. The blooming season is most opportune, coming between the Extra Early and the Late Branching sorts, thus enabling the Aster growers to have a fine display from mid-summer until frost. **White, Shell-Pink, Rose-Pink and Purple.** Each 10 cts. per pkt. One pkt. each color for 20 cts. Mixed colors 5 cts.

JUNG'S INTERNATIONAL MIXED ASTERS

Jung's Innocence Aster.

The earliest Aster in cultivation today. It is a few days earlier than Queen of the Earlies, while for beauty of flower it equals the later sorts. Instead of running to leaves the entire energy of the plant seems given to the production of 8 or ten giant fluffy flowers. The plants are of sturdy, branching habit, 15 to 18 inches tall, and bear their handsome, snow-white flowers on long stems, making it invaluable for bouquets. The flowers measure three to four inches across, which, with their long recurved petals give them a graceful appearance. Pkt. 10 cts.

Jung's Early Upright Aster.

The plants grow compactly, with long, erect flower stems, quite free from side shoots, and yield from eight to twelve large flowers. The blooms of this variety are considerably above the average in size, and have a solid, compact, ball-shaped appearance. The crowns, or centers, are completely covered. Petals are of medium length, quite broad and of good substance. They start to bloom early and continue until well into the season.

White and Lavender-Pink, Each 10 cts. per pkt. One pkt. each color 15 cts.

Jung's International Mixed Asters.

The finest mixture of ASTERS ever offered by any seedsmen. This superb mixture is composed of the very best varieties and contains practically every shade known in Asters, such as, pure white, white changing to rose, shell-pink, rose-pink, red, carmine, violet, crimson and purple. It includes New Fairfield, American Beauty, Vick's Mikado, Violet and Rose King, Chrysanthemum Flowered, Innocence, Invincible, Late Branching and many other varieties. It is truly an unsurpassed mixture of these the most showy and beautiful of all annuals. Pkt. of 200 seeds only 10 cts.

COSMOS.

Early Summer Flowering.

Grace and brilliancy are the characteristics of this pretty annual.

The beautiful flowers with their deep broad petals rise from a cloud of fine feathery foliage. By starting the seed of this variety early they will commence to blossom in June and continue to bloom until cut down by frost. They are of compact bushy growth, about four feet high, with flowers fully as large as the old variety. The flowers are of various shades, ranging pure white to purplish crimson. Both foliage and flowers are unsurpassed for bouquets and vases. They are easily raised and make a grand display. It is admired by all.

Pkt. 5 cts.

COSMOS

DIANTHUS.

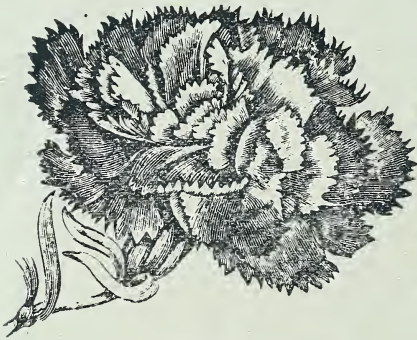

Fairfield

Finest Mixed.

These hardy annuals may be ranked among the fairest gems of our flowers, as few can equal them in beauty or profusion of blooms. They are of the richest and most varied colors. The plants spread rapidly, and make ornamental masses of growth.

They may be sown in the open ground when danger from frost is over, and in a few weeks they are masses of bloom, continuing so until frost. Our mixture includes the best single and double sorts.

Pkt. 5 cts.

FIREBALL

DIANTHUS. Fireball.

Flowers are double crimson and their beauty is scarcely surpassed by any other flower. Plants grow dwarf and bushy. It is fine for bouquets and cut flowers. Pkt. 5 cts.

DIANTHUS

DAISY.

GERMAN DOUBLE MIXED. These famous little double daisies are held in universal esteem.

They bloom profusely especially in cool weather. They are easily grown from spring sown seed and come into bloom in a short time. They do best in a cool shady place. Height six inches. Pkt. 5 cts.

BALSAM.**Defiance****Mixed.**

A favorite quick growing annual. The plants form symmetrical, well-branched, erect bushes about two feet high. The branches are well covered with the beautiful double flowers. The colors include white, rose, red, scarlet, crimson, purple, lilac and violet. Although such generous bloomers, they are shy seeders.

This variety is distinctly Camellia-flowered.

Our strain of these is unsurpassed for size of blooms, doubleness and beauty of flower.

Pkt. 5 cts.

BALSAM

CANDYTUFT

CANDYTUFT. Empress.

Candytufts have long been among the most popular bedding annuals. This is the largest flowered, pure white variety in cultivation. Strong, free growers, from six to eight inches high, producing large trusses of flowers on candelabra formed branches. Excellent for bedding and ribbon borders, remaining in bloom throughout the summer.

Pkt. 5 cts.

Kochia Tricophylla.

A GRAND HEDGE PLANT. An annual hedge plant which has become very popular. It makes a beautiful specimen plant or grown in hedge form it is equally attractive. It grows about three feet tall, forming a perfect pyramidal-shaped cypress bush, with fine feathery light green foliage. About the beginning of September it changes to a lovely crimson hue and for this reason is often called "Burning Bush." Its stately form is shown in the illustration. One of the easiest plants to grow.

Pkt. 5 cts.

CALIFORNIA POPPY

CALIFORNIA POPPY.**Golden West.**

Extremely handsome low and quick growing annual plants, with finely cut foliage and cheerful blossoms. The flowers are light canary yellow with a large rayed blotch of deep orange at the base of each petal. Plants are about one foot high and easy to grow.

They are ornamental and bloom until killed by frost. The blooms are beautiful and variously formed.

Pkt. 5 cts.

KOCHIA

Imperial Japanese.

trancing beauty and large size of the flowers; they measure from three to four inches across.

and spotted centers have magnificent edges and throats. They are easy to grow and quick to come into bloom. Pkt. 5 cts.

Lemon-Ball.

The hardy plants, of neat branching habit grow from fifteen to twenty inches high and are exceedingly profuse in flowering. The extra

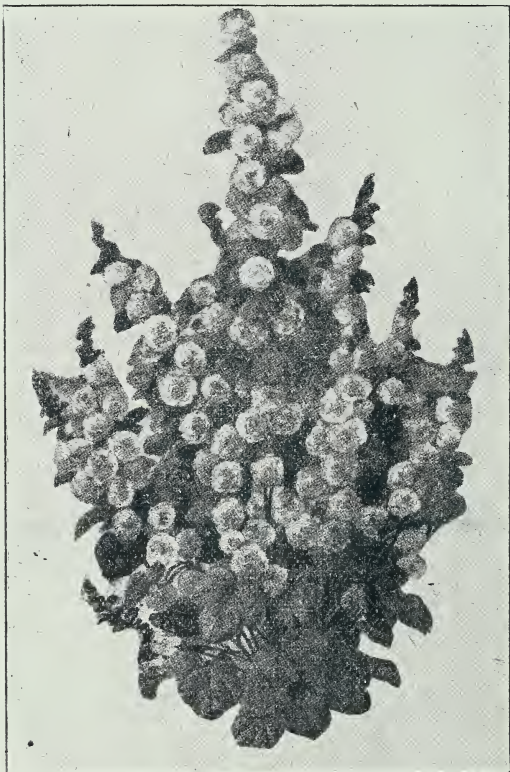

large, roand, double flowers are of a clear canary-yellow. The petals are heavily rolled and are crowded so closely together as to appear lacin-ated. Pkt. 5 cts.

HOLLYHOCKS.

Every garden may now be glorified with stately Hollyhocks grown as easily and flowering as soon from seed as any garden annual. The plants are of healthy and vigorous growth and naturally branching in habit, the center spike attaining a height of from five to seven feet.

The diversity of forms and colors among the flowers affords many delightful surprises. Some plants produce densely double flowers without guards, others with guard petals; there are semidoubles, then single sorts with double centers, others flounced, and all flowers are usually very large, some measuring five inches across. In colors there is also great variety, some richly brilliant, others dainty and exquisite, ranging from black, maroon, wine-red to orange, pink and white. The flower buds are borne in clusters which vary in maturity from the developing bud to the expanding flower; which accounts for the remarkably long blooming period. They flower profusely until killed by frost. **Pkt. 5 cts.**

EVERBLOOMING HOLLYHOCKS

DWARF NASTURTIUMS.**Brilliant Beauties.**

The plants are of strong vigorous growth, erect habit and beautifully rounded form. The leaves on different plants range from light green to a rich purplish tint. They are of quick growth, begin to bloom early in the summer and continue to flower profusely until killed by frost. So greatly diversified are the colorings that it seems almost impossible to find two plants bearing flowers alike. The flowers are not only wonderfully brilliant but also of large size. It makes an excellent variety for bedding. Pkt. 5 cts.; oz. 15 cta.

BRILLIANT BEAUTIES

**Tom Thumb Mixed
NASTURTIUM.**

This mixture is composed of choice flowering varieties and is properly blended. They are of dwarf compact rounded growth, about nine inches in height and slightly greater in diameter.

They resist heat and drought, grow vigorously and flower freely all summer and fall. Flowers are of many different colors, and are shown to great advantage among the richly variegated foliage. For summer flower-beds nothing can surpass them. Seed sown in the open ground in the spring will produce plants that commence blooming during early summer and continue until frost.

They are of the easiest culture and require very little attention. Pkt. 5 cts.; oz. 10 cts.

TOM THUMB MIXED

**Tall or Climbing
Nasturtiums.**
GIANT FLOWERED MIXED.

This mixture is absolutely unsurpassed. Nothing can excel the wealth, richness and variety of these Nasturtiums for trellis, brush or rockery planting, nor surpass them in freedom and profusion of bloom. They throw out running shoots that can be trained upon strings or wires, or can readily be made to climb ordinary fences or wire netting. On good soil they will grow eight feet high. Single flowers measure four inches across.

Flowers are of various shades. Pkt. 5 cts.; oz. 15 cts.

GIANT FLOWERED TALL NASTURTIUM

NICOTIANA.**Affinis.**

The plants of this strain are quite compact, averaging 2 feet in height, pyramidal in form and bloom profusely. Flowers are pure white and are borne on long terminal tubes.

Plants are highly ornamental and have handsome foliage. The flowers open in the morning and evening. Very fragrant. Pkt. 5 cts.

BISMARK MIGNONETTE

MIGNONETTE.

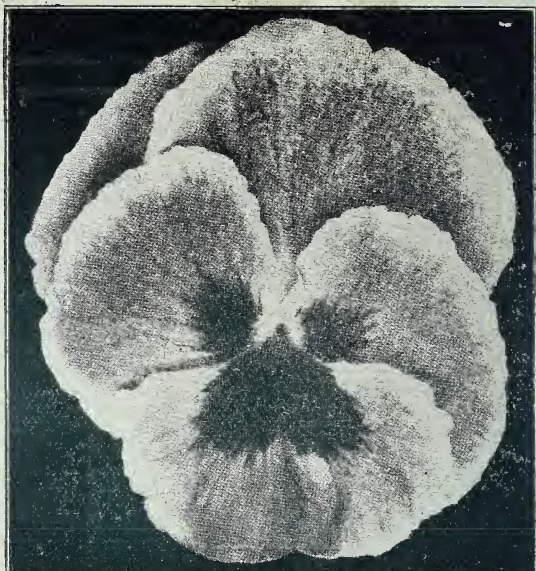

Bismark. One of the finest, being of strong growth, healthy and deep-rooting. The average spikes of flowers are immense, measuring 6 to 8 inches long by 2½ inches in diameter, and are compactly filled with giant florets, measuring one-half inch across and packed full, even in the center, with anthers. The color of the bright red florets is strengthened on account of the density of the florets and spikes, thus presenting almost solid columns of brilliant red, effectively contrasted against the healthy, bright green foliage. The fragrance is rich and powerful.

Pkt. 5 cts.

Special Mixed

MIGNONETTE.

Contains seed of all the standard sorts and latest introductions, there being red, yellow and white colors. Pkt. 5 cts.

JUNG'S GIANT FANCY PANSY

PANSIES.

Jung's Giant Fancy Mixed.

This "Fancy Mixture" contains seed of the largest, richest and handsomest pansies known to the horticultural world.

The well formed expanded flowers are uniformly of the largest size and of fine substance; they are borne on long stiff stems well above the heavy deep-green foliage.

The colors are rich and varied, such as white, cream, yellow, deep-orange, mahogany, claret, rose, red-dish-bronze, lavender and light blue, each petal is distinctly blotched.

The compact, rounded plants are of sturdy habit and so deep rooted that they bear gigantic flowers profusely and continuously. The petals are of thick heavy substance, large size and various shapes. Pkt. 15 cts.

Giant Masterpiece. This giant pansy is remarkable for having its petals waved or folded, giving it the appearance of a double flower. The truly giant-sized flowers are of the most striking character; the petals being of a rich velvety substance and heavily ruffled. The colors are mainly dark rich shades bordered, blotched or marked in ray-like veinings. The mammoth size, richness and beauty of colorings, combined with the distinctly frilled or ruffled character of the petals, makes the Masterpiece one of the most interesting novelties in pansies ever developed. Pkt. 10 cts. See cut on page 49.

Hercules Giant. The flowers are of thick heavy texture. The colorings and markings are widely varied, some flowers being nearly self-colored in the richest tints of purple-carmine and brown, relieved by delicate shadings of a brighter or contrasting color; others are boldly margined with white, cream, golden-yellow or soft rose; while still others have silvery grounds heavily blotched at the base of each petal with a dark rich shade. Plants are of sturdy stocky growth. Pkt. 10 cts.

LARGE FLOWERING MIXED. This mixture is composed of the finest large flowering varieties and contains some of the richest colors. The plants make strong growth and bloom freely. Pkt. 5 cts.

HERCULES GIANT ½ natural size

ICELAND POPPIES

Iceland POPPIES.

season from seed.

The fragrant, elegant, crushed-satin-like flowers are produced continually from June to October. They are of graceful neat habit, with bright green fern-like foliage, formed in tufts, from which issue slender stalks, about twelve inches long, bearing their brilliant flowers in endless profusion. Their long stems and lasting qualities make them invaluable for cut flowers. The flowers last fully a week if cut as soon as open, Pkt. 5 c.

The Iceland Poppies are perennials, blooming the first

A Side View, from a Photograph, of
GIANT MASTER-PIECE.

Petunia. Large Flowering Mixed.

No annual flower is more widely used than the petunia. It begins to bloom early, and lasts the whole season, until killed by frost. Most of the flowers are exquisitely ruffled or fringed on the edges and are of enormous size, but their great merits lie in the tremendous variety of colors, markings, blotches and stripings, in the most grotesque and beautiful combinations.

PETUNIA

Some colors are rich and gorgeous, others are of lovely delicate shades.

Pkt. 10 cts.

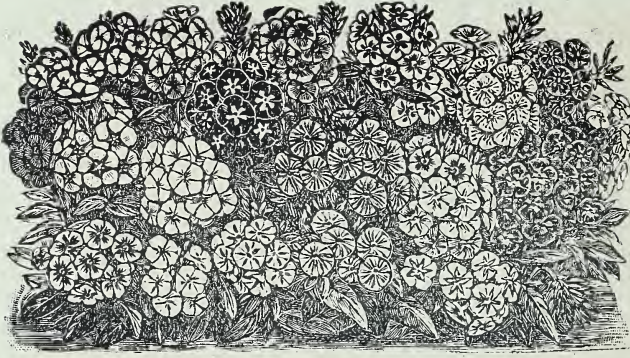

SUNFLOWER

SUNFLOWER.**Chrysanthemum Flowered.**

Grows seven feet. Perfectly double; the color is the brightest golden yellow. The plants branch and afford fine long stout stems for cutting. This gigantic Sunflower will be of great value for the hardy garden and herbaceous border. The flowers are so perfect in form that they resemble Chrysanthemum flowered Asters with long stems. This is the very best variety. Pkt. 5 cts.

New Dwarf Phlox. Nana Compacta.

DWARF PHLOX

This splendid race of dwarf annual phloxes cannot be overpraised for brightness and beauty. The plants are always lavishly covered with large flowers of the most brilliant hues.

Nothing better for bedding purposes is listed in this catalog. They succeed everywhere, and are in universal favor for summer flowering purposes.

Bushes are dwarf and compact, six to eight inches high, forming dense masses of bloom all summer.

They are very desirable for edgings and ribbon beds and useful for pot culture. The colors include pure white, deep and showy red, rose with white eye and many other shades. They

are quite hardy and are to be treated as annuals. Pkt. 5 cts.

Phlox Drummondii. Grandiflora Mixed.

THE BEST OF ALL BEDDING PLANTS.

This superb strain is notable not only for variety and brilliancy of colors, but also for the perfection and size of the flowers. Many of the single flowers are so large that they will nearly cover a fifty cent piece. The colors range from pure white to the deepest blood-purple or crimson, while the clear eye of some of the flowers is peculiarly marked.

In good rich soil they will grow 18 inches high, and for a mass of splendid colors no flower will give a more satisfactory return for so little cost. The flower type is shown in the illustration.

No garden should be without a bed of these, the most showy of all dwarf growing annuals. Pkt. 5 cts.

PHLOX DRUMMONDII

PETUNIA.

Defiance Mixed.

This strain bears grand substantial flowers of the largest size in profusion. The flowers frequently measure five inches across, while the colors are indescribably rich and varied. Most of the flowers are beautifully fringed and have open throats.

All are distinctly veined, especially in the throat portion and in many the throat is darker than the outer portion of the petals, imparting a rich velvety effect. The foliage is large and heavy and very dark green in color. Some of the colors are rich and gorgeous while others are of lovely delicate shades.

Pkt. 15 cts.

Marvel of Peru.

Finest Mixed. Also known as Four O'clock.

This is a well known and deservedly favorite flower. Produces large, convolvulus-like flowers; white, yellow, crimson, blue, striped and etc. The flowers open late in the afternoon and close the next morning. Makes a nice hedge if set a foot apart.

Pkt. 5 cts.

DEFIANCE PETUNIA

Double Featherball Poppies.

These double-fringed annual Poppies are very beautiful; they belong to the carnation-flowered type, the large flowers having the same globe-shaped formation, with gracefully fringed petals like big balls of slashed tissue paper.

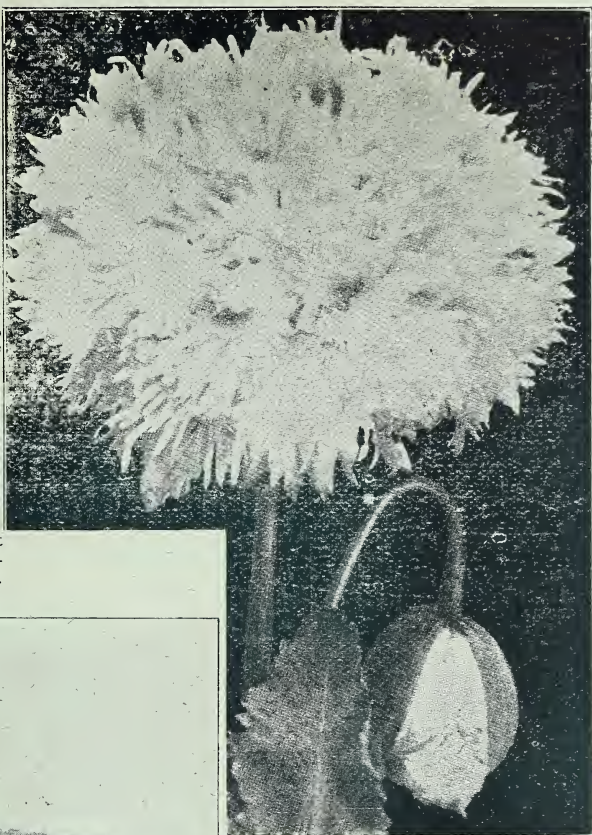

Plants are of branching, stocky, growth, 15 to 18 inches high, each plant carrying several of these exquisite flowers.

The great variety of coloring ranges from the most gorgeous down to shades of pure white. They are of the easiest culture. Mixed colors.

Pkt 5 cts.

Fairfield Favorite Mixed Poppies.

This new mixture is made by ourselves from the choicest varieties as grown at Fairfield. It contains seed of the standard sorts and is sure to please. Pkt. 5 cts.

DOUBLE FEATHERBALL

Re-Selected Shirley Poppies.

The most showy of all Poppies. A bed of them in your garden is a sight to behold.

Flowers about three inches across, exceedingly graceful and elegant; the colors are pure, soft and varied and range from pure white, bluish rose, delicate pink and carmine, to orange-scarlet and bright sparkling crimson, occasionally blotched with white.

All who admire the delicate beauty of the Shirley Poppies will be delighted with this re-selected strain of the finest colors and most charming markings.

Few flowers can show such a grand array of colors. Pkt. 5 cts.

SHIRLEY POPPIES

SWEET WILLIAM. Fine Single Mixed.

Well known hardy, freeblooming perennial plants. They produce masses of lovely, brilliant, sweet scented flowers through a long period, making a splendid effect in beds. The plants grow about one foot high and form fine clumps. It produces very large florets in great profusion and in a great variety of colors.

Pkt. 5 cts.

SALVIA SPLENDENS

SALVIA. Bonfire.

SALVIA BONFIRE

A GRAND BEDDING PLANT. One of the grandest varieties in cultivation. A bed of them will surpass the finest scarlet geraniums in brilliancy and continuous bloom. The plants are compact growers, attaining a height of about thirty inches. Single plants sometimes carry two hundred spikes measuring from eight to twelve inches in length. They first begin to flower the plants are never out of bloom until killed by frost. We know of nothing that will equal the gorgeous effect of a row or bed of these Salvias when in full bloom; the waving masses of glistening scarlet against green surroundings of lawn or foliage is matchless.

Flowers are a brilliant dazzling scarlet. From the time Pkt. 10 cts.

SALVIA.**Splendens.**

"The most dazzling scarlet flower." The handsome bushes are three feet high and as much in diameter when of full size.

Single plants often bear one hundred spikes of flowers, each about eight inches long. It is excellent for filling large beds or borders in the garden. It blooms continuously from early in August until frost. Nothing is equal to a bed of these flowers which for months is a blaze of intensely brilliant scarlet.

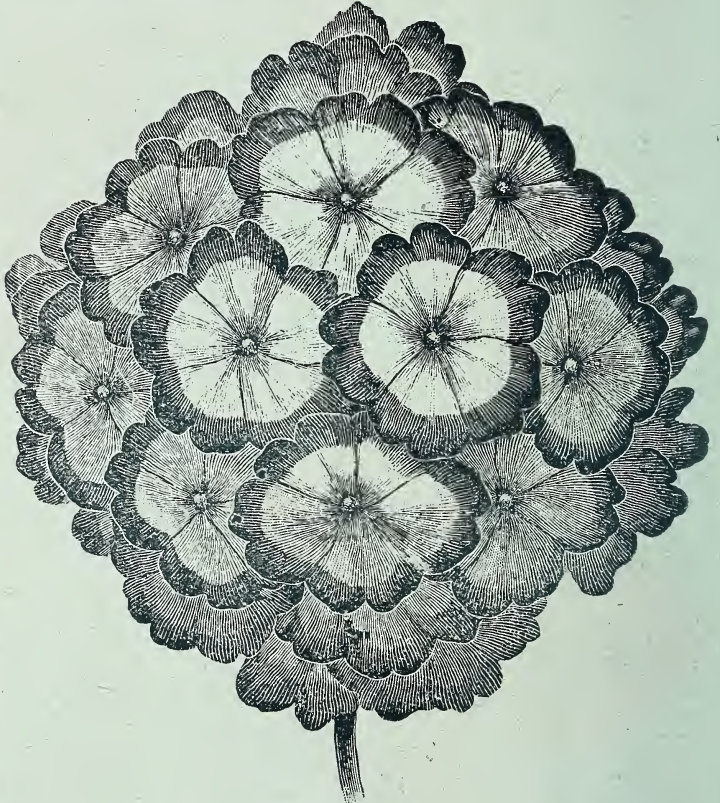

Pkt. 5 cts.

VERBENA.**Fairfield****Famous****Mixed.**

A choice perennial, six to twelve inches high, indispensable for bedding purposes. The average trusses measure nine to twelve inches in circumference and the individual florets on properly grown plants over one inch across—or larger than a twenty-five cent piece.

They bloom freely, are vigorous in growth, and contain beautiful new colors and shades. For garden beds and massing these verbenas are unrivaled; flowers of the most brilliant colors are produced continuously from spring until late in the fall.

Although perennials they bloom the first season from seed. Pkt. 5 cts.

VERBENA

The Greatest Aster Bargain Ever Offered. See Page 43.

**Gigantic
"Orchid
Flowered"
SWEET
PEAS.**

THE GIANTS OF THE SWEET PEA FAMILY. These new Sweet Peas are of enormous size, which, together with their charming colors and waved or fluted appearance, entitles them to be put in a class by themselves. The flowers are distinct in having the outer edges of the wings and standards waved or fluted as the tissue is so full that there is not room for it to lie flatly expanded or smoothly rolled. Some of the flowers grown on our farm measured two and one-half inches across. The plants are vigorous in growth, and should stand at least eighteen inches apart. These grand Sweet Peas were the delight of everybody who saw them growing at Fairfield.

SPENCER SWEET PEAS AS GROWN AT FAIRFIELD

**Asta Ohn
Spencer.**

The color throughout both standard and wings is a charming soft lavender. The flowers are of large size, pronouncedly waved and fluted in standard, with unusually large wings. Stems are long and sturdy.

Pkt. 10 cts.

**King Edward
Spencer.**

The color is a deep rich glossy scarlet. The enormous flowers are frilled, waved and crinkled to a remarkable degree. The standard measures from $1\frac{1}{2}$ to 2 inches across by $1\frac{1}{4}$ inches deep. Pkt. 10 cts.

**Helen Lewis
Spencer.**

Color is an intensely brilliant bright orange pink, and now supercedes all others in this shade on account of its size and long stems.

The blossoms measure two inches across. Pkt. 5 cts.; oz. 20 cts.

White Spencer.

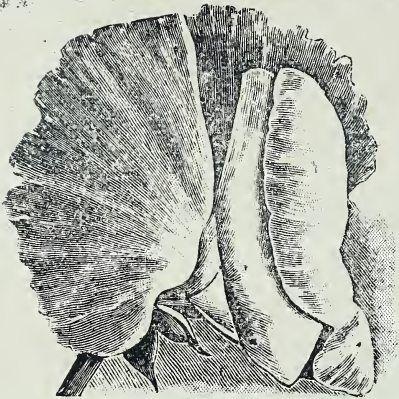

It produces in the greatest profusion pure white flowers of large size. Flowers are borne 3 and 4 on a stem and are uniformly well placed.

Pkt. 10 cts.; oz. 20 cts.

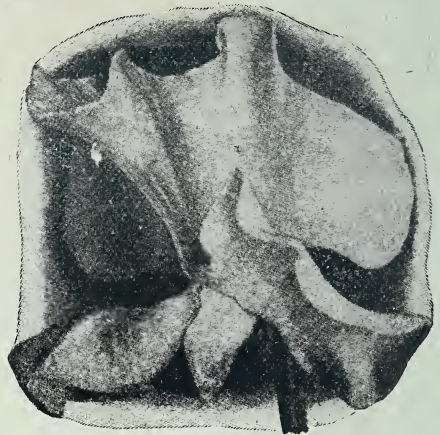

ASTA OHN SPENCER

A Page Of Elegant True Spencer Sweet Peas.

TRUE COUNTESS SPENCER

Mrs. Routzahn Spencer.

MRS. ROUTZAHN SPENCER

A beautiful blending of soft straw color, tinted with blush pink and shading to apricot and rose at the edges, with quite a distinct rose margin. The flowers are of the largest size and are thoroughly crimped and waved.

The standard is broad and deep; the wavy wings are so large that they usually hide the keel and are of the same soft color effect as the standard. The vines are strong and thrifty. The stems are twelve to fourteen inches long seldom produce less than three flowers, while many vines bear four grand flowers to a spray. Pkt. 10 cts.

True Countess Spencer.

It combines all the good qualities of the best Sweet Pea. Color is a delightful soft pink shading a little deeper at the edge of the petals. Stems are very long and generally bear four blossoms, all facing one way. The edges of wings and standard are just wavy enough to give it a graceful fluffy appearance. It is fragrant, begins to bloom early, and continues until late in the season. Pkt. 5 cts.; oz. 20 cts.

Apple Blossom Spencer.

Of true Spencer type. The flowers are heavily shaded and edged with deep rose and soft pink on silvery white. The form is very beautiful; the petals are waved or crinkled to a remarkable degree. Pkt. 5 cts.; oz. 20 cts.

Beatrice Spencer.

The ground color is white, tinted with soft pink and buff on the standard, while each wing has a blotch of brighter pink near the base. Flowers are of large size. Stems long and wiry. Pkt. 10 cts.

Waverly Spencer.

The standard is purplish maroon, the wings bluish purple, showing veins of rosy purple. The flowers are of immense size and always waved. Pkt. 10 cts.

Othello Spencer.

The long stems are thick and carry well either three or four fine large flowers of a deep maroon. It is a strong grower and flowers most profusely. Blooms are beautifully waved and crinkled both in standard and wings. Pkt. 10 cts.

Orchid Flowered Mixed Sweet Peas.

Never before has the public been enabled to secure such a superb mixture of truly giant flowered Sweet Peas at the low price of 10 cents per packet. It includes all the finest colors. Flowers are of extremely large size, beautifully waved or fluted in the standard. Vines are strong vigorous growers and bear flowers in profusion on long wiry stems. After once growing this mixture you will never again want to sow any other. Pkt. 10 cts.; oz. 20 cts.; 1-4 lb. 60 cts.

ORCHID FLOWERED MIXED SWEET PEAS

Gladiolus.

There is no flower of such easy culture, embracing the great range of color with endless combinations and variety, to equal the Gladiolus. It is rightfully named the people's flower. Our bulbs are of the finest quality and will give bountiful satisfaction the first season. The bloom is continuous from the end of July until frost. Any good garden soil will grow Gladiolus. Cultural instructions with each order.

America.

A beautiful shell-pink. By far the most vigorous and easily grown Gladiolus known. Very strong and healthy, with luxuriant dark green foliage and a freedom of growth and flowering surpassing all others.

Spikes two to three feet long, with a great number of large spreading blossoms all facing one way and showing an exquisite shade of glistening soft lavender pink.

Single flowers measure four inches across and as many as six flowers are open at one time on a single stem. As a cut flower it is perfectly immense, lasting in water over a week. 10 cts. each; \$1.00 a dozen.

SUPERFINE MIXED SWEET PEAS

Superfine Mixed

SWEET PEAS.

This is not grown in mixture but is carefully blended of the finest large flowering varieties including some of the most beautiful recent introductions. For flowers of delicate colors, varying from pearly white to the richest reds and purples, this mixture leads, because it is the result of selecting, year after year, seeds of the choicest flowers. It will surely give satisfaction. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 25 cts.

25c.

AMERICA

Golden Queen.

A new variety of great beauty. It is of a rich lemon yellow color, having a crimson spot on the two lower petals, forming one of the most handsome Gladiolus known.

Flowers are of truly gigantic size and a large number of them are open at a time. The plants are strong and healthy, of the branching type, and grow about two and one-half feet high. 10 cts. each; \$1.00 per dozen.

Augusta.

A splendid new Gladiolus. Flowers are of perfect paper-white, with a slight pink shade on lower half of the petal. The spike is set solid with perfect flowers from top to bottom. Plants are strong and healthy.

5 cts. each; 45 cts. per dozen.

George Paul.

A superb variety. Flowers are a deep rich crimson, slightly stained with yellow, spotted with crimson. Flowers sometimes measure five inches across. A very strong and vigorous grower. 10 cts. each; \$1.00 per dozen.

Brenchleyensis.

This is an old standard sort, and one of the best for bedding where one shade of good scarlet is desired. Flowers are pleasing and attractive and grow in profusion on strong solid spikes which are covered with blossoms from top to bottom. 5 cts. each; 45 cts. per dozen.

Mrs. Frances King.

A most striking and popular variety. Of exceptional value for cut flowers. Color is a very pleasant light scarlet. The individual flowers are five inches in diameter and sometimes larger. Spikes produce twelve to fifteen flowers and grow four feet high. It is exceptionally healthy and its flowering is continuous. 10 cts. each; \$1.00 per doz.

GOLDEN QUEEN

American Hybrids.

The gorgeous colorings and gay markings of this mixture are simply grand. The large flowers are very brilliant and effective, of perfect form and heavy substance. Composed of the choicest named varieties including the finest, showy, large flowering seedlings and latest introductions. All are of strong, healthy, upright growth and flowers are of immense size. 4 cts. each; 35 cts. per dozen; \$3.25 per 100.

JUNG'S

Northern Grown Farm Seeds.

The Farm Seeds which we offer are uniformly of the **VERY BEST** grade, while the **EARLINESS** and **TREMENDOUS PRODUCTIVENESS** of **NORTHERN GROWN SEED** needs no comment. The greater part of these seeds were grown on our Fairfield Seed Farm. They were grown especially for seed, are thoroughly recleaned and **FREE FROM FOUL WEEDS**. This ought to appeal to every farmer who wishes to keep his farm free from foul weeds. **BAGS FREE**, remember this when comparing prices. If you want any seed not listed in this catalog write us and we will be glad to quote you special prices.

WISCONSIN PEDIGREE BARLEY.

The Champion Barley of the World.

This is the Barley that wins "First" at all grain shows.

It has been thoroughly tested at the Wis. Experiment Station and throughout Wisconsin and proved to be superior to any other variety. We have grown this Barley for the past three years and are satisfied that it is the best variety. It will out-

yield all others, has the stiffest straw, and plumpest berry. The heads are of great length and a remarkable characteristic is that all the kernels are uniform in size. The barley will yield from five to fifteen bushels more per acre than any other, and it will pay any farmer handsomely to buy enough seed to sow all his barley land. Under normal conditions the kernels are brighter and whiter than any other barley; making it most attractive.

We have a nice stock of this variety which we offer at the following prices: Lb. 35 cts., postpaid. By freight or express, pk. 30 cts.; bu. \$.00; 2½ bu. \$2.40; 10 bu. \$9.20. Bags free. Write or special prices on larger quantities. Samples sent on request. Our stock of this Barley was treated for the prevention of smut.

A FIELD OF WIS. PEDIGREE BARLEY AT FAIRFIELD

A BUNDLE OF WISCONSIN PEDIGREE OATS AS GROWN AT FAIRFIELD

WISCONSIN PEDIGREE OATS.

The Verv Best Oat In America Today. Long Stiff

Straw. Immense Heads. Always Two Fully Developed

Kernels To A Pod. This new Oats was developed at the

Wis. Agr. Experiment Station at Madison, Wis. and has been thoroughly tested out throughout Wisconsin the past season. Wherever it was tried it proved itself superior to all other varieties.

It was also carefully tested out at our Fairfield Farm and we can truthfully say that it is **WAY AHEAD OF ANY VARIETY WE HAVE EVER TRIED.** Planted along side of other varieties it was six inches taller and while other varieties lodged badly it stood up straight. One marked characteristic was the fact that Wisconsin Pedigree produced two fully developed kernels to a pod while other varieties also had two kernels but in many cases one would be only a hull. This may not seem important but it is right here where the yield is increased and you will not, therefore, make a mistake in sowing these oats. The kernel is large, white and has a very thin hull.

We are not going to make claims that these oats will yield from 100 to 200 bushels per acre as is the practice of some unscrupulous dealers but we do claim that if they are tested cut with any other varieties they will come out ahead. It ripens medium early. Our stock is limited and we would advise you to order early.

Lb. 35 cts., postpaid. By freight or express: Pk. 60 cts.; bu. \$1.50; 2½ bu. \$3.50.

Swedish Select Oats.

NEXT TO WIS. PED. THIS IS THE FINEST, STRONGEST, HEAVIEST, LARGEST YIELDING, MOST PLUMP WHITE OAT EVER GROWN IN AMERICA. Prof. R. A. Moore, Madison, Wis., who for four years tested it with 36 other varieties pronounced it **THE MOST SATISFACTORY OF ALL, ranking first in weight, stiffness of straw and thin hulling qualities.** The great root development is one of the chief characteristics of the Swedish Oats which enables it to withstand drought better than any other variety. The straw is coarse and is noted for its power to withstand lodging.

It is early; the kernels are large and thick, white, plump and heavy, weighing from 36 to 40 pounds per measured bushel, with an exceptionally thin hull. This variety seems to be well adapted to high land, the best results being obtained on clay loam. Lb. 25 cts., postpaid. By freight or express: Pk. 25 cts.; bu. 80 cts.; 2½ bu. \$1.85 10 bu. \$7.00.

Write for prices on larger quantities. Bags free. Samples sent on request.

JUNG'S Northern Grown SEED CORN.

Our entire stock of Seed Corn, with the exception of Early Longfellow Flint, was grown on the Fairfield Seed Farm and nearby localities and a finer bred lot of seed corn cannot be found. It is all carefully selected, fire-dried, of high germination and guaranteed to grow. We have a large stock but good seed corn is scarce and in great demand this year so we will advise our friends and customers to order early.

Early Longfellow Flint Corn.

The most popular of all flint varieties. It is a beautiful eight rowed flint, with straight slender ears twelve to fifteen inches long.

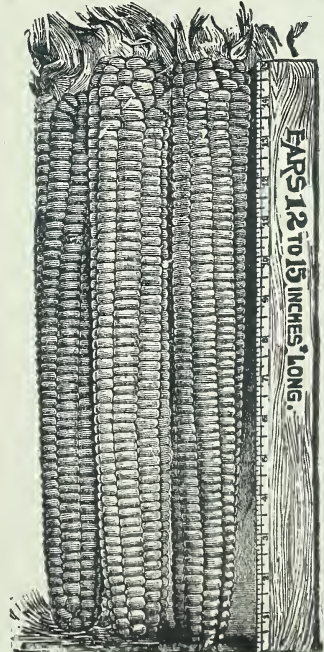

Kernels are large and wide, cob very small.

Ripens in 75 to 80 days and is very prolific.

The stalks grow about six feet high and makes excellent fodder.

Our stock of this variety has been hand picked and is fire dried.

This is a valuable variety for the northern states. Nebraska grown. Shelled: Pk. 70 cts.; bu. \$2.50; 2½ bu. \$6.00.

Clark's Yellow Dent. Wisconsin No. 1.

The Largest-Eared And Deepest-Kerneled Yellow Dent Corn.

Prof. Moore thinks Clark's Yellow Dent comes as near being a purebred corn as anything yet introduced. It originated with Mr. Ben Clark an old corn grower of Walworth County, Wis.

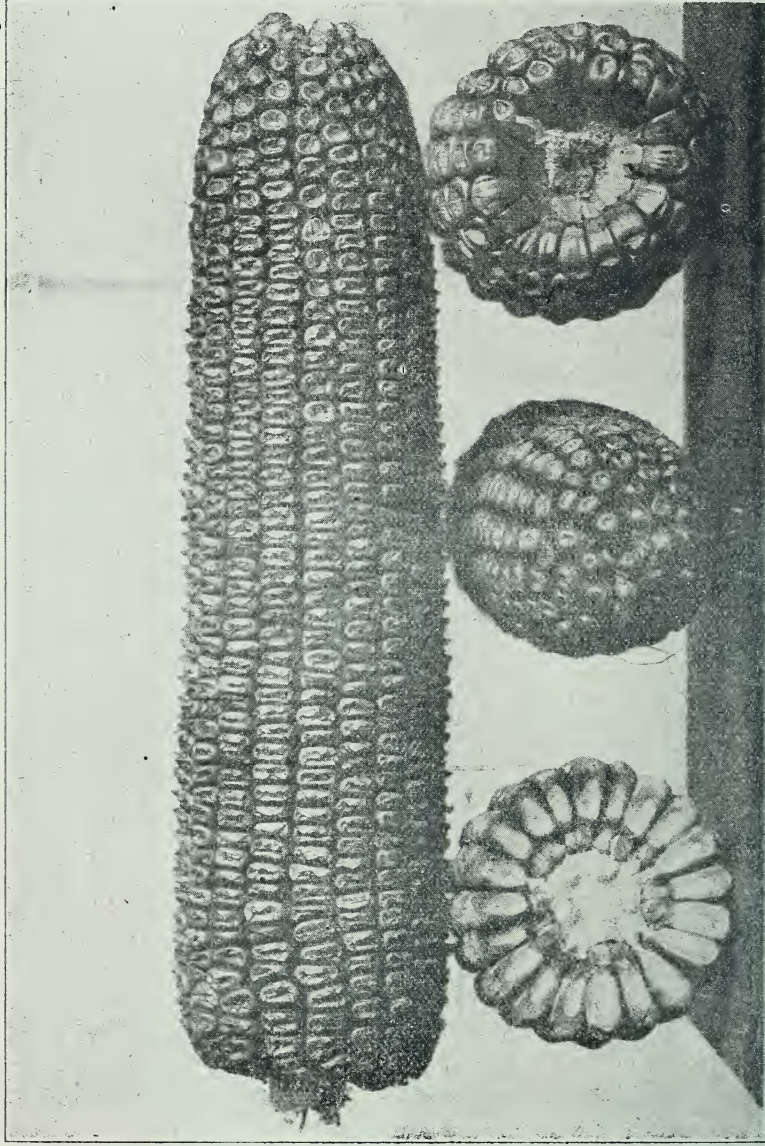

It matures in from 100 to 115 days. The stalks are strong vigorous growers, generally bearing one good ear, being well supplied with large broad leaves, which make excellent fodder.

The corn always breeds very true to type, uniform in color, size and shape of ear, always splendidly filled out at the tip and butt; kernels are of a bright golden color, compactly set on the cob, and of unusual length for so early a corn. See cut.

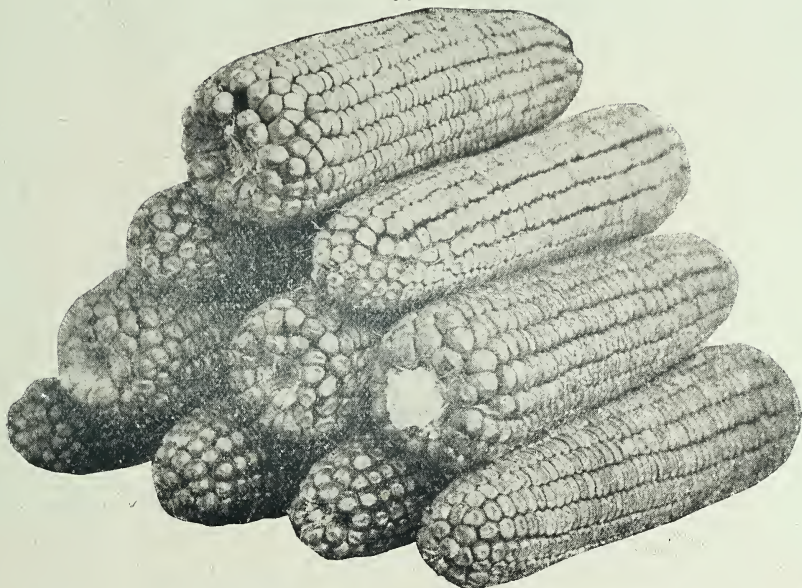

A very noteworthy characteristic of this corn is that the ears hold their size almost to the tip instead of tapering out to a long slim point, or showing a bare cob.

Our strain of Clark's Yellow Dent is a great improvement over that generally sold, as it has been critically bred under rules approved by Prof. Holliden, the noted corn expert. It is a heavy yielder and good sheller, shelling from 30 to 62 lbs. of corn from 70 lbs. of ears.

Ears: $\frac{1}{2}$ bu. \$1.90; bu., 73 lbs., \$3.75, crates free. Shelled: Pk. 90 cts.; bu. \$3.50. Sample ear 25 cts, postpaid.

A TYPICAL EAR OF CLARK'S YELLOW DENT AS GROWN AT FAIRFIELD FARM

WIS. NO. 8. EARLY YELLOW DENT AS GROWN AT FAIRFIELD FARM

Wisconsin No. 8. Early Yellow Dent.

This is the corn for Northern Wisconsin and similar latitudes. The commanding points for northern planting are: its **EARLINESS**, its **ENORMOUS PRODUCTIVENESS**, its **ADAPTABILITY TO A GREAT VARIETY OF SOILS AND CLIMATES**. Originally from Minnesota where it is known as Minnesota No. 13, Wis. No. 8 has been developed at the Wis. Experiment Station and is an improvement on the Minnesota strain. By careful selection and breeding the kernels have been materially lengthened without sacrificing the extreme earliness. It fully matures on the shores of Lake Superior and will ripen anywhere in Wisconsin. Ears average seven to eight inches in length, with long kernels, very uniform in type and color, with remarkably well filled tips. It grows a medium-sized stalk with good leaf development and with practically no barren stalks. It will thoroughly mature in about 90 days on favorable soil and a good location and will yield from 40 to 60 bushels per acre, producing often two ears to a stalk. This corn will be especially valuable to use even down in the corn-belt where for any reason late planting becomes necessary. Prices on the ear: $\frac{1}{4}$ bu. \$1.90, bu., 70 lbs., \$3.75. Crates free. Shelled, Pk. 90 cts.; bu. \$3.25. Sample ear by mail 25 cts., postpaid.

Golden Glow. Wisconsin No. 12.

THE NEW EARLY YELLOW DENT FOR CENTRAL AND NORTHERN WISCONSIN AND SIMILAR LATITUDES. This is the corn many have been looking for. It is a little earlier than Silver King and Clark's Yellow Dent and yet large enough to make it a profitable variety for general culture. It matures as far north as north central Wisconsin and yields big crops of large-sized ears.

This is strictly a Wisconsin bred variety and was brought out by Prof. R. A. Moore, his idea being to produce a early variety with large ears and deep kernels and he has succeeded well.

GOLDEN GLOW is a pure golden yellow corn, most attractive in color and appearance. Ears are fairly large, averaging about 8 inches in length, symmetrical in shape, slightly tapering at the outer ends and very free from a tendency to flintiness; stalks are large and strong with abundant foliage which makes it a very desirable fodder or silo variety. It is a heavy yielder. Prices--on the ear: 1-2 bu. \$2.00; bu., 70 lbs., \$3.75. Crates free. Shelled: Pk. 90 cts.; bu. \$3.25.

Sample ear by mail 25 cts., postpaid.

Whenever this Trade Mark appears on a package of seeds it is a guarantee that the seeds contained therein are unexcelled for **QUALITY**. It appears on every shipment we send out.

SILVER KING WIS. NO 7 AS GROWN AT FAIRFIELD FARM

Silver King. Wisconsin No. 7.

The Leading Variety Of Corn In Wisconsin Today.

Silver King leads the list today of all-round good varieties of corn adapted to the latitude of Southern Wisconsin. Equally valuable for northern Iowa, southern Minnesota, South Dakota, northern Illinois, Ohio and Indiana as for Wisconsin. This corn originated in northern Iowa and was brought to Wisconsin by Prof. Moore who has developed and improved it and sent it out over the state through the members of the Wisconsin Experiment Association.

Ears are just the right length, averaging eight to nine inches, always filled out clear to the tips, and are very uniform in size and type. The corn is pure snow-white in color with good long kernels set compactly in straight rows.

It is a strong grower, early enough to mature as far north as south central Wisconsin, and is especially adapted to resist cold weather. The stalks are large and strong with abundant foliage making it a very desirable fodder or silo variety. It has a decided double-ear characteristic, one reason for its large yield records.

We have a large well bred stock which we offer at the following prices: On the ear: 1-2 bu. \$2.00; bu., 70 lbs., \$3.75; 5 bus. at \$3.70.; crates free. Shelled: Pk. 90 cts.; 1-2 bu. \$1.75; bu. \$3.25; 2 1-2 bu. \$7.90.

Sample ear by mail 25 cts., postpaid.

RED OR MEDIUM CLOVER

Jung's Fancy Recleaned GRASS and CLOVER Seed.

Nothing is more important to the farmer than that the seed he sows be **PURE** and free from **FOUL WEEDS**; theseed should also be plump and of strong vitality to insure a good stand.

We handle only **ONE GRADE** of these seeds and that is our famous

FAIRFIELD BRAND

which is pure, well cleaned, of high germination and free from weeds. You are taking no risk when placing your orders with us. We always aim to give honest value for every dollar received or your money back. **BAGS FREE** remember this when comparing prices. Samples of all Farm Seeds free.

Wisconsin Grown Red or Medium Clover.

We have an unusually fine stock of Medium Clover Seed. It is bright, pure, of high germination and free from foul weeds. This is the standard Red Clover and a dependable all-round variety for farmers and stockmen. It makes two crops a year.

The first is usually cut when in bloom for hay; the second crop may be cut for hay, harvested for seed, or plowed under to add fertility to the soil. Clover greatly adds to the fertility of the land on which it is grown.

It does not exhaust the soil but enriches it. It pays always to buy the best grade of Clover seed that can be obtained.

Even though the first cost is much more than the cheaper grade, it will be found in the long run that inferior seed is the most expensive, not only on account of less hay or seed being produced from it, but from the fact that one's land becomes infected with weed seeds which decrease the value of the land on which they are growing. Sow Clover Seed and plenty of it. Lb. 35 cts.; postpaid. Not prepaid: lb. 30 cts.; pk. \$3.25; bu. \$12.75. Price subject to market changes. Bags free.

Write for special prices if wanted in larger quantities.

ALSIKE CLOVER

Wisconsin Grown Alsike Clover.

pure and free from weeds.

Alsike is the hardest of all Clovers. It is more leafy than Red Clover and makes a finer and better hay; especially when sown with timothy. It is deliciously fragrant and highly nutritious. On good soil it will grow four feet high. Alsike is the only clover that will produce a good crop and not kill out on wet land. Lb. 35 cts. postpaid. Not prepaid: lb. 30 cts.; pk. \$3.60; bu. \$13.75. Price subject to change. Samples free.

It is more leafy than Red Clover and makes a finer and better hay; especially when sown with timothy. It is deliciously fragrant and highly nutritious. On good soil it will grow four feet high. Alsike is the only clover that will produce a good crop and not kill out on wet land. Lb. 35 cts. postpaid. Not prepaid: lb. 30 cts.; pk. \$3.60; bu. \$13.75. Price subject to change. Samples free.

Mammoth Clover.

This is sown largely for pastures and to restore fertility to depleted soils. Being a rank grower, it is very valuable for fertilizing purposes. It makes one crop a year. Lb. 35 cts.; pk. \$3.60; bu. \$14.00. Price subject to changes.

Dry Land Alfalfa.

A clover-like leguminous plant of great importance as a hay and forage crop, nutritious and rich in protein elements. It grows two to five feet high and roots eight to twelve feet deep.

It needs one season to become established, after that it yields enormous crops annually for many years. Two to six cuttings per season, aggregating three to eight tons cured hay are harvested according to conditions and locality. It does well on all good rich soils, except heavy clay, if well drained. It is a perennial plant, lasting many years under good treatment. It should be grown by every farmer and dairyman.

We are offering Dry Land Seed. Dry Land Alfalfa is much to be preferred to seed grown under irrigation as the Dry Land grown seed produces a much hardier and more vigorous plant. Insist on having Dry Land Seed. Lb. 35 cts.; 3 lbs. \$1.00, postpaid. By freight or express: Pk. \$3.00, bu., 60 lbs., \$11.00. Price subject to change.

ALFALFA

Wisconsin Grown TIMOTHY.

As a crop for hay Timothy is probably unsurpassed by any other grass.

It is greatly relished by all kinds of stock, especially horses. It yields more nutritive matter than any other grass or forage plant. It is not suited for a permanent pasture as it will run out in the course of a few years. The largest crops of hay are raised on rich land. It is not suited for light, sandy soil so well as some other grasses. The most important point in the growth of Timothy is the selection of GOOD SEED. POOR SEED besides containing weed seed WILL NOT ALL GROW. We have a choice stock of Pure, Heavy, Plump, Well-cleared, Home Grown Seed.

Lb. 20 cts., postpaid. By freight or express: Pk. 70 cts.; bu. \$2.75. Price subject to change. Write for special prices if wanted in larger quantities.

TIMOTHY

Fancy RED TOP.

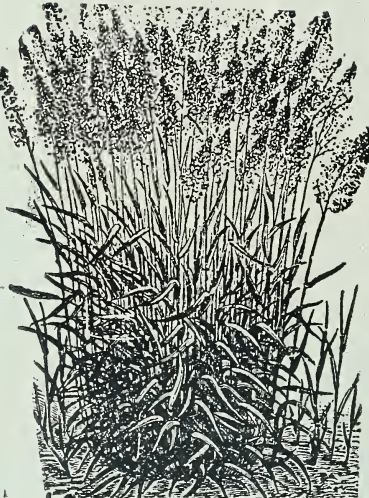

A suitable grass for moist, rich soils, where it thrives most luxuriantly.

It is a good variety to sow with Timothy or Clover for meadows or pasture and is more permanent than either of the other two. It should be sown close, as if it is allowed to grow up to seed the cattle dislike it. On good soil it grows about three feet high. It has been grown successfully even on alkali soil where all other grasses failed. Lb. 30 cts., postpaid. Not prepaid: Lb. 20 cts.; 10 lbs. \$1.60; 50 lbs. \$7.50. Price subject to change.

Kentucky Blue Grass.

Also known as June Grass. Well suited for pasture and lawns.

Sow in fall or spring at rate of 30 to 40 pounds per acre. Lb. 30 cts., postpaid. By freight or express: Lb. 22 cts.; 10 lbs. \$1.90; 50 lbs. \$9.10. Price subject to change.

RED TOP

Orchard Grass.

Extremely hardy and widely known. One of the earliest to start in the spring; grows rapidly; furnishes an abundance of pasture all season. Withstands droughts, will grow in the shade. Sow 20 to 30 pounds to the acre. Lb. 30 cts., postpaid. By freight or express: Lb. 22 cts.; 10 lbs. \$1.90; 50 lbs. \$9.10. Price subject to change.

If any seeds are wanted in larger quantities write us and we will be glad to quote you special price. Samples of Farm, Clover and Grass Seed sent free on request. Bags free.

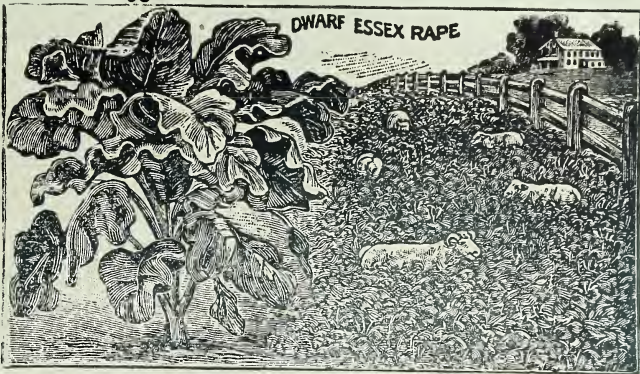

Jung Farm Seeds Are PURE.

Dwarf Essex RAPE.

The greatest of all forage plants. It is ideal for sheep pasture, and is now also largely sown for cattle and hogs.

It furnishes an immense amount of green feed, and its nutritive value is nearly twice that of clover. Under favorable circumstances it is ready for pasturage in six weeks from the time of sowing.

Dwarf Essex Rape thrives best on good soil, rich in vegetable matter. Some firms ask less for their Rape seed than we do, but we handle only **THE VERY BEST SEED**, which is always sure to give satisfaction. Lb. 25 cts., postpaid. By freight or express: Lb. 15 cts.; 5 lbs. 50 cts.; 25 lbs. \$2.20, 100 lbs. \$8.00.

FIELD PEAS. White Canada.

This is a standard variety of Field Peas and needs no special description. This variety is extensively grown in Canada, Wisconsin and other pea growing sections, and has a large sale. They grow from three to four feet high and are very productive. Excellent for hog pasture or when fed green to milch cows. Pk. 75 cts.; bu. \$2.75. Write for prices if wanted in larger quantities. Samples free.

White Kaffir Corn.

An excellent fodder corn. It grows five to six feet tall, with a straight upright growth and numerous broad leaves. The stalks are brittle and juicy, not hardening like other varieties of sorghum. It makes

excellent fodder, either green or dry, which is highly relished by all kinds of stock. The seed crop is also heavy, sometimes 50 to 60 bu. per acre.

Can either be sown

broadcast or in drills. Five to ten pounds will sow an acre in drills.

Lb. 20 cts., postpaid. By freight or express: Lb. 10 cts.; 10 lbs. 40 cts.; 100 lbs. \$2.60. Price subject to change. Samples free.

CANADA FIELD PEAS

WHITE KAFFIR CORN

SOY BEANS.

The Soy Beans have attracted much attention in recent years on account of their great value as a feed, being much richer in protein than flaxseed, oilmeal, bran or oats, and can be used to balance a feed ration to good advantage. By its use a dairyman can make a combination that is wholesome, economical and a completely balanced ration for milch cows.

They also equal or surpass clover as a soil enricher, gathering nitrogen from the air. It is also used for ensilage, clover crop or fed in matured state. Sow just after corn planting, when the ground is warm, in drills 30 inches apart and three or four inches apart in the drill. From one to two pecks will seed an acre. Choice Northern Grown. Qt. 35 cts., postpaid. Not prepaid: Qt. 20 cts.; pk. 90 cts.; bu. \$3.50. Write for prices if wanted in larger quantities.

German Millet.

In the North Millet is grown almost altogether for hay, and for that purpose Southern grown seed is much the best.

It grows taller and finer than that from Northern seed and that means more and better hay. German Millet is very sweet, palatable, and when fed to dairy cows produces a large amount of milk. On good rich soil it grows 4 to 5 feet high. It is very tender when cut at the right stage, which is when it is in full bloom. We offer genuine Southern Grown Seed. Lb. 20 cts., postpaid. Not prepaid: pk. 40 c.; bu. \$1.50.

Write for prices on larger quantities.

Japanese Millet.

Japanese Millet is one of the most remarkable forage plants we have; remarkable for its marvelous luxuriant growth, often growing six feet tall; remarkable for the immense amount of hay it produces from each acre, and remarkable for its feeding value. It is adapted to all climates; does well on low ground; makes more hay than any other Millet, and requires less seed per acre. Sow in May for best results, 15 to 20 pounds per acre. If desired for hay, cut just before it heads out. Lb. 20 cts., postpaid. Not prepaid: pk. 35 cts.; bu., 40 lbs., \$1.25. Samples sent on request.

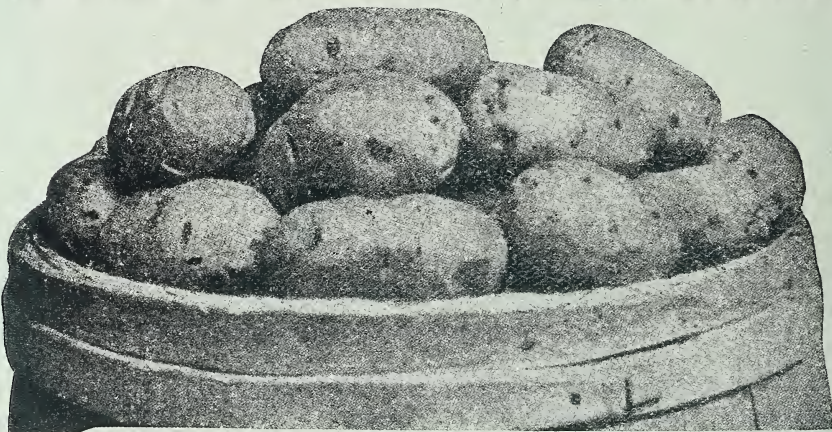

EARLY AMBER CANE
Sow in May for best results, 15 to 20 pounds per acre. If desired for hay, cut just before it heads out. Lb. 20 cts., postpaid. Not prepaid: pk. 35 cts.; bu., 40 lbs., \$1.25. Samples sent on request.

Early Amber Cane.

For Fodder—One of the leading fodder plants. It can be easily grown on any good corn ground, is sweet and tender and greedily eaten by horses, cattle and hogs. It is excellent for pasture; when grazed down it will quickly spring up again, thus a large amount of pasture may be obtained when other forage is scarce. Sow any time from May to July, 12 to 15 pounds per acre in rows, and cultivate the same as corn. Or if sown broadcast use 50 lbs. per acre. Lb. 20 cts., postpaid. Not prepaid: lb. 10 cts.; 10 lbs. 50 cts.; 100 lbs. \$4.00

Northern Grown Seed Potatoes.

The Seed Potatoes we send out were strictly grown for seed purposes. They were grown in the North from the finest select stock and are sure to produce large crops; all are carefully hand sorted. Our seed potato stocks should not be compared with potatoes picked up on the market, named at a guess and sold for seed. **WE HAVE THE FINEST STOCK THIS YEAR WE EVER SAW.**

Early Ohio.

This is without doubt the most popular early potato in the country. They are smooth, clean, and free from prongs and scabs. They are strong and vigorous in growth, mature a crop in a short time and yield abundantly. The tubers grow compact in the hill, are very easily dug, and of fine quality. Our supply is limited. Lb. 25 cts., postpaid. Not prepaid: pk. 45 cts.; bu. \$1.50.

Early Acme.

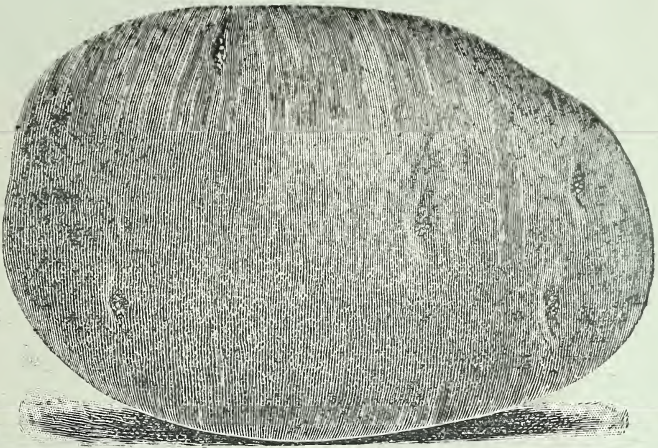

Very similar to Early Ohio. Acme is a little earlier than Ohio and perhaps a little more productive. It grows strong, upright vines, tubers compact in the hill, flesh very white and of high quality.

Our Acmes are Red River grown. Red River potatoes are way ahead of home grown ones and are worth everything to the farmer or market gardener who wants early potatoes that will yield. Our supply is limited. Lb. 25 cts., postpaid.

By freight or express: Pk. 45 cts.; bu. \$1 50.

NOTICE. We do not ship potato orders until danger from freezing is past, which is generally about April 1.

We will ship orders before that date if requested but it will be at the buyers risk.

EARLY ACME

HARVEST QUEEN.—Reproduced from a photograph.

A Great Main Crop Potato--HARVEST QUEEN.

Here is a potato that is sure to become famous. A grand heavy yielding main crop variety of fine quality. The vines are very vigorous and resist disease better than most other varieties. Although it makes a heavy growth of vine it is not a late potato, it comes between the Earlies and Rurals and is, therefore, a better variety to plant as Rurals often fail to ripen before frost. It is a remarkable yielder having produced as high as 300 bushels of first-class tubers to the acre. The shape is well shown in the illustration, and we will add that it is one of the handsomest potatoes we have ever seen. For quality it is unexcelled as it is always dry, mealy and fine-grained, whether baked or boiled. Our stock is extra fine, being clean and free from disease. Order direct from us as we control the entire stock. Lb. 25 cts., postpaid. Not prepaid: Pk. 50 cts.; bu. \$1 50.

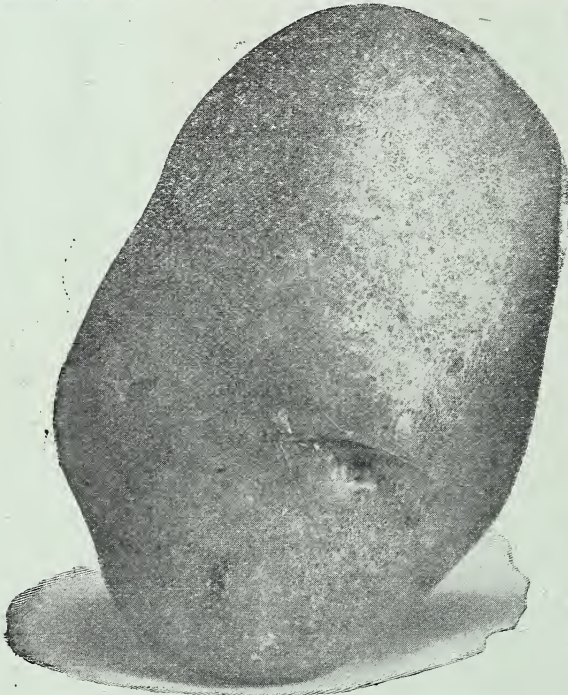

SNOWFLAKE JUNIOR

Snowflake Junior. The "Quality" Potato.

Resembles the old Snowflake in appearance and in cooking qualities. has the further merit of being the nearest to **BUG PROOF** of any potato packing it after all other varieties in sight have been disposed of.

It is, however, much more prolific and As an all-round family or market potato, we

consider Snowflake Junior perfect. It is handsome in appearance, grows to a large size, clear white, cooks evenly and mealy. The vines are remarkably strong, growing upright and are dark green in color. Order early. Lb. 25 cts., postpaid. By freight or express: Pk. 40 cts.; bu. \$1.25.

HARVEST KING

Harvest King.

A MONEY MAKER MAIN CROP POTATO.

We take pleasure in offering our customers this grand Potato, and are sure that everyone who tries it will be more than pleased with its fine quality, vigorous growth, and great productiveness. It has proved itself to be of great value on account of its tremendous yield together with the fact that it produces but very few small potatoes. It is a magnificent sort, nice large, sound, white tubers which are of excellent quality for cooking or baking. Harvest King will bring the highest prices on all markets. Lb. 25 cts., postpaid. By freight or express: Pk. 40 cts.; bu. \$1.25. Sacks free.

Jung's Special POTATO OFFER.

One peck of each Early Ohio, Harvest Queen and Harvest King for \$1.20.

One bushel of each Early Ohio, Harvest Queen and Harvest King for \$4.00.

If sold out may we substitute? If so then please state second choice.

Jung's Wholesale Price List For Market Gardeners.

J. W. JUNG SEED CO., Seed Growers, RANDOLPH, WIS.

As is customary with most seedsmen we make special prices to market gardeners and those requiring seeds in larger quantities. At the prices quoted in this list purchaser pays transportation charges. Please state plainly whether you want the seeds sent by express or freight.

You may be able to purchase seeds at lower prices than we quote but they are quite apt to be of lower quality.

**OUR AIM IS TO SUPPLY SEED OF
THE VERY BEST QUALITY AT A REASONABLE PRICE.**

TERMS--Cash with order.

NOTE--We positively cannot fill any order at these prices unless it amounts to two dollars or more.

"THE VEGETABLE GROWER"

published at Chicago, Ill., is a monthly magazine devoted to the growing of vegetables, small fruit and flowers, edited in a clean understandable way, by authorities in their chosen fields. It comes to you twelve times a year to assist in the hundred and one things that may perplex you. Each issue will be worth what you pay for it for an entire year. It is the only paper of its kind in the world. The editors and contributors are practical growers and we can say that the paper is practically edited from the field. It is of help to many thousands and can be of help to you.

Potatoes will yield Bumper
Crops. Try them.

Our "Fairfield Brand"

Timothy, Alsike and Medium Clover
are Wisconsin Grown and for Quality unexcelled.

We are Seed Growers as well as Dealers.

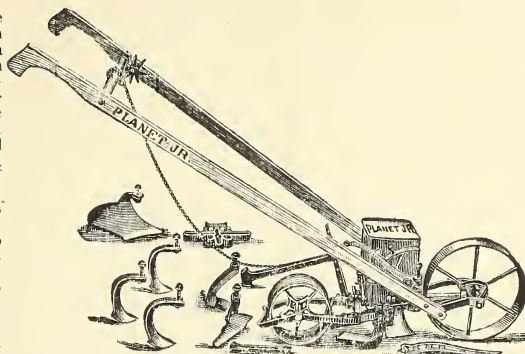

Planet Jr. Combined Hill and Drill Seeder, Wheel Hoe, Cultivator and Plow.

A good seeder is one of the most important of garden and farm implements; with it the seeding may be done in one-fourth of the time required by hand and be done far better, producing a more even crop and with a great saving of seed; with the "hill droppers" there is also a great additional saving of labor in hoeing and thinning.

It will sow all garden seeds in continuous rows with great uniformity and also drop with accuracy in hills 4, 6, 8, 12 or 24 inches apart. It will open the furrow, drop the seed, cover and roll it and mark the next row at one operation and as fast as a man can walk. The flow of seed is automatically stopped

by raising the handles, and started by lowering them and starting the tool. The Seeders are light in operation, strong, simple and do not get out of order. The new Planet Jr. Hill and Drill Seeders are the best hand power seed planters in the world.

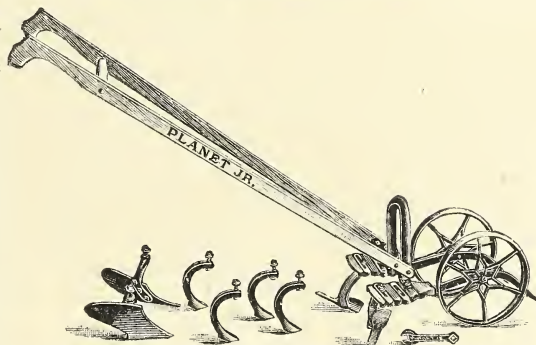

Price, Complete, including one pair of 4 1-2 inch hoes, three cultivator teeth, one gard in plow, one leaf guard. Weight 53 lbs. Holds 2 1-2 quarts. \$11.00.
As a Seeder only, \$9.00.

PLANET JUNIOR NO. 4 HILL AND DRILL SEEDER

Planet Jr. Double Wheel Hoe.

Wheel Hoes with other attachments for cultivating, hilling, furrowing, covering, etc., are among the great labor-savers of the age. They not only make the care of all rowed crops a pleasure but also enable a man to care for five times the area that can be done by using the hand hoe. They are built substantially for all-day work by an able-bodied man, yet they are adapted to the strength of a boy or woman. The Double Wheel hoes while they work equally well between two rows of plants are especially adapted for straddling one row, working close up to both sides of the plants, until the plants are 20 inches high.

PLANET JR. DOUBLE WHEEL HOE NO. 12

This tool is very strong and simple; the frame is made of pressed steel which makes it almost indestructible. Weight, packed, 31 pounds.

Price, Complete, including one pair of 6 inch hoes, two pair of hollow steel cultivator teeth, one pair of plows, one pair of leaf lifters, \$7.00.

Planet Jr. No. 13 Double Wheel Hoe made same as the above but with only the hoe attachments, \$4.75.

Planet Jr. tools are without a rival. They are used at our Fairfield Seed Farm in preference to other makes. We can supply you with any Planet Jr. machine on the market. Write us for a Planet Jr. catalog if interested.

HAVE YOUR FRIENDS ORDER WITH YOU.

YOU WILL BE DOING THEM A SPECIAL FAVOR BY GETTING THEM THE BEST SEEDS AT A REASONABLE PRICE.

For each new customer sent us, you may select any 10 cent packet in this catalog. Send each order on a separate sheet and be sure to have the names and addresses plainly written.
